The Metahistory of Western Knowledge in the Modern Era Mark E. Blum, 2021-02-04 The book is a study of the evolving history of knowledge in the arts and sciences in the modern era from 1648 through the present Modernism is treated as an epoch with evolving disciplines whose articulated problems of a time and the inquiry methods to address them develop in a coordinated manner given a mutual awareness When one organizes the development of knowledge over periods of years and

gives it an appellation such as Modernism the organization of facts is guided by concepts and values discerned throughout these periods These facts of knowledge development share sufficient understandings to be called an era or an epoch or other terms that insist on the shared aspects of those years One can call such an effort a metahistory in that what is tracked is not merely a knowledge that is political economic ideological sociological or scientific but an overview that tracks the respective conceptual developments of the fields in how they have changed and augmented their problem formulations inquiry methods and explanatory conceptions over time
