## **Sea Power In The 1970s Papers:**

Sea Power in the 1970s George H. Quester, Cornell University. Program on Peace Studies, 1975      **Air University Library Index to Military Periodicals** ,1972      **American Sea Power in the Old World** William N Still, 2018-02-15 This classic study examines the deployment of U S naval vessels in European and Near Eastern waters from the end of the Civil War until the United States declared war in April 1917 Initially these ships were employed to visit various ports from the Baltic Sea to the eastern Mediterranean and Constantinople today Istanbul for the primary purpose of showing the flag From the 1890s on most of the need for the presence of the American warships occurred in the eastern Mediterranean and the Black Sea Unrest in the Ottoman Empire and particularly the Muslim hostility and threats to Armenians led to calls for protection This would continue into the years of World War I In 1905 the Navy Department ended the permanent stationing of a squadron in European waters From then until the U S declaration of war in 1917 individual ships detached units and special squadrons were at times deployed in European waters In 1908 the converted yacht Scorpion was sent as station ship stationnaire to Constantinople where she would remain operating in the eastern Mediterranean and Black Sea until 1928 Upon the outbreak of World War I President Woodrow Wilson ordered cruisers to northern European waters and the Mediterranean to protect American interests These warships however did more than protect American interests They would evacuate thousands of refugees American tourists Armenians Jews and Italians after Italy entered the conflict on the side of the Allies      **Sea Power and the Asia-Pacific** Geoffrey Till, Patrick Bratton, 2012-02-07 This volume examines the rise and fall of sea powers in the Asia Pacific region      **Freedom of the Seas and US Foreign Policy** Connor Donahue, 2024-04-05 This book critically analyzes US political military strategy by arguing that freedom of the seas discourse is fundamentally unfit for an era of maritime great power competition The work conducts a genealogical intellectual history of freedom of the seas discourse in US foreign policy to show how the concept has evolved over time to facilitate American control over the global ocean space It concludes that the contemporary discourse works to establish the high seas as an arena free from claims of sovereignty so that the United States as the presumed unrivaled naval power can intervene globally on behalf of its national interests However since sea control strategies depend on a preponderance of material force as the United States wanes in relative material capability it becomes less able to support political military strategies predicated on the assumption of global naval dominance The book provides a timely commentary on the current geopolitical competition between the United States and China and critiques the US approach toward China in the maritime domain in order to highlight potential avenues of foreign policy action that may enable the two countries to mitigate the risk of conflict This book will be of much interest to students of naval history maritime security US foreign policy and international relations      Solar Energy United States. Energy Research and Development Administration. Technical Information Center, 1976      **Sea Power and the Control of Trade** Nicholas Tracy, 2019-01-15 Charts the British government s changing perception of the utility of naval

control of trade between 1854 and the late 1960s This collection of departmental files and treaties reviews the changing perceptions in the British government of the utility of naval control of trade over the period from the outbreak of the Russian or Crimean war in 1854 to the United Nations mandated Beira patrol established in 1966 to stop the flow of oil to Southern Rhodesia The capacity of navies to influence world events through control of seaborne trade was profoundly affected by nineteenth century developments in economic theory commercial organization and naval technology Although the number of relevant documents from the nineteenth century are relatively few the apparatus for study of naval strategy was significantly improved by the formation of the Committee of Imperial Defence CID in 1904 Thereafter until the Second World War the question of belligerent rights at sea was under almost continuous scrutiny The naval wars with France had been fought with the old mercantilist strategic tools The resultant collateral damage to Britain had been a declaration of war by the United States in 1812 while Napoleon s Continental System had even more disastrous consequences for the French Empire From that time questions about belligerent rights were the most divisive issue in Anglo American relations and the degree of attention the British government had to devote to the legal restraints on naval strategy kept pace with the growing naval and economic potential of the United States the only country in a position to pose a serious threat to British sea power The focus of this collection is on the work during the years of peace in preparation for war marked by a series of milestones the need to find a modus vivendi with France on the eve of the Russian War the first effort at recodification of prize law in the Declaration of Paris of 1856 the need to deal with the consequences of the American Civil War the Declaration of London of 1909 the apparent effect of the use of economic controls to deny enemy access to supply on the outcome of the First World War the formation of the League of Nations in 1919 and the Kellogg Briand Pact of 1927 The First World War vastly enhanced the prestige of naval blockade but circumstances during the Second World War correspondingly deflated the value accorded to it Post Second World War the British government had to respond to the exercise of belligerent rights by other states on a number of occasions but in the nuclear age there was no longer any expectation that naval control of commerce could provide decisive protection of British interests In any event with the formation of the United Nations the concept of neutrality all but disappeared and resolutions of the Security Council became all the law of belligerency which was required

