Russian Strategic Nuclear Forces:

Russian Strategic Nuclear Forces Oleg Bukharin, Frank Von Hippel, 2004 A comprehensive databook of technical and institutional facts about the Soviet and Russian nuclear arsenal *Russian Strategic Nuclear Forces (Chapter 1)*, 2001

The Nuclear Challenge Christoph Bluth, 2019-07-16 This title was first published in 2000 Christoph Bluth provides a comprehensive and timely analysis of strategic nuclear arms policy in the United States and Russia and examines the collaborative efforts to reduce nuclear weapons through arms control and render nuclear weapons and fissile materials in Russia secure He concludes that the end of the Cold War has created new and unprecedented dangers and that these dangers require a greater political will and cooperation which have so far been lacking **Russian Nuclear Weapons**

Stephen Blank, 2011 This book presents several essays analyzing Russia's extensive nuclear agenda and the issues connected with it It deals with strategy doctrine European Eurasian and East Asian security agendas as well as the central U S Russia nuclear and arms control equations This work brings together American European and Russian analysts to discuss Russia's defense and conventional forces reforms and their impact on nuclear forces doctrine strategy and the critical issues of Russian security policies toward the United States Europe and China It also deals directly with the present and future roles of nuclear weapons in Russian defense policy and strategy Nuclear Deterrence in Europe James T. Quinlivan, Olga

Oliker, 2011-08-05 Through a variety of policies and actions and most recently in a new military doctrine adopted in February 2010 Russia has indicated the types of situations and threats that might cause it to resort to using nuclear weapons This volume examines Russia's evolving framework for nuclear deterrence and its implications for U S military operations in Europe The United States, Russia and Nuclear Peace Stephen J. Cimbala, 2020-02-03 This book analyzes the United

States and Russia's nuclear arms control and deterrence relationships and how these countries must lead current and prospective efforts to support future nuclear arms control and nonproliferation The second nuclear age following the end of the Cold War and the demise of the Soviet Union poses new challenges with respect to nuclear strategic stability deterrence and nonproliferation The spread of nuclear weapons in Asia and the potential for new nuclear weapons states in the Middle East create new possible axes of conflict potentially stressful to the existing world order Other uncertainties include the interest of major powers in developing a wider spectrum of nuclear weapons and delivery systems possibly for use in limited nuclear wars and the competitive technologies for antimissile defenses being developed and deployed by the United States and Russia Other technology challenges including the implications of cyberwar for nuclear deterrence and crisis management are also considered Political changes also matter The early post Cold War hopes for the emergence of a global pacific security community excluding the possibility of major war have been dashed by political conflict between Russia and NATO by the roiled nature of American domestic politics with respect to international security and by a more assertive and militarily competent China Additionally the study includes suggestions for both analysis and policy in order to prevent the

renewed U S Russian nuclear arms race and competition in new technologies This volume would be ideal for graduate students researchers scholars and anyone who is interested in nuclear policy international studies and Russian politics

Russian civil-military relations and the origins of the second Chechen war Sz&aszdi, Lajos F.,2008-08-29 This book has relevance for those interested in understanding Russia s course in international relations under the leadership of Vladimir Putin This book will inform the reader and is especially relevant in light of the events of 2008 in the Caucasus and the war in Georgia in particular The author explains the ideology of Neo Eurasianism which in turn inspires the policy thinking of the Kremlin Also studied is Putin s origins in the KGB from the previous posts of Secretary of the Security Council and Director of the FSB and his rise to power in the crucial year of 1999 when he became Russian Prime Minister The author highlights the continuing trend of appointing high ranking officers of the Russian intelligence community to senior positions in the government studying this in the context of Russian civil military intelligence relations The author reached the conclusion back in 2003 that the members of Russian intelligence hold the reins of power above the civilian and military elements of the Russian government The author returns to the Kosovo Crisis of 1999 discussing also the motives that led the Kremlin and Putin to invaded Chechnya for a second time in a decade Parallels can be drawn to the 2008 Russian invasion of Georgia and the roots of the Neo Eurasianist ideology that is behind the two invasions are examined This book will help the reader understand Russia s current and future distribution of power in the Caucasus the Balkans and the world at large Moscow s search for a multipolar world and its opposition to U S hegemony

