Humanity's creative role within the living pattern of nature Explores important scientific discoveries that reveal the self-organizing intelligence at the heart of nature Examines the idea of a living cosmos from its roots in the earliest cultures to its eclipse during the Scientific Revolution to its return today Reveals ways to reengage our creative partnership with nature and collaborate with nature's intelligence For millennia the world was seen as a creative interconnected web of life constantly growing, developing, and restoring itself But with the arrival of the Scientific Revolution in the 16th and 17th centuries the world was viewed as a lifeless clock-like mechanism bound by the laws of classical physics Intelligence was a trait ascribed solely to human beings and thus humanity was viewed as superior to and separate from nature Today new scientific discoveries are reviving the ancient philosophy of a living interconnected cosmos and humanity is learning from and collaborating with nature's intelligence in new life-enhancing ways from ecological design to biomimicry Drawing upon the most important scientific discoveries of recent times David Fideler explores the self-organizing intelligence at the heart of nature and humanity's place in the cosmic pattern He examines the ancient vision of the living cosmos from its roots in the world-soul of the Greeks and the alchemical tradition to its eclipse during the Scientific Revolution to its return today He explains how the mechanistic worldview led to humanity's profound sense of alienation for if the universe only functioned as a machine there was no longer any room for genuine creativity or spontaneity He shows how this isn't the case and how even at the molecular level natural systems engage in self-organization, self-preservation, and creative problem-solving, mirroring the ancient idea of a creative intelligence that exists deep within the heart of nature Revealing new connections between science, religion, and culture Fideler explores how to reengage our creative partnership with nature and new ways to collaborate with nature's intelligence

Re-imagining the Modern American West Richard W. Etulain, 1996-09-01 From the Mississippi west to the Pacific from border to border north and south here is the first thorough overview of novelists, historians, and artists of the modern American West Examining a full century of cultural intellectual forces at work a leading authority on the twentieth-century West brings his formidable talents to bear in this pioneering study Richard W. Etulain divides his book into three major sections He begins with the period from the 1890s to the 1920s when artists and authors were inventing an idealized frontier especially one depicting initial contacts and conflicts with new landscapes and new peoples The second section covers the regionalists who focused on regional, mostly geographical, characteristics that shaped distinctively western traits of character and institutions The book concludes with a discussion of the postregional West from World War II to the 90s a period when novelists, historians, and artists stressed ethnicity, gender, and a new environmentalism as powerful forces in the formation of modern western society and culture Etulain casts a wide net in his new study He discusses novelists from Jack London to John Steinbeck and on to Joan Didion He covers historians from Frederick Jackson Turner to Earl Pomeroy and Patricia Nelson Limerick and artists from Frederic Remington and

Charles Russell to Georgia O Keeffe and R C Gorman The author places emphasis on women painters and authors such as Mary Hallock Foote Mary Austin Willa Cather and Judith Baca He also stresses important works of ethnic writers including Leslie Marmon Silko Rudolfo Anaya and Amy Tan An intriguing survey of tendencies and trends and a well defined profile of influences and outgrowths this book will be valuable to students and scholars of western culture and history American studies and related disciplines General readers will appreciate the book s balanced structure and spirited writing style All readers whatever their level of interest will discover the major cultural inventions of the American West over the past one hundred years
