En los últimos años la aparición de nuevas tecnologías de difusión está alterando el paradigma de transmisión y recepción de los medios tradicionales. Alrededor de la radio y en conexión con la distribución de contenidos sonoros surge el podcasting como un nuevo concepto de difusión de contenidos bajo demanda en Internet. En estas páginas se articula un discurso en torno a la tecnología, el consumo y de qué manera le afecta la legislación actual y su relación con la empresa radiofónica y el desarrollo de nuevas formas de negocio que se están generando alrededor del podcasting y de otras formas de distribuir contenidos de audio en la Red. Partiendo de un marco en el que se realiza una foto de las nuevas formas de distribuir y consumir contenidos sonoros definiremos tecnológicamente e históricamente el podcasting como concepto de referencia para ir poco a poco introduciéndolos en la manera en que está transformando el paradigma normal de emisión de contenidos. Empresa como emisor, distribuidor y usuario como oyente creador son reubicados en este nuevo panorama a través de diferentes puntos que nos ayudan a entender los cambios producidos. A partir de aquí iniciamos un análisis en profundidad de diferentes emisores de contenidos nacionales e internacionales en situaciones que son desarrolladas a través de casos concretos. El desarrollo de estos casos está ilustrado con una observación cualitativa completada con algunas conversaciones con directivos responsables de este tipo de servicios.
