Persons and their Minds Svend Brinkmann, 2017-07-06 Today s approaches to the study of the human mind are divided into seemingly opposed camps On one side we find the neurosciences with their more or less reductionist research programs and on the other side we find the cultural and discursive approaches with their frequent neglect of the material sides of human life *Persons and their Minds* seeks to develop an integrative theory of the mind with room for both brain and culture Brinkmann s remarkable and thought provoking work is one of the first books to integrate brain research with phenomenology social practice studies and actor network theory all of which are held together by the concept of the person Brinkmann s new and informative approach to the person the mind and mental disorder give this book a wide scope The

author uses Rom Harr s hybrid psychology as a meta theoretical starting point and expands this significantly by including four sources of mediators the brain the body social practices and technological artefacts The author draws on findings from cultural psychology and argues that the mind is normative in the sense that mental processes do not simply happen but can be done more or less well and thus are subject to normative appraisal In addition to informative theoretical discussions this book includes a number of detailed case studies including a study of ADHD from the integrated perspective Consequently the book will be of great interest to academics and researchers in the fields of psychology philosophy sociology and psychiatry

note who has been considered to be in a position to provide information on marriage and family life Included in the eclectic collection of texts we reviewed were ministers whose focus was on spirituality doctors who emphasized medical aspects of child and adult health and public health professionals and home economists concerned with fighting disease who emphasized cleanliness order fighting germs and eliminating rodents and insects There are also philosophers who drew from ancient texts when discussing family life and a count who assembled a group of German intellectual elites to address various topics An insightful essay of this type is by Marta Karlweis 1926 in which she notes There is no other fetish that society holds to so firmly as the conception woman with all its usual associations of infantilism and dependence The child requires protection is a minor and consequently a serf but above all it possesses no spiritual existence Neither doctorates or other distinctions nor the right to vote have as yet been able to dispel this sweet idea of the childishness of woman which man cherishes p