Russian Foreign Policy toward Missile Defense
Bilyana Lilly,2014-08-21 This book is devoted to one of the central issues in U S Russian and NATO Russian relations ballistic missile defense Drawing on more than 2 000 primary sources interviews with Russian and NATO officials and a variety of Russian and Western publications this book offers an unparalleled in depth analysis of the reasons behind Russia s policy towards the construction of a U S ballistic missile defense in Europe It provides a critical assessment of the decision making mechanisms that shape Russia s position on ballistic missile defense as well as Russia s strategic relations with the United States and Russia s interaction with European and non European powers Lilly argues that contrary to Moscow s official claims during the Putin era Russian objections to the construction of ballistic missile defense in Europe have not been wholly dictated by security concerns To Russia missile defense is not purely an issue in and of itself but rather a symbol and instrument of broader political considerations At the international level the factors that have shaped Russia s response include Moscow s perception of the overall state of U S Russian relations the Kremlin s capacity to project influence and power abroad and NATO s behavior in the post Soviet space Domestically the issue of missile defense has been a facilitating instrument for strengthening Putin s regime and justifying military modernization Taken together these instrumental considerations and their fluctuating intensity in different periods prompt the Russian leadership to pursue contradictory policy approaches simultaneously On the one hand the Kremlin seeks U S cooperation while on the other hand it threatens

retaliation and reinforces Russian offensive capabilities The result is Moscow's incoherence inconsistency and double speak over the issue of missile defense

Strategic Missile Forces of the Russian Federation: Organisation and Missile Complexes Hugh Harkins, 2021-09-16 In the second and third decades of the twenty first century the Russian Federation Strategic Missile Forces the largest arm of the Russian Strategic Nuclear Forces underwent force modernisation to ensure deterrent capability to counter proliferation of North Atlantic Treaty Organisation missile defence systems Capability enhancements and deterrence potential would be ensured through the introduction development of advanced intercontinental ballistic missile complexes Yars and Sarmat armed with a new generation of maneuverable warheads the Avangard hypersonic glide vehicle and longer term the projected Kedr light intercontinental ballistic missile revealed in 2020 The volume draws upon information from official sources to provide a picture of the Strategic Missile Forces and constituent missile systems as understood in early 2021 when it operated RT 2PM Topol RT 2PM2 1 Topol M RS 24 Yars series R 36M2 UR 100N UTKh and Avangard complexes with the RS 28 Sarmat then scheduled to be placed on alert the following year In regard to Avangard and Sarmat information is naturally scarce as these programs were in 2021 shrouded in the highest levels of classification However significant data had been released to provide an informed outline of the systems which along with Yars were intended to constitute the backbone of the Strategic Missile Forces through the third decade of the twenty first century The volume adopts a factual rather than a geopolitical approach and avoids unsubstantiated data The number of strategic strike systems ICBM complexes etc in service and deployed are taken directly from the data submitted by both parties to the New Strategic Arms Reduction Treaty All technical data concerning missile complexes and associated systems missile formations and associated organisations operational data such as the Russian Federations nuclear doctrine thresholds for the use of nuclear weapons along with graphic material has been furnished by the respective design bureau manufacturers experimental research agencies the Ministry of Defence of the Russian Federation and the Ministry of Foreign Affairs of the Russian Federation

The Myth of the Nuclear Revolution Keir A. Lieber, Daryl G. Press, 2020-06-15 Leading analysts have predicted for decades that nuclear weapons would help pacify international politics The core notion is that countries protected by these fearsome weapons can stop competing so intensely with their adversaries they can end their arms races scale back their alliances and stop jockeying for strategic territory But rarely have theory and practice been so opposed Why do international relations in the nuclear age remain so competitive Indeed why are today's major geopolitical rivalries

