God personal empowerment as manifested in the individual's perceived relationship to the divine and social power meaning the relationships between groups such as clergy and laity. Each type intersects with notions of Christian creed, cult, and code and is represented spatially and materially in church buildings. Kilde explores these categories chronologically from the early church to the twentieth century. She considers the form, organization, and use of worship rooms, the location of churches, and the interaction between churches and the wider culture. Church buildings have been integral to Christianity, and Kilde's important study sheds new light on the way they impact all aspects of the religion. Neither mere witnesses to transformations of religious thought or nor simple backgrounds for religious practice, church buildings are in Kilde's view dynamic participants in religious change and goldmines of information on Christianity itself.
