**Transfigured Kingdom** Ernest A. Zitser, 2018-09-05 In this richly comparative analysis of late Muscovite and early Imperial court culture Ernest A. Zitser provides a corrective to the secular bias of the scholarly literature about the reforms of Peter the Great. Zitser demonstrates that the tsar's supposedly secularizing reforms rested on a fundamentally religious conception of his personal political mission. In particular, Zitser shows that the carnivalesque and often obscene activities of the so-called Most Comical All Drunken Council served as a type of Baroque political sacrament, a monarchical rite of power that elevated the tsar's person above normal men, guaranteed his prerogative over church affairs, and bound the participants into a community of believers in his God-given authority and charisma. The author suggests that by implicating Peter's royal priesthood in taboo-breaking libertine ceremonies, the organizers of such sacred parodies inducted select members of the Russian political elite into a new system of distinctions between nobility and baseness, sacrality and profanity, tradition and modernity. Tracing the ways in which the tsar and his courtiers appropriated aspects of Muscovite and European traditions to suit their needs and aspirations, *The Transfigured Kingdom* offers one of the first discussions of the gendered nature of political power at the court of Russia's self-proclaimed Father of the Fatherland and reveals the role of symbolism, myth, and ritual in shaping political order in early modern Europe.      *The Photographic News* Sir William Crookes, George Wharton Simpson, 1907

*Photography*, 1890      **The Tourism Imaginary and Pilgrimages to the Edges of the World** Nieves Herrero, Sharon

R. Roseman, 2015-06-01 This book examines how the growth of tourism in locations that have historically been considered geographically remote plays a major role in the consolidation and transformation of often longstanding and powerful cultural imaginaries about the edges of the world. The contributors examine the attraction of the sublime remoteness, continental border points, and the dangers of the sea in Finisterre or Fisterra in Galicia, Spain; Finistère in Brittany, France; Land's End, Cornwall, England; Lough Derg, Ireland; Nordkapp or North Cape, Norway; Cape Spear, Newfoundland, Canada; and Tierra del Fuego, Argentina. While those travelling to these locations can be seen to be conducting some form of religious or secular pilgrimage, those who live in them have long contended with the implications of economic and political marginalization within global political economies.      *Catalog of Copyright Entries* Library of Congress. **Documenting Impacts on a Changing Planet** Abed El Rahman Hassoun, Adrienne J. Sutton, Sam Dupont, Jose Martin Hernandez-Ayon, Xianghui Guo, 2025-04-15 Ocean acidification is a global phenomenon with local effects. Marine ecosystems are facing multiple stressors leading to significant changes. Time series observations are the basis to understand these

changes and distinguishing between natural and anthropogenic variability of physical chemical and biological components of marine environments Moreover field monitoring is often neglected as a tool to document the responses of marine organisms and key habitats to ocean acidification Time series observations of ocean acidification are thus critical to understanding the current threats that the ocean s ecosystems are witnessing and efficiently developing and implementing adaptation and mitigation solutions Time series dedicated to observing ocean acidification other stressors as well as biological parameters are the baseline for long term assessment of the ocean s health and for evaluating the efficiency of local and global actions toward achieving climate targets Therefore the goal of this Research Topic is to highlight the latest research efforts conducted to document ocean acidification patterns and trends and their consequences on marine life In this issue we will focus on new and old time series stations efforts to bridge physical chemical and biological observations and their application for modeling and future projections

**Defying Ocean's End** Linda Glover, Sylvia Earle, 2012-09-26

If humankind were given a mandate to do everything in our power to undermine the earth s functioning we could hardly do a better job than we have in the past thirty years on the world s oceans both by what we are putting into it millions of tons of trash and toxic materials and by what we are taking out of it millions of tons of wildlife Yet only recently have we begun to understand the scale of those impacts Defying Ocean s End is the result of an unprecedented effort among the world s largest environmental organizations scientists the business community media and international governments to address these marine issues In June 2003 in the culmination of a year long effort they met specifically to develop a comprehensive

and achievable agenda to reverse the decline in health of the world's oceans. As conservation organizations begin to expand their focus from land issues to include a major focus on preservation of the sea, it is increasingly apparent that we have to approach marine conservation differently and at much larger scale than we have to date. What's also clear is the magnitude and immediacy of the growing ocean concerns are such that no one organization can handle the job alone. Defying Ocean's End is a bold step in bringing the resources needed to bear on this vast problem before it is too late. It offers a broad strategy, a practical plan with priorities and costs aimed at mobilizing the forces needed to bring about a sea change of favorable attitudes, actions, and outcomes for the oceans and for all of us.

Maps and Mapping in Children's Literature Nina

Goga, Bettina Kümmerling-Meibauer, 2017-08-15. Maps and Mapping in Children's Literature is the first comprehensive study that investigates the representation of maps in children's books as well as the impact of mapping on the depiction of landscapes, seascapes, and cityscapes in children's literature. The chapters in this volume pursue a comparative approach as they represent a wide spectrum of diverse genres and national children's literatures by examining a wealth of children's books from Canada, Denmark, Germany, Italy, Norway, Russia, the United Kingdom, and the USA. The theoretical and methodological approaches range from literary studies, developmental psychology, maps and geography, literacy, ecocriticism, historical contextualization with both new historicist and political historical leanings, and intermediality to materialist cartographies, cultural studies, island studies, and genre studies. By this, this volume aims at embedding children's literature in a broader field of literary and cultural studies, thus situating children's literature research within a general context of literary theory.
