

MARKETS AND STATES IN TROPICAL AFRICA

The Political Basis of Agricultural Policies

WITH A NEW PREFACE

"Robert Bates's book manages the difficult task of speaking to the specialist and nonspecialist alike. It explains the historical, political, and economic roots of Africa's challenges. Best of all, it gives context to why easy prescriptions haven't worked in the past, and some hope for what might work in the future."

Moreover development economics itself was not always fashionable and the broader discipline of economics has had its ups and downs and has been undergoing a major identity crisis because it failed to predict the Great Recession Times have changed many leading researchers including a few Nobel laureates have taken the subject of Africa and economics seriously enough to devote their expertise and creativity to it They have been amply rewarded the richness complexities and subtleties of African societies civilizations rationalities and ways of living have helped renew the humanities and the social sciences and economics in particular to the point that the continent has become the next major intellectual frontier to researchers from around the world In collecting some of the most authoritative statements about the science of economics and its concepts in the African context this handbook the first of two volumes opens up the diverse acuity of commentary on exciting topics and in the process challenges and stimulates the quest for knowledge Wide ranging in its scope themes language and approaches this volume explores examines and assesses economic thinking on Africa and Africa's contribution to the discipline The editors bring a set of powerful resources to this endeavor most notably a team of internationally renowned economists whose diverse viewpoints are complemented by the perspectives of philosophers political scientists and anthropologists

African Successes, Volume I Sebastian Edwards, Simon Johnson, David N. Weil, 2016-09-23 Studies of African economic development frequently focus on the daunting challenges the continent faces From recurrent crises to ethnic conflicts and long standing corruption a raft of deep rooted problems has led many to regard the continent as facing many hurdles to raise living standards Yet Africa has made considerable progress in the past decade with a GDP growth rate exceeding five percent in some regions The African Successes series looks at recent improvements in living standards and other measures of development in many African countries with an eye toward identifying what shaped them and the extent to which lessons learned are transferable and can guide policy in other nations and at the international level The first volume in the series African Successes Governments and Institutions considers the role governments and institutions have played in recent developments and identifies the factors that enable economists to predict the way institutions will function

Economic Growth and Development in Africa Horman Chitonge, 2015-01-09 In recent years Africa has undergone the longest period of sustained economic growth in the continent's history drawing the attention of the international media and academics alike This book analyses the Africa Rising narrative from multidisciplinary perspectives offering a critical assessment of the explanations given for the poor economic growth and development performance in Africa prior to the millennium and the dramatic shift towards the new Africa Bringing in perspectives from African intellectuals and scholars many of whom have previously been overlooked in this debate the book examines the construction of Africa's economic growth and development portraits over the years It looks at two institutions that play a vital role in African development providing a detailed explanation of how the World Bank and the IMF have interpreted and dealt with the African challenges and experiences The insightful analysis reveals that if Africa is rising only 20-30 per cent of Africans are aboard the rising ship and the main

challenge facing the continent today is to bring on board the majority of Africans who have been excluded from growth This book makes the complex and sometimes confusing debates on Africa's economic growth experience more accessible to a wide range of readers interested in the Africa story It is essential reading for students and researchers in African Studies and will be of great interest to scholars in Development Studies Political Economy and Development Economics

The Entrepreneurial State in China Jane Duckett,2006-10-19 Jane Duckett describes in detail new state business activities in China and explains why they have appeared Using research on the northern city of Tianjin during the 1990s she argues that individual departments within the Chinese state are involved in the market economy through the establishment of their own businesses The book demonstrates that many of these businesses are genuinely entrepreneurial in the sense of profit seeking risk taking and productive rather than rent seeking speculative or profiteering This entrepreneurialism is an important new dimension of state activity in China with implications for our understanding of the Chinese state This book develops an alternative to the local government state model and emphasises instead the State s dynamic entrepreneurial role in the process of economic reform
