Paul Stevens, 2024-02-20 Work whether from home in cyberspace or in a factory or office occupies a major chunk of our time energy and soul This book seeks to make sense of our work in the world through adapting the pithy

statement of the Puritan William Perkins to define marketplace theology as the science of working blessedly forever It is a science involving investigation but not just with the head thought but also with heart prayer and hand practice But it is a science of working So the book investigates a theology of work undertaken in the light of God's blessing and purpose And our work is not just for this life but forever since some of it could last into the new heaven and new earth where guess what Scripture says we will work as fully human and resurrected beings Stevens gathers his lifetime of research and teaching into this book showing through biblical research and contemporary analysis the meaning of work and human enterprise It could change your lifestyle your work style and your soul

State of Affairs Richard J. Coleman, 2014-10-24 The last sixty years have witnessed a virtual explosion of interest in how modern science and traditional Christianity intersect This new rapprochement with science has irrevocably altered how we think of God It constitutes a foundation from which we cannot retreat but from which we also cannot move forward until we examine the presumptions on which it is based For the first time Richard Coleman interprets in a clear and meaningful way the themes and practitioners that make this rapprochement different and what it has achieved But this book is more than description it is an inquiry into whether Christian theology has lost its authentic voice by its singular focus on accommodating modern science

Humans and the Earth David W. Rutledge, 1993 This fresh approach to ecological issues argues that there are important connections between the personal alienations inherited from critical philosophy and the cosmic alienation we call the environmental crisis Rooted in the historical development of modern attitudes to nature this study breaks new ground by applying a post critical perspective to western views of God humanity and the natural world Using the thought of Michael Polanyi Wendell Berry Wilfrid Cantwell Smith and William Poteat it points a way out of our abuse of the earth through a renewing of incarnate life in which our minds are no longer separated from the natural bodies they express

The Uniqueness and Universality of Jesus Christ Massimo Serretti, 2004 Seven Catholic theologians explore whether and to what extent the theories of knowledge on which the pluralistic theology of religions bases its account of religion and the religions are adequate The volume represents the first phase of an international research project in Christology under the Pon
