Owning Russia Andrew S. Barnes,2018-07-05 During and after the breakdown of the Soviet Union a wide range of competitors fought to build new political and economic empires by wresting control over resources from the state and from each other In the only book to examine the evolution of Russian property ownership in both industry and agriculture Andrew Barnes uses interviews archival research and firsthand observation to document how a new generation of capitalists gained control over key pieces of the Russian economy by acquiring debt ridden factories and farms once owned by the state He argues that although the Russian government made policies that affected how actors battled one another it could never rein in the most destructive aspects of the struggle for property Barnes shows that dividing the spoils of the Soviet economy involved far more than the experiment with voucher privatization or the scandalous behavior of a few Moscow based oligarchs In Russia the control of property yielded benefits beyond mere profits and these high stakes fueled an intense enduring and profound conflict over real assets This fierce competition empowered the Russian executive branch at the expense of the legislature dramatically strengthened managers in relation to workers created a broad array of business conglomerates and fundamentally shaped regional politics not only blurring the line between government and business but often erasing it

 Institute for Scientific Information,2001 Russia's Provinces P. Kirkow,1998-01-12 This book focuses on the evolution of
 federalism and intragovernmental relations in Russia for the period 1992 95 following the dissolution of the Soviet Union Its
 main question is whether under conditions of democratisation and marketisation in Russia an authoritarian approach of
 transformation from above is more favourable to one of granting more autonomy to local governments The author suggests a
 scale of various reform implementation policies based on two pioneering case studies of Russian provinces The BRICs
and Emerging Economies in Comparative Perspective Uwe Becker,2013-10-23 In the past ten to twenty years the global
 political economy picture has dramatically changed with the emergence of the economies of Brazil Russia India and notably
 China BRICs as big players and competitors of the advanced economies in the West and Eastern Asia The book comparatively
 analyses institutional change in the BRICs This book examines the BRICs by analysing their institutional development their
 main continuities and changes and their differences It provides a comparative analysis of the political economies of the
 BRICs but also considers South Africa and Turkey The contributors provide a systematic comparison of the state economy
 and the capital labour relationships and explore whether they liberalized or followed a specific trajectory The book also
 addresses debates on the varieties of capitalism and explores whether the emerging economies fit into the dichotomous
 construction of liberal and coordinated capitalism or whether they require a more differentiated typological approach Moving
 away from rigid conceptions and the static classification of political economies as either liberal or coordinated and
 presenting a more open approach The BRICs and Emerging Economies in Comparative Perspective will be vital reading for
 students and scholars of comparative political economy international relations capitalism the BRICs emerging markets and
 the role of the state in the economy *The Politics of Equity Finance in Emerging Markets* Department of Political Science
 Case Western Reserve University Kathryn C. Lavelle Professor,2004-09-24 Emerging market stock issuance relative to GDP
 rose in the late twentieth century to levels that roughly matched that of advanced industrial markets Nonetheless the
 connection between owning shares of emerging market stock and the ability to influence the management of these firms
 remains fundamentally different from the analogous institutional connection that has evolved in industrial markets The
 reasons for the differences in emerging markets are both historical and political in nature That is local equity markets have
 had the objective of providing for some degree of local ownership and control of large economic entities since the late
 nineteenth century However local markets have operated under different global political structures since that time ranging
 from imperialism to world wars to sovereign developmental states to neo liberal states Shares issued under these different
 structures have been reconfigured over time resulting in a lack of convergence along either the Anglo American or
 Continental models of corporate governance The author uses a political science paradigm to explain the growth of emerging
 equity markets She departs from conventional economic explanations and examines politics at the micro level of large issues

of emerging market stock The second half of the book presents case studies dealing with emerging market countries in Latin America Asia Russia and Eastern Europe Africa and the Middle East The case studies connect the regional state and firm levels to detail the multiple ownership and control arrangements and to dispel the notion that mere quantitative growth of these markets will lead to a convergence in financial institutional structures along the lines of the industrial core of the world economy

