Moving Image Theory Ecological Considerations looks at film through its communication properties rather than its social or political implications Drawing on the tenets of James J Gibson's ecological theory of visual perception the fifteen essays and forty one illustrations gathered here by editors Joseph D Anderson and Barbara Fisher Anderson offer a new understanding of how moving images are seen and understood Focusing on a more straightforward perception of the world and cinema in an attempt to move film theory closer to reality **Moving Image Theory** proposes that we should first understand how cinema communicates information about the representation of the three dimensional world through properties of image and sound

Narration and Spectatorship in Moving Images Barbara Fisher Anderson, Joseph D. Anderson, 2009-03-26

Philosophers and students of the arts have wondered since the time of Aristotle about the nature of aesthetic experience and how this experience can seemingly be evoked by works of art For more than a century producers and directors of motion pictures have made decisions about how to craft them based upon assumptions about complex stylistic devices and the effects such patterns of organization have on viewers Over the past few years film scholars have made considerable progress in analyzing the manifold connections that exist between stylistic patterns and aesthetic effects for moving images of all kinds In doing so they have increasingly drawn upon insights and methodologies derived from psychology The international conference from which this volume takes its contributions and its title was organized to encourage the seeking of descriptive models pertaining to those elements of filmic construction that account for specific aesthetic experience The focus of the current selection of twenty essays is therefore on the elements of filmic narration and their presumed aesthetic effects The editors are pleased to strengthen the link between film studies and psychology in the interest of gaining tangible insight into the ancient mystery of the link between art and aesthetic experience

Cinematic Narration and its Psychological Impact Peter Wuss, 2009-03-26 Film provides experience potential Contemporary cognitive psychology gives the opportunity to define this impact on the film spectators mind in regard to different aspects of cognition imagination and emotion Proceeding from these positions this book considers a number of practical issues of cinematic narration with which filmmakers theorists and cineastes are frequently confronted What is storytelling and how may we objectify the regularities to be found at work in different modes of narration in the fiction film among them structural principles of art cinema which are often experienced on a level beneath conscious reception What is the role of the element of conflict in the process of narration and what are the effects that the representation of conflict situations on the screen has on the viewers emotions How can we define cinematic tension and also suspense and how does each influence the disposition of the audience What constitutes a reality effect in fiction films and how can it vary in different modes of storytelling How are a given protagonists dreams fantasies and play behaviour integrated both into the course of narrative events and into the development of the spectator s imageries and ideas And finally How do film genres work on a psychological level Providing a theoretical framework for further empirical research the book outlines a differentiated model for analysing key devices of cinematic narration in view of their impact on the spectators mind

Relational Designs in Literature and the Arts ,2012-01-01 This collection focuses on texts that address the other arts from painting to photography from the stage to the screen and from avant garde experiments to mass culture Despite their diversity of object and approach the essays in Relational Designs coalesce around the argument that representations are defined by relations and dynamics rather than intrinsic features This rationale is supported by the discourses and methodologies favoured by the book s contributors their approaches offer a cross section of the intellectual and critical environment of our time The book illustrates the critical possibilities that derive from the broad range of modes of inquiry poststructuralist criticism gender studies postcolonial studies new historicism that the book s four sections bring to bear on a wealth of intermedial practices But Relational Designs compounds such critical emphases with the voice of the practitioner the book is rounded off by an interview in which a contemporary novelist discusses her attraction to the other arts in terms that extend the book s insights and bridge the gap between academic discourse and artistic practice

The Extended Theory of Cognitive Creativity Antonino Pennisi,Alessandra Falzone,2019-09-25 This edited volume focuses on the hypothesis that performativity is not a property confined to certain specific human skills or to certain specific acts of language nor an accidental enrichment due to creative intelligence Instead the executive and motor component of cognitive behavior should be considered an intrinsic part of the physiological functioning of the mind and as endowed with self generative power Performativity in this theoretical context can be defined as a constituent component of cognitive processes The material action allowing us to interact with reality is both the means by which the subject knows the surrounding world and one through which he experiments with the possibilities of his body This proposal is rooted in models now widely accepted in the philosophy of mind and language in fact it focuses on a space of awareness that is not in the individual or outside it but is determined by the species specific ways in which the body acts on the world This theoretical hypothesis will be pursued through the latest interdisciplinary methodology typical of cognitive science that coincide with the five sections in which the book is organized Embodied enactivist philosophical approaches Aesthetics approaches Naturalistic and evolutionary approaches Neuroscientific approaches Linguistics approaches This book is intended for linguists philosophers psychologists cognitive scientists scholars of art and aesthetics performing artists researchers in embodied cognition especially enactivists and students of the extended mind
