Caribbean Island Movements Carlo A. Cubero,2017-10-09 Caribbean Island Movements explores the different ways in which being mobile is central to the production and reproduction of social identities on the Caribbean island of Culebra

Rather than seeing insularity and mobility and its associations as mutually exclusive components this ethnographic study demonstrates how they mutually inform each other The book proposes the term of transinsularism as a means to articulate the complex ways in which islanders construct a unique place for themselves in the world while referencing and engaging in practices of movement Based on a long term relationship to the Caribbean island of Culebra it describes how mobile islanders select from various at times contradictory discourses and practices in the process of fashioning their sense of island identity It makes the case for a conscious social creative process where a group of individuals finds ways to narrativise a life world that operates in tension with structural social forces associated with nation building colonialism and landed narratives
