Mikel Dufrenne, 1973 The Phenomenology of Aesthetic Experience Mikel Dufrenne, 1973 **Phenomenology, Imagination, and Aesthetic Experience** Ryan Ausperk, OhioLINK Electronic Theses and Dissertations Center, 2014 The objective of this thesis is to give a phenomenological account of the relationship between imagination and aesthetic experience To begin I give a preliminary sketch of some monumental figures in the area of aesthetics that have influenced phenomenological reflection on art I then use the philosophy of Mikel Dufrenne to provide the basis of a phenomenological aesthetics emphasizing the distinction between the work of art and the aesthetic object as well as providing an account of the structure of aesthetic experience I then turn to Edward Casey's analysis of imagination to argue that the relationship

between aesthetic experience and imagination is mutually beneficial Finally I apply this line of reasoning to the art of photography to give an example of the reciprocal relationship between imagination and aesthetic experience

Metamorphosis Anna-Teresa Tymieniecka, 2013-06-05 How do we perdure when we and everything around us are caught up in incessant change But the course of this change does not seem to be haphazard and we may seek the modalities of its Logos in the transformations in which it occurs The classic term *Metamorphosis* focuses upon the proportions between the transformed and the retained the

The Space that Separates: A Realist Theory of Art Nick Wilson, 2019-08-23 The Space that Separates A Realist Theory of Art radically challenges our assumptions about what art is what art does who is doing it and why it matters Rejecting the modernist and market driven misconception that art is only what artists do Wilson instead presents a realist case for living artfully Art is defined as the skilled practice of giving shareable form to our experiences of being in relation with the real that is to say the causally generative domain of the world that extends beyond our direct observation comprising relations structures mechanisms possibilities powers processes systems forces values ways of being In communicating such aesthetic experience we behold life s betweenness the space that separates so coming to know ourselves as connected Providing the first dedicated and comprehensive account of art and aesthetics from a critical realist perspective Aesthetic Critical Realism ACR Wilson argues for a profound paradigm shift in how we understand and care for culture in terms of our system s of value recognition Fortunately we have just the right tool to help us achieve this transformation and it s called art Offering novel explanatory accounts of art aesthetic experience value play culture creativity artistic truth and beauty this book will appeal to a wide audience of students and scholars of art aesthetics human development philosophy and critical realism as well as cultural practitioners and policy makers

Possibility of the Aesthetic Experience M.M. Mitias, 2012-12-06 The majority of aestheticians have focused their attention during the past three decades on the identity or essential nature of art can art be defined What makes an object a work of art Under what conditions can we characterize in a classificatory sense an object as an art work The debate and at times controversy over these questions proved to be constructive intellectually stimulating and in many cases suggestive of new ideas I hope this debate continues in its momentum and creative outcome The time is however ripe to direct our attention to another important yet neglected concept viz aesthetic experience which occupies a prominent place in the philosophy of art We do not only create art we also enjoy i e experience and evaluate it How can we theorize about the nature of art in general and the art work in particular and about what makes an object a good work of art if we do not experience it For example how can we identify an object as an art work and distinguish it from other types of objects unless we first perceive it that is in a

critical educated manner Again how can we judge a work as good elegant melodramatic or beautiful unless we first perceive it and recognize its artistic aspect It seems to me that experiencing art works is a necessary condition for any reasonable theory on the nature of art and artistic criticism

Handbook of Phenomenological Aesthetics Hans Rainer Sepp, Lester Embree, 2010-03-11 Historically phenomenology began in Edmund Husserl's theory of mathematics and logic went on to focus for him on transcendental philosophy and for others on metaphysics philosophical anthropology and theory of interpretation The continuing focus has thus been on knowledge and being But if one began without those interests and with an understanding of the phenomenological style of approach one might well see that art and aesthetics make up the most natural field to be approached phenomenologically Contributions to this field have continually been made in the phenomenological tradition from very early on but so to speak along the side The situation has been similar with phenomenological ethics A great deal of thought about art and aesthetics has nevertheless accumulated during a century and a handbook like the present one is long overdue The project of this handbook began in conversations over dinner in Sepp's apartment in Baden Baden at one evening of the hot European summer in the year 2003 As things worked out he knew more about whom to ask and how much space to allocate to each entry and Embree knew more about how to conduct the inviting preliminary editing and prodding of contributors who were late returning their criticized drafts and copyedited entries and was able to invest the time and other resources from his endowed chair That process took longer than anticipated and there were additional unfortunate delays due to factors beyond the editors' control

Deep Mediations Karen Redrobe, Jeff Scheible, 2021-03-09 The preoccupation with depth and its relevance to cinema and media studies For decades the concept of depth has been central to critical thinking in numerous humanities based disciplines legitimizing certain modes of inquiry over others *Deep Mediations* examines why and how this is as scholars today navigate the legacy of depth models of thought and vision particularly in light of the surface turn and as these models impinge on the realms of cinema and media studies The collection's eighteen essays seek to understand the decisive but evolving fixation on depth by considering the term's use across a range of conversations as well as its status in relation to critical methodologies and the current mediascape Engaging contemporary debates about new computing technologies the environment history identity affect audio visual culture and the limits and politics of human perception *Deep Mediations* is a timely interrogation of depth's ongoing importance within the humanities Contributors Laurel Ahnert Taylor
