“They Took to the Sea” : Jewish History and Culture in Maritime Perspective(s) Björn Siegel,Joachim Schlör,Kobi Cohen-Hattab,Franziska Weinmann,Dalia Wassner,Michael Studemund-Halévy, Frank Jacob,,Allison Schachter,Sebastian Schirrmeister,Caroline Jessen,Elias S. Jungheim,Saskia Fischer,Jessica Cooperman,Caroline Emig,Shai Ginsburg,2023-03-22 The sea and maritime spaces have long been neglected in the field of Jewish studies despite their relevance in the context of Jewish religious texts and historical narratives The

images of Noah's ark, King Solomon's maritime activities or the miracle of the parting of the Red Sea immediately come into mind however only illustrate a few aspects of Jewish maritime activities. Consequently the relations of Jews and the sea has to be seen in a much broader spatial and temporal framework in order to understand the overall importance of maritime spaces in Jewish history and culture. Almost sixty years after Samuel Tolkowsky's pivotal study on maritime Jewish history and culture and the publication of his book *They Took to the Sea* in 1964 this volume of PaRDeS seeks to follow these ideas, revisit Jewish history and culture from different maritime perspectives and shed new light on current research in the field which brings together Jewish and maritime studies. The articles in this volume therefore reflect a wide range of topics and illustrate how maritime perspectives can enrich our understanding of Jewish history and culture and its entanglement with the sea especially in modern times. They study different spaces and examine their embedded narratives and functions. They follow in one way or another the discussions which evolved in the last decades focused on the importance of spatial dimensions and opened up possibilities for studying the production and construction of spaces, their influences on cultural practices and ideas as well as structures and changes of social processes. By taking these debates into account the articles offer new insights into Jewish history and culture by taking us out to sea and inviting us to revisit Jewish history and culture from different maritime perspectives.

Social Inequality and Human Security Christian Ploberger, 2025-09-05 This book collates case studies of national and subnational efforts to alleviate inequality and implement development and security policy more effectively collaboratively and multidimensionally. While inequality is a fundamental developmental challenge and a global phenomenon responsibility largely falls to the state to address it. This book seeks to provide a specific framework to analyse these efforts at the national and sub national levels. It does so through the United Nations concept of Human Security whose five core principles provide a good means of addressing inequality's various facets. Each chapter opens by highlighting the specific aspect of human security that is being addressed. Specific issues covered in the volume include local economic development, maritime economies, fishing communities, governance and public administration. This book will be of keen interest to scholars of development studies, inequality especially social inequality and area studies.

Taking this standpoint the editor has explored the issues of maritime skills with critical gaps following a framework of research methodology. The issue of critical gaps in maritime skills is further exacerbated due to the impact on seafarers caused by changes in the ecosystem, status, relationship with stakeholders, technology, focus on renewable energy, anxiety levels and so forth. Furthermore, stakeholders can no longer ignore the fact that seafarers are leaving a seagoing career after working for only a few years. Therefore the editor has also explored the need to prepare seafarers for transition into maritime shore jobs to preserve their maritime skills within the
