In the early twentieth century a group of writers banded together in Moscow to create purely original modes of expression These avant garde artists known as the Futurists distinguished themselves by mastering the art of the scandal and making shocking denunciations of beloved icons With publications such as A Slap in the Face of Public Taste they suggested that Aleksandr Pushkin the founder of Russian literature be tossed off the side of their steamship of modernity Through systematic and detailed readings of Futurist texts James Rann offers the first book length study of the tensions between the outspoken literary group and the great national poet He observes how those in the movement engaged with and invented a new Pushkin who by turns became a founding father to rebel against a source of inspiration to draw from a prophet foreseeing the future and a monument to revive Rann's analysis contributes to the understanding of both the Futurists and Pushkin's complex legacy The Unlikely Futurist will appeal broadly to scholars of Slavic studies especially those interested in literature and modernism **The Creative Outlet Method** Joshua Levy, 2022-08-26 A practical guide for parents and

The Statues that Walked Terry Hunt, Carl Lipo, 2011-06-21 The monumental statues of Easter Island both so magisterial and so forlorn gazing out in their imposing rows over the island s barren landscape have been the source of great mystery ever since the island was first discovered by Europeans on Easter Sunday 1722 How could the ancient people who inhabited this tiny speck of land the most remote in the vast expanse of the Pacific islands have built such monumental works No such astonishing numbers of massive statues are found anywhere else in the Pacific How could the islanders possibly have moved so many multi ton monoliths from the quarry inland where they were carved to their posts along the coastline And most intriguing and vexing of all if the island once boasted a culture developed and sophisticated enough to have produced such marvelous edifices what happened to that culture Why was the island the Europeans encountered a sparsely populated wasteland The prevailing accounts of the island s history tell a story of self inflicted devastation a glaring case of eco suicide The island was dominated by a powerful chiefdom that promulgated a cult of statue making exercising a ruthless hold on the island s people and rapaciously destroying the environment cutting down a lush palm forest that once blanketed the island in order to construct contraptions for moving more and more statues which grew larger and larger As the population swelled in order to sustain the statue cult growing well beyond the island s agricultural capacity a vicious cycle of warfare broke out between opposing groups and the culture ultimately suffered a dramatic collapse When Terry Hunt and Carl Lipo began carrying out archaeological studies on the island in 2001 they fully expected to find evidence supporting these accounts Instead revelation after revelation uncovered a very different truth In this lively and fascinating account of Hunt and Lipo s definitive solution to the mystery of what really happened on the island they introduce the striking series of archaeological discoveries they made and the path breaking findings of others which led them to compelling new answers to the most perplexing questions about the history of the island Far from irresponsible environmental destroyers they show the Easter Islanders were remarkably inventive environmental stewards devising ingenious methods to enhance the island s agricultural capacity They did not devastate the palm forest and the culture did not descend into brutal violence Perhaps most surprising of all the making and moving of their enormous statutes did not require a bloated population or tax their precious resources their statue building was actually integral to their ability to

achieve a delicate balance of sustainability The Easter Islanders it turns out offer us an impressive record of masterful environmental management rich with lessons for confronting the daunting environmental challenges of our own time Shattering the conventional wisdom Hunt and Lipo's ironclad case for a radically different understanding of the story of this most mysterious place is scientific discovery at its very best

**The Restoration of the Roman Forum in Late Antiquity** Gregor Kalas, 2015-04-15 In The Restoration of the Roman Forum in Late Antiquity Gregor Kalas examines architectural conservation during late antiquity period at Rome's most important civic center the Roman Forum During the fourth and fifth centuries CE when emperors shifted their residences to alternate capitals and Christian practices overtook traditional beliefs elite citizens targeted restoration campaigns so as to infuse these initiatives with political meaning Since construction of new buildings was a right reserved for the emperor Rome's upper echelon funded the upkeep of buildings together with sculptural displays to gain public status Restorers linked themselves to the past through the fragmentary reuse of building materials and as Kalas explores proclaimed their importance through prominently inscribed statues and monuments whose placement within the existing cityscape allowed patrons and honorees to connect themselves to the celebrated history of Rome Building on art historical studies of spolia and exploring the Forum over an extended period of time Kalas demonstrates the mutability of civic environments The Restoration of the Roman Forum in Late Antiquity maps the evolution of the Forum away from singular projects composed of new materials toward an accretive and holistic design sensibility Overturning notions of late antiquity as one of decline Kalas demonstrates how perpetual reuse and restoration drew on Rome's venerable past to proclaim a bright future