Friedman, 2017 This book is about the war gaming activities of the Naval War College NWC in the late summer and fall of 1946 in Newport Rhode Island and how the end of World War II and the beginning of the Cold War impacted the Naval War College in terms of changing its focus from Japan to the Soviet Union as the primary enemy in the Pacific Basin From preface      **Geological Survey Water-supply Paper**, 1974      **Wielding the Dagger** Mark D. Karau, 2003-10-30 In August 1914 Admiral Alfred von Tirpitz convinced the German armed forces to create a new unit called the MarineDivision Flandern to garrison the Belgian coastline and prepare naval bases in for the implementation of a naval guerrilla war against Great Britain The Germans called their strategy Kleinkrieg or little war and they intended to whittle away at British naval superiority by using their submarines and destroyers Later expanded into the MarineKorps the unit soon found itself in the middle of a land war as well What had been intended as a garrison unit found itself on the frontlines when the war stalemated The British had traditionally seen Belgium as a dagger pointed at the throat of England and the Royal Navy feared what use the Germans might make of the position The result was an active naval campaign in the English Channel Karau brings to light the contributions of the MarineKorps Flandern a force often neglected by historians He examines the role of the MarineKorps in both land and naval wars and reaffirms the increasingly important role played by aircraft in the Flanders theater If Belgium was a weapon pointed at the British throat were the Germans properly equipped to wield the dagger      The Maritime Dimension Ronald Barston, Patricia Birnie, 2024-05-15 For land locked and coastal states alike the maritime dimension of national interests has increased dramatically in importance in recent years Pressure on food and energy resources have coincided with an increase in the global population and insatiable demands for fish and minerals Maritime conflict remains an ever present possibility Originally published in 1980 this book brings together in a single volume expert contributions on the central issues and areas of concern The offshore exploration of oil and gas fisheries world shipping the exploitation of deep seabed resources marine pollution and contemporary maritime legal problems The book outlines the problems identifies conflicts and examines the variety of methods used by states to resolve them including national and international laws and organisations bilateral and multilateral diplomacy and the increasing use of regional bodies The Maritime Dimension will be of use to students and policy makers in international law environmental and energy studies and international relations      The U.S. Navy and the Rise of Great Power Competition James J. Wirtz, Jeffrey E. Kline, James A. Russell, 2023-12-22 This volume describes how technological and geo political trends are rapidly transforming maritime affairs A mix of original and previously published material this volume describes how the

21st century great power competition is changing the face of naval operations in general and U S Navy operations in the Western Pacific in particular The rise of an assertive China and its new anti access and area denial capabilities threaten the aircraft carrier based maritime dominance of the U S Navy Military and political trends in the Western Pacific and beyond suggest that the world is encountering a pivotal moment when existing weapons tactics and operations might be rendered obsolete by techno strategic change This volume considers these developments from three perspectives by describing 1 the techno strategic setting 2 the institutional constraints that impede the ability of the U S Navy to respond to these changes and 3 a new approach to naval force planning and strategy to cope with these developments The volume culminates in a discussion of sophisticated strategies and operational concepts that position the U S Navy and its maritime allies and partners to prevail in today s techno strategic churn This book will be of much interest to students of naval policy strategic studies Asia Pacific politics and International Relations
