**A Conceptual Approach to Moving and Learning** David L. Gallahue, Peter H. Werner, George C. Luedke, 1975-01-01 A framework for teaching physical education with the aim of developing movement abilities along with cognitive abilities

Movement and Learning in the Early Years Christine Macintyre, Kim McVitty, 2004-05-21 This book achieves what it sets out to do provide clear guidance to parents and professionals on key aspects of movement in the early years The book however does more than that it emphasises that movement in the early years is not the territory of experts but through the use of this book the assessment of movement development of activities and programmes are within the range of all class teachers and parents I strongly recommend that this book is available in every school Educational Review This book provides a good overview of issues in movement and development and learning and will stimulate the interested reader to explore this topic further Early Years This book will be a useful addition to any primary staff room bookshelf It is a practical book based on sound theory It will provide ideas for the non specialist teacher and for parents anxious to help The suggestions will provide a good framework for the staged assessment and support for young children for whom there is a cause for concern Support for Learning For anyone involved in the development of any young child this should be essential reading The book is very informative and readable by parents teachers and students and is simply illustrated with case studies Dyslexia Contact As a behaviour advisory teacher I will certainly be influenced by reading this and I know our local occupational therapists would be overjoyed if she knew all teachers read books like this Special Children It is always good to be able to welcome a book on such a key factor as movement in early childhood development and this text has been written to support parents and practitioners who wish to understand how movement contributes to all aspects of learning intellectual social and emotional as well as physical Marian Whitehead Nursery World This book is an excellent introduction for anybody trying to understand how movement affects child development It clearly explains the importance movement has on how young children learn and feel The information and insights in this book can be found elsewhere but I have yet to find such breadth and depth of information on supporting children with movement difficulties as clearly written and accessible as this book Spare Chair The book is very informative and readable by parents teachers and students and amply illustrated with case studies Judith Stansfield SEN ICT Consultant Movement is a key factor in young children s development and it can affect how they learn and how they feel Do you work with young children who have difficulties in this area This book shows you how to observe a child as they move to allow for early identification of any problem and then tells you how to help Dyspraxia DCD is on the increase in young children and less confident and easy movement can play a part in other specific learning difficulties such as dyslexia attention deficit disorder ADD and with hyperactivity ADHD Included is advice on observing analyzing and assessing movement development building confidence helping with handwriting supporting mathematical development Why not ask the child to pop bubble paper as one way of promoting finger awareness Carefully taught activities can be easy to

plan and fun to carry out and there are lots of suggested activities set out in the book Early years practitioners in nurseries schools playgroups and EYDCPs will find this book clear and useful it also offers advice to parents Christine Macintyre was formerly Senior Lecturer at Edinburgh University and is now a freelance consultant Kim McVitty is a nursery school teacher

**Theory and Research in Learning Disabilities** J.P. Das, 2013-11-11 Although a number of books have appeared on learning disabilities we feel that the present book has two distinct features which are not found in most others It is multidisciplinary and it combines theory with practice A group of researchers from the disciplines of Psychology including medical psychology and information processing Reading Special Education and Physical Education interacted with each other before and after their presentations in a conference November 1980 at the University of Alberta Edmonton Canada and then wrote their chapters for this book We hope that their chapters were enriched by the discussions and arguments which happened in formal and informal settings during the authors stay in Edmonton Dr Leong could not attend the conference but was asked to write the introductory chapter for the book The contributors to this volume have been involved with basic research as well as with clinical and educational research in learning disabilities Some of them have a theoretical rather than a practical interest However a serious interest in a handicapping condition perhaps compels one to consider its amelioration no matter how pure is the researcher It is because of such a feeling that those who do basic research have suggested procedures for applying their findings The result is a balanced product entailing theory and practice

**African Social Movement Learning** Jonathan Langdon, 2020-02-03 How social movements learn in struggle produce knowledge and provoke public paradigm shifts have become an important focus of critical adult education in our contemporary turbulent times And yet African social movements and their learning are largely absent from this literature This work therefore provides a rare and much needed African contribution to this field African Social Movement Learning The Case of the Ada Songor Salt Movement speaks to this gap in the literature laying out an entry point to an African centered account of learning in struggle on the continent However this entry point quickly turns to an in depth sharing of one particular case of African social movement learning Based on 9 years of research with the Ada Songor salt movement in Ghana the book provides a detailed account of learning through defending communal access to West Africa's largest salt yielding lagoon in the face of local national and global efforts to expropriate this resource The book shares the knowledge

production of the movement as well as the ways in which the movement has restoried its struggle to meet new challenges  
Songs tapestries demonstrations manifestoes popular education approaches and book production all feature in these efforts
