Red Wolves Black Bears:

Red Wolves and Black Bears Edward Hoagland, 1995 Another great Hoagland journey from the adventures of New York City tugboatmen to Cairo *The Secret World of Red Wolves* T. DeLene Beeland, 2013-06-10 Red wolves are shy elusive and misunderstood predators Until the 1800s they were common in the longleaf pine savannas and deciduous forests of the southeastern United States However habitat degradation persecution and interbreeding with the coyote nearly annihilated them Today reintroduced red wolves are found only in peninsular northeastern North Carolina within less than 1 percent of their former range In *The Secret World of Red Wolves* nature writer T DeLene Beeland shadows the U S Fish and Wildlife Service s pioneering recovery program over the course of a year to craft an intimate portrait of the red wolf its history and its restoration Her engaging exploration of this top level predator traces the intense effort of conservation personnel to save a species that has slipped to the verge of extinction Beeland weaves together the voices of scientists conservationists and local landowners while posing larger questions about human coexistence with red wolves our understanding of what defines this animal as a distinct species and how climate change may swamp its current habitat

Elemental South Dorinda G. Dallmeyer, 2004 Includes a gathering of poetry essays and fiction by the region s best nature writers such as Rick Bass and Janisse Ray Some featured writers are originally from the South and others migrated there but all have honed their voices on the region s distinctive landscapes Simultaneous Ecological Restoration and Management of Longleaf Pine Forests L. Katherine Kirkman, Steven B. Jack, 2017-09-27 *Ecological Restoration and Management of Longleaf Pine Forests* is a timely synthesis of the current understanding of the natural dynamics and processes in longleaf pine ecosystems This book beautifully illustrates how incorporation of basic ecosystem knowledge and an understanding of socioeconomic realities shed new light on established paradigms and their application for restoration and management Unique for its holistic ecological focus rather than a more traditional silvicultural approach the book highlights the importance of multi faceted actions that robustly integrate forest and wildlife conservation at landscape scales and merge ecological with socioeconomic objectives for effective conservation of the longleaf pine ecosystem *Boxes, Rockets, and Pens* Doug Markham, 1997 *Boxes Rockets and Pens* the title refers to equipment used in the recovery and relocation of wildlife presents a detailed history of the efforts to restore several of Tennessee s wild animals from near extinction Drawing from his own firsthand observations of the state s recent wildlife history and from interviews with wildlife professionals Doug Markham offers a series of vignettes on key recovery programs Complementing the narrative are nearly one hundred black and white and color photographs including many by the renowned nature photographer Byron Jorjorian **Seasons of the Sacred Earth** Cliff Seruntine, 2025-08-05 We are just one little family on a small homestead deep in a wild place What we can do is small but perhaps through this book we can impart the wisdom we have discovered It is just this spirit and

enchantment and reality are bound together in a green world full of wonders Living Green with the Spirits of the Land In 2007 the Seruntine family relocated to a secluded Nova Scotia homestead They made it a point to live gently upon the land by growing and raising their own food living in balance with the surrounding forest and honoring Nature s spirits In return the land and the spirits looked after them Seasons of the Sacred Earth follows life deep in their woodland hollow through a magical year It is a marvelous journey into a place where gardens grow by love and magic where children romp through enchanted forests where mystery beckons by light of fireflies And living close to Nature they discover an ancient truth the magical and the mystical are never farther than Earth and Sky *America's Wetland* Roy T. Sawyer,2010-05-05 The geologically ancient Tidewater region of southeastern Virginia and northeastern North Carolina rests precariously atop millions of years of erosion from the nearby Appalachian Mountains An immense wetland at near sea level it is host to every conceivable body of fresh water ranging from brooding swamps and large hidden lakes to sluggish blackwater rivers and brackish sounds one of which was so large an early explorer thought he had found the Pacific Ocean In this engaging book biologist and Tidewater native Roy T Sawyer delivers an ecohistory of this unique waterland whose wind driven tides cover a rich human and natural past Jutting prominently into the Atlantic this wetland is the final stop for the warmth of the Gulf Stream before it is deflected from the American mainland At the top of a narrow warm coastal strip it provides an ideal home for a vast array of animal and plant life including prodigious numbers of reptiles such as the world s northernmost population of alligators and overwintering waterfowl It is also home to the oldest known living trees east of the Rocky Mountains The climate and geography made the area a natural choice for very early human habitation as far back as the last ice age when the region was a rich oasis just south of a veritable tundra In examining the impact of humans upon this environment and vice versa Sawyer reveals how our alarming shortsightedness has produced a fragile and endangered present Although human manipulation started here as early as ten thousand years ago coinciding with extinction of mammoths and other megafauna the environment has been altered most radically over only the last one hundred years particularly in regard to land drainage deforestation overfishing and pollution The author provides an authoritative overview of the human impact on these wetlands and suggests ways in which we might still salvage them In so doing he explores the effects of hurricanes droughts forest fires and ice ages of the past and anticipates in this age of global warming natural events that may be still to come Department of the Interior and Related Agencies Appropriations for 1995: National Park Services ... pt. 12.