intensifying In *The Myth of the Nuclear Revolution* Keir A Lieber and Daryl G Press tackle the central puzzle of the nuclear age the persistence of intense geopolitical competition in the shadow of nuclear weapons They explain why the Cold War superpowers raced so feverishly against each other why the creation of mutual assured destruction does not ensure peace and why the rapid technological changes of the 21st century will weaken deterrence in critical hotspots around the world By explaining how the nuclear revolution falls short Lieber and Press discover answers to the most pressing questions about deterrence in the coming decades how much capability is required for a reliable nuclear deterrent how conventional conflicts may become nuclear wars and how great care is required now to prevent new technology from ushering in an age of nuclear instability *National Missile Defense and Prospects for U.S.-Russia ABM Treaty Accommodation* United States. Congress. Senate. Committee on Governmental Affairs. Subcommittee on International Security, Proliferation, and Federal Services,1997 Russia, the Asymmetric Threat to the United States John Wood,2009-06-22 Exploring themes critical to understanding the current world order this book lays bare the reality of the new Russia that emerged under Vladimir Putin Russia holds the world s largest natural gas reserves the second largest coal and uranium reserves and the eighth largest oil reserves Europe is dependent on Russia for 25 percent of its oil and gas Russia is also positioning itself to play a similar role with respect to China The key to this strategy is a network of new oil and natural gas pipelines that Russia is in the process of constructing which will by pass the problematic Ukraine Georgia Poland and the Baltic States in the West and lock in the enormous potential of China in the East Further as the Western economies including the USA begin themselves to recover their growing energy dependence will come back into the forefront and therefore the need to ensure that Russia does not fail in its opening up of new energy resources in the Arctic and Eastern Siberia Russia is no longer a superpower in the Cold War sense of the word because its military is significantly weaker and as such is incapable of conducting a regional let alone global war against either the United States or NATO It is precisely because of its military weakness that Putin has been forced to adopt an asymmetric approach Thus the pipeline spigot and the proliferation of missiles and aircraft have become Russia s weapons of choice along with an ever growing reliance on its strategic nuclear forces to provide it with the necessary deterrent to foreign aggression In addition Putin and Medvedev have no interest in an arms race with the United States it is too costly and detracts from their priority which is economic reform From Putin s perspective America is in the process of imposing absolute security or as Joint Vision 2020 put it full spectrum dominance over the world As the sole remaining superpower the United States enjoys a massive strategic imbalance in its favor which it has used first to contain but now with the intent to control the world How NATO expansion lays the groundwork for a U S global missile defense system to contain perceived adversaries such as Russia which in turn secures the dominance of America through its Prompt Global Strike PGS capability the ability to strike anywhere on the planet with impunity within 90 minutes of the order being given by The President Thus PGS will be to the 21st Century what British Gun Boat Diplomacy was to the 19th Century In

such a context Russia is forced to respond asymmetrically

Nuclear Modernization in the 21st Century Aiden Warren, Philip M. Baxter, 2020-02-17 This collection examines the extent to which nuclear weapons modernization has become a significant point of concern and consideration in international security Recent statements and substantial investments by nuclear weapon possessor states in the upkeep and modernization of their nuclear postures particularly the United States Russia and China illustrate a return of primacy and the salience of nuclear forces in international politics The upgrading of systems the introduction of new capabilities the intermingling of new technologies and the advancement of new strategic models are all indicative of their elevation in importance and reliance With contributions from leading thinkers in the nuclear weapons domain this book elucidates the global strategic and policy implications such modernization efforts by the above mentioned states will have on international security In unpacking and conceptualizing this developing source of potential in security and tension the collection not only provides a technical context but also frames the likely effects modernization could have on the relations between these nuclear weapon powers and the larger impact upon efforts to curb nuclear weapons both in terms of horizontal and vertical proliferation The chapters have been arranged so as to inform a variety of stakeholders from academics to policy makers by connecting analytical and normative insights and thereby advancing debates pertaining to where nuclear modernization sits as a point of global security consternation in the 21st century

Nuclear Scholars Initiative Sarah Weiner, 2014-01-27 The 2013 class of Nuclear Scholars selected from a very competitive applicant pool contained some of the best and brightest young professionals in the nuclear field Drawn from graduate programs the national labs the civil service and the U S military these Nuclear Scholars participated in six monthly workshops that focused on a wide range of nuclear topics These topics included extended deterrence and assurance stockpile stewardship nuclear materials security Iranian and North Korean proliferation international nonproliferation norms and treaties missile defense and nuclear targeting The program culminated in a final meeting at which the Nuclear Scholars presented their own research to a panel of senior experts The papers resulting from these presentations are contained in this year's volume

Arms for Uncertainty Stephen J. Cimbala, 2016-04-08 Nuclear weapons are here to stay They have survived into the twenty first century as instruments of influence for the US Russia and other major military powers But unlike the Cold War era future nuclear forces will be developed and deployed within a digital driven world of enhanced conventional weapons As such established nuclear powers will have smaller numbers of nuclear

weapons for the purpose of deterrence working in parallel with smarter conventional weapons and elite military personnel. The challenge is to agree proportional reductions in nuclear inventories or abstinence requiring an effective nonproliferation regime to contain aspiring or threshold nuclear weapons states. This is the most comprehensive view of nuclear weapons policy and strategy currently available. The author's division of the nuclear issue into the three ages is a never seen before analytical construct. With President Obama reelected the reduction and even elimination of nuclear weapons will now rise to the top of the agenda once more. Moreover given the likelihood of reductions in US defense spending the subject of the triad which is covered in Chapter One will no doubt be an important subject of debate as will the issue of missile defense covered in Chapter 10. This book provides an excellent analysis of the spread of nuclear weapons in Asia and the Middle East and the potential dangers of a North Korean or Iranian breakout subjects that dominate current policy debates. *The New START and the Implications for National Security* United States. Congress. Senate. Committee on Armed Services, 2011
