The Intellectual Education of the Italian Renaissance Artist Angela Dressen,2021-09-02 Scholars have traditionally viewed the Italian Renaissance artist as a gifted but poorly educated craftsman whose complex and demanding works were created with the assistance of a more educated advisor These assumptions are in part based on research that has focused primarily on the artist s social rank and workshop training In this volume Angela Dressen explores the range of educational opportunities that were available to the Italian Renaissance artist Considering artistic formation within the history of education Dressen focuses on the training of highly skilled average artists revealing a general level of learning that was much more substantial than has been assumed She emphasizes the role of mediators who had a particular interest in augmenting artists knowledge and highlights how artists used Latin and vernacular texts to gain additional knowledge that they avidly sought Dressen s volume brings new insights into a topic at the intersection of early modern intellectual educational and art history
