Sculptors Manual:

A Sculptor's Manual Bainbridge Copnall, 2014-05-17 A Sculptor's Manual focuses on the methods involved in sculpture. The manual first outlines drawing as a medium by which artistic creativity can evolve. The text notes that mastery of this talent can enable artists to become more analytical in their appreciation of their fellow beings as well as bring out the inventive faculties in them in many ways. The book also discusses direct carving and the use of cartoons and automatic tools in carving. The work done by the author at the Henry Florence Memorial Hall is noted. The varieties of stones that can be used as medium in carving are explained. The text also looks at the methods in moving heavy weights, traditional carving of relief and wood carving. Modeling as a way to create fine pieces of sculpture is underscored. The book also discusses the methods involved in building a large bronze memorial and an enormous aluminum stag. Alternative methods of casting a large memorial are also elaborated. The text also puts emphasis on fiberglass sculpture including materials and methods to be employed. The manual is a good reference for beginner and master sculptors.

Handbook of Greek Sculpture Olga Palagia, 2019-07-22 The Handbook of Greek Sculpture aims to provide a detailed examination of current research and directions in the field. Bringing together an international cast of contributors from Greece, Italy, France, Great Britain, Germany, and the United States, the volume incorporates new areas of research such as the sculptures of Messene and Macedonia, sculpture in Roman Greece, and the contribution of Greek sculptors in Rome, as well as important aspects of Greek sculpture like techniques and patronage. The written sources, literary and epigraphical, are explored in dedicated chapters, as are function and iconography and the reception of Greek sculpture in modern Europe. Inspired by recent exhibitions on Lysippos and Praxiteles, the book also revisits the style and the personal contributions of the great masters.

Elementary Instructions for Students of Sculpture Francesco Carradori, 2002 Carradori's book of instructions is vital to understanding the art and craft of sculpting as they were practiced before the twentieth century, since little substantial material exists that demonstrates in an informed didactic manner the various tools and techniques used by ancient sculptors. Carradori's work is the most comprehensive and instructive; it includes thirteen articles that explain how to restore marble sculpture, model clay work with stucco and wax, cast and finish bronze, and how to carve and enlarge models into marble and stone, as well as seventeen tables that illustrate the arrangement, methods, and tools used in each of these processes. The book also includes the complete Italian text. Jacket

Modelling and Sculpture Albert Toft, 2004-01-01 Both experienced and novice sculptors will appreciate this manual written by an expert that addresses every practical detail necessary for a complete knowledge of the craft. Topics include modelling a portrait bust, casting, modelling for terra cotta in relief, and for bronze, and modelling in clay. 36 plates, 82 line illustrations.
