Sears Roebucks Impact On Life:

American Jewish Life, 1920-1990 Jeffrey S. Gurock, 2013-10-23 This volume contains articles on Jewish life from 1920 to the present Its entries include studies of the economy and migration in postwar America the impact of Holocaust survivors on American Society and the reaction to gender stereotypes within American Culture

American Home Life, 1880-1930 Jessica H. Foy, 2024-07-31 In the pivotal decades around the turn of the century American domestic life underwent dramatic alteration From backstairs to front stairs spaces and the activities within them were radically affected by shifts in the larger social and material environments This volume while taking account of architecture and decoration moves us beyond the study of buildings to the study of behaviors particularly the behaviors of those who peopled the middle class single family detached American home between 1880 and 1930 The book s contributors study transformations in services such as home utilities of power heat light water and waste removal in servicing for example the impact of home appliances such as gas and electric ranges washing machines and refrigerators and in serving changes in domestic servants duties hours of work racial and ethnic backgrounds In blending intellectual and home history these essays both examine and exemplify the perennial American enthusiasm for as well as anxiety about the meaning of modernity

The Amazing Law of Influence Duncan, King, 2010-09-23 You have heard about it in Pay It Forward you ve heard about it in Six Degrees of Separation but no single author has given as much consideration to the laws of influence as King Duncan does here This reader friendly book looks at chaos theory how small changes can trigger monumental transformations The example of this theory most often cited is that of Edward Lorenz who discovered in the 1960s that the tiniest movement in the air in one part of the world can produce dramatic changes in weather patterns months later in another part of the world Thus a butterfly flapping its wings in Malibu might set into motion a series of events that could produce a monsoon months later in Malaysia The Law of Influence states that one life touches another and potentially both lives are changed through this change potentially the entire world is changed Even chance events a smile a word spoken at just the right moment or even people like John Howard who helped a young English journalist return home The young journalist was Winston Churchill and the rest is history More important than explaining what the law of influence is this book explains how individuals can use it to create a life worth living and to share the lessons to create families and communities that work together for the greater good Together people aware of and involved with their own influence on others have the potential to make amazing things happen King Duncan is a professional speaker and author of two other books Amazing Grace Humor to Heal Mind Soul and Body and The One Minute Motivator In 1993 he was the national winner of the International Platform Association s prestigious Speaker s Ladder Award He lives in Knoxville Tennessee where he owns and manages his communications company Seven Worlds Corporation

Vintage Marketing Differentiation Robert L. Williams, Jr., Helena A. Williams, 2017-03-23 This book analyzes the origins of marketing and branding strategies and the unique situations involving differentiation Photographs of actual materials that were created

and used in marketing campaigns between 1846 1946 are featured to bring to life these vintage innovations Examining how and why these classic strategies were devised and implemented provides insight on how the vintage strategies can continue to be used to position products services and experiences within current market situations Vintage Marketing Differentiation describes real life innovative outside the box solutions It explains a marketing differentiation process and emphasizes the critical nature of the perception of trends and timely action Profiles of over 30 companies and brands depict nearly 20 categories of the first marketing strategies ever to be used These powerful strategies ignited competitive advantages and help explain why most of these companies are still in business today

The Realities of 'Reality' - Part III: Impacts of Speed and Time Optimization on Reality Fritz Dufour, MBA, DESS, 2019-08-28 The main theme of this book is the impacts of speed and time optimization on reality or more precisely on our modern society But first it sets the background by exploring the physics behind the concepts of speed and time how they came about how we became aware of them and how did the new world of speed emerge and why does it seem to be inescapable It explores the speed of light and the speed of sound by linking them to our environment It introduces the notion of Arrow of time or entropy which grows from the past to the present is expected to keep growing in the future and hypothesizes that this is perhaps why our craving for speed and time optimization is here to stay with no end in sight An important point discussed is that because of memories and experiences people may choose to live either in the past present or future which leads to the notions of presentism and eternalism The book argues that while for presentists only the present is real for eternalists both the past present and future are equally real The book makes the case about speed and time optimization as a legacy of modernity by laying out the differences between modernism modernization and modernity itself It shows how modernity is all about the now or the present rather than the past and how as such it is all about the new So then the changes that are now happening in our modern world can be traced back to a segment of history that dates back to the beginning of modernity that is which began with the Protestant Reformation and is now rapidly approaching closure in the world of today's extreme finance It argues about the technological implications of speed and time in the 21st century It shows how technology has become an integral part of human existence and that it is inconceivable one can even think of escaping it This Part III of the series shows the link between high speed trading and faster connectivity and faster computers It shows how thanks to the Internet information became freely accessible and is spreading faster and faster It shows how supercomputers not only allow people to address the biggest and most complex problems they also allow people to solve problems faster even those that could fit on servers or clusters of PCs This rapid time to solution is critical in some aspects of emergency preparedness and national defense where the solutions produced are only valuable if they can be acted on in a timely manner Finally the social and psychological implications of speed and time in the 21st century are also addressed by considering the upside and the downside of moving fast meaning leading a fast paced life The argument presented in the book is based on the analysis and the importance of

stress in our daily lives and also explains the notion of chronobiology Our biological clocks drive our circadian rhythms An interesting point is that blind people may not perceive time the same way as the non blind Furthermore the book shows how we perceive time differently as we age compared to when we were young It also makes the case for the perception of time in dreams and in real life Speed and time optimization may be deceiving according to this Part III of the series This can be proven by questions such as 1 Is going over the speed limit really worth it and 2 Is the saying Slow down to go faster a paradox
