Remarks on the Phonological Evolution of Russian in Comparison with the Other Slavic Languages Roman Jakobson,2023-10-31 The first English translation of a classic and groundbreaking work in historical phonology This is the first English translation of a groundbreaking 1929 work in historical phonology by the renowned linguist Roman Jakobson considered the founder of modern structural linguistics A revolutionary treatment of Russian and Slavic linguistics the book introduced a new type of historical linguistics that focused on the systematic reasons behind phonological change Rather than treating such changes as haphazard Jakobson here presents a teleological purposeful approach to language evolution He concludes by placing his book in the context of the exciting structural developments of the era including Einstein s theories Cezanne s art and Lev Berg s nomogenesis The original Russian version of the book was lost during the 1939 German invasion of Brno Czechoslovakia and the only edition available until now has been the French translation by Louis Brun Thus this first English translation offers many linguists their first opportunity to read a major early work of Jakobson Ronald Feldstein a leading Slavicist and phonologist in his own right has not only translated the text from French to English he has also worked to reconstruct something as close to the missing original as possible Feldstein s end of chapter annotations provide explanatory context for particularly difficult passages

Russian and the Slavonic Language W. J. Entwistle, W. A. Morison, 1949 *Interslavic zonal constructed language* Vojtěch Merunka, 2018-02-01 Interslavic zonal constructed language is an auxiliary language which looks very similar to real spoken Slavic languages in Central and Eastern Europe and continues the tradition of the Old Church Slavonic language Interslavic shares grammar and common vocabulary with modern spoken Slavic languages in order to build a universal language tool that Slavic people can understand without any or with very minimal prior learning It is an easily learned language for those who want to use this language actively Interslavic enables passive e.g. receptive understanding of the real Slavic languages Non Slavic people can use Interslavic as the door to the big Slavic world Zonal constructed languages are constructed languages made to facilitate communication between speakers of a certain group of closely related languages They belong to the international auxiliary languages but unlike languages like Esperanto and Volapük they are not intended to serve for the whole world but merely for a limited linguistic or geographic area where they take advantage of the fact that the people of this zone understand these languages without having to learn them in a difficult way Zonal languages include the ancient Sanskrit Old Church Slavonic and Lingua Franca Zonal design can be partially found also in modern languages such as contemporary Hebrew Indonesian and Swahili

Politics and the Slavic Languages Tomasz Kamusella, 2021-06-17 During the last two centuries ethnolinguistic nationalism has been the norm of nation building and state building in Central Europe The number of recognized Slavic languages in line with the normative political formula of language nation state gradually tallied with the number of the Slavic nation states especially after the breakups of Czechoslovakia the Soviet Union and Yugoslavia But in the current age of borderless cyberspace regional and minority Slavic languages are freely standardized and used even when state authorities disapprove As a result since the turn of the 19th century the number of Slavic languages has varied widely from a single Slavic language to as many as 40 Through the story of Slavic languages this timely book illustrates that decisions on what counts as a language are neither permanent nor stable arguing that the politics of language is the politics in Central Europe The monograph will prove to be an essential resource for scholars of linguistics and politics in Central Europe