The Totalitarian Paradigm after the End of Communism, 2022-06-08 Concepts of totalitarianism have undergone an academic revival in recent years particularly since the breakdown of communist systems in Europe in 1989 91 the totalitarian paradigm so it seems to many scholars today had been discarded prematurely in the heat of the Cold War The demise of communism as a social system is however not only an important cause of the recurring attractiveness of the totalitarian paradigm but provides at the same time new evidence and correspondingly new problems of explanation for all approaches in communist studies and totalitarianism theory in particular This book contains articles by philosophers social scientists and historians who reassess the validity of the totalitarian approach in the light of the recent historical developments in Eastern Europe A first group of authors focus on the analytical usefulness and explanatory power of classic concepts of totalitarianism after having observed the failed reforms of the Gorbachev era and the collapse of Europe s communist systems in 1989 91 In these contributions the totalitarian paradigm is contrasted with other approaches with respect to cognitive power as well as normative implications In the second group of contributions the focus is on the reassessment of methodological and theoretical problems of the classic concepts of totalitarianism The authors attempt to reinterpret the classic concepts so as to meet the objections which have been put forward against those concepts during the last decades The study thereby traces some of the intellectual roots of the totalitarian paradigm that precede the outbreak of the Cold War such as the work of Sigmund Neumann and Franz Borkenau It also focuses on the most famous authors in the field Hannah Arendt and Carl Joachim Friedrich In addition it discusses theorists of totalitarianism like Juan Linz whose contributions to totalitarianism theory have too often been overlooked

Democracy After Communism Larry Diamond, Marc F. Plattner, 2002-09-23 The last quarter of the twentieth century was marked by two dramatic political trends that altered many of the world s regimes the global resurgence of democracy and the collapse of communism Was the process that brought down communism in Eastern Europe and the former Soviet Union fundamentally different from the process that gave birth to new democracies in other regions of the world Were the transitions away from communism mostly like or mostly unlike the transitions away from authoritarianism that took place elsewhere Is the challenge of building and consolidating democracy under postcommunist conditions unique or can one apply lessons learned from other new democracies The essays collected in this volume explore these questions while tracing how the countries of Eastern Europe and the former Soviet Union have fared in the decade following the fall of communism Contributors Anders

Global Capital, Human Needs and Social Policies I.

Gough, 2000-10-10 Can the needs of capital ever be reconciled with the needs of people To what extent can social policies bridge the gap between social rights and human welfare and economic competitiveness in a global world Building on his previous writings on political economy and human need Ian Gough throws new light on these perennial questions in a series of penetrating and original essays The conclusion is upbeat social policy still has the potential to narrow though never close the gap between the drive of capital and the universal needs of people

Restructuring of the Economic Elites after State Socialism Jochen Tholen, David Lane, Gyorgy Lengyel, 2012-02-24 The collapse of the former socialist states has led to the transformation of their political economic and social systems as well as a major change in international orientations In this context new economic and political elites of the former state socialist societies have emerged How they have emerged from state socialism is a major component of this book which has two major themes First we consider the recruitment

patterns of the new elites among others the extent to which the new leaderships have been reconstituted from the former cadres of state socialism Second we outline the consequences of transformation on the institutions particularly the formation of markets and privatisation in the context of the dynamic of the enlargement of the European Union and the entry of the new states into the world system This collection of papers is based mostly on two conferences out of six serial conferences under the general responsibility of David Lane Cambridge University The first conference was held in Budapest on 4 5 September 2004 at Corvinus University of Budapest Institute of Sociology and Social Policy Centre for Empirical Social Research and organized by Gy rgy Lengyel the second on 13 14 May 2005 at University of Bremen Institute of Sociology Institute Labour and Economy led by Jochen Tholen

Hundred Years of the Russian Revolution Anuradha M. Chenoy, Archana Upadhyay, 2021-04-07 The book reflects upon the Russian Revolution of 1917 and the ensuing developments in Russia the rest of the former Soviet Union Central and Eastern Europe and elsewhere in the world It discusses the impact of the legacies of the Russian Revolution on political systems ideologies economic and social structures and culture The book answers some pertinent questions To what extent are these legacies relevant today for the contextualisation of memory politics social institutions and international relations How does an analysis of 1917 and its legacies contribute to the comparative study of revolutions and social change

The Vanishing Rouble Paul Seabright, 2000-11-30 An accessible and authoritative analysis of barter in the former Soviet Union

On Living Through Soviet Russia Daniel Bertaux, Anna Rotkirch, Paul Thompson, 2004-08-02 For a period of over seventy years after the 1917 revolutions in Russia talking about the past either political or personal became dangerous The new policy of glasnost at the end of the 1980s resulted in a flood of reminiscence almost nightly on television and more formally collected by new Russian oral history groups and western researchers This book is a fascinating collection of life stories and family history interview material collected by the editors and two Russian groups of interviewers
