Siddharaju, Latha G & Mrs. Lavanya N Gowda, 2025-08-30 Marketing is a dynamic business function that involves identifying, anticipating, and satisfying customer needs profitably. It plays a crucial role in connecting producers with consumers, ensuring that goods and services reach the right audience at the right time and place. At its core, marketing is not just about selling products but about creating value and building lasting relationships with customers. The process of marketing involves a series of activities such as market research, product development, pricing, promotion, and distribution. Through these activities, businesses understand consumer behavior and tailor their offerings to meet market demands. This customer-centric approach helps companies gain a competitive edge and increase customer loyalty. Modern marketing goes beyond traditional boundaries, incorporating digital tools and platforms such as social media, e-commerce, and data analytics. This shift has made marketing more interactive and personalized, enabling brands to engage with customers in real time. In today's globalized economy, marketing also helps companies expand into new markets and build a strong brand presence. **Modern**
