Sea Dumping in Australia Geoff Plunkett, 2003 A compilation of reports previously published separately

A Cultural History of the Sea in the Global Age Franziska Torma, 2023-02-09 In 1972 an image became an icon Blue Marble a photograph of the Earth as seen from outer space The picture features prominently the globe's water covered surface The ocean connects nature and culture in the modern world Within the time span of 100 years the sea changed its cultural meaning from a dangerous place to an endangered environment This volume traces diverse processes of oceanic transformation in the Anthropocene it follows scientists seafarers diplomats and filmmakers from ship decks to the arenas of political decision making on land The essays lead from underwater dumping grounds to islands in the south pacific Tiny organisms like plankton and charismatic megafauna like whales accompanied the human voyages The presence of the animals challenges common notions of human culture The global age has to take non human agents into account to fully understand the cultural history of the seas

Oceans, Seas, Shorelines and Warfare Richard Harding, Ross Anderson, Mick de Ruyter, 2024-09-23 For as long as humanity has ventured on the seas naval warfare has been an integral part of their activities and the focal point for many histories and ideas of heritage This book presents a rarely explored aspect the long term impact of those battles on shorelines seas and oceans Dramatic and altering the physical scars of battles remain with us today in the form of cultural landscapes and archaeological sites while the geopolitical consequences of warfare have been world changing The migrations of peoples across the seas accompanied by violence have done more to shape the demographic and cultural map of the modern world than almost anything else Both seaborne opportunities and threats have influenced the way of life of coastal communities Today technology has seen these threats extend far into the deepest ocean and reach across continents This book shows how despite being virtually invisible to an increasing percentage of the world's population the ocean is more significant now than it has ever been Ranging from the world of antiquity to the present day with a global perspective the volume is intended to appeal to those interested in history archaeology social sciences and the environment

Chemical Warfare Agent Sea Dumping Off Australia Geoff Plunkett, 2003 Although the disposal of material in the sea is no very restricted historically the disposal of unwanted waste in the ocean has been a very common practice in many parts of the world Due to its immense size the ocean was thought to have an unlimited absorptive capacity with any dumped waste having only a very localised effect Moreover the material would be well away from any human activity It is important to know where any hazardous material may lie both to prevent human contact and to assess the possible ecological consequences
