guests who slowly drift in to a service where the pastor's only role is to keep his mouth shut and let the music play open the lid on his dad's own philosophy. In a tender moment with the friends, ex-lovers and colleagues of the late Charley Lamb raising a drink and sharing memories, Adam experiences the peeling back of accumulated years as the evening wore on. All these people around the table, though at least a half a century old except Barbara Chardon and myself, started looking much younger. I began seeing their faces as if they were the ages they were when all these things happened. Lou Lou was seventeen, Isabella was twenty-five, Pittet and Danny Dapper were cruising through their forties and fifties. And I was seeing my father through the years after he moved to Switzerland and made a life for himself both before and after he made me. But the life-changing surprise for him isn't his dad's colourful past or the momentary shift in time and space. It's connected to the hand that gently touches his elbow and escorts him to the cemetery as the moon hangs like a streetlamp over the Alps.

The Speed of Sound Thomas Dolby, 2016-10-11. The remarkable story of rising to the top of the music charts, a second act as a tech pioneer and the sustaining power of creativity and art. Thomas Dolby's hit songs 'She Blinded Me with Science' and 'Hyperactive' catapulted him to international fame in the early 80s. A pioneer of New Wave and Electronica, Thomas combined a love for invention with a passion for music, and the result was a new sound that defined an era of revolutionary music. But as record company politics overshadow the joy of performing, Thomas finds a surprising second act. Starting out in a rat-infested London, he sits a teenage Thomas Dolby stacks boxes by day at the grocery and tinkers with a homemade synthesizer at night while catching the Police at a local dive bar, swinging by the pub to see the unknown Elvis Costello and starting the weekend with a Clash show at a small night club. London on the eve of the 1980s is a hotbed for music and culture, and a new sound is beginning to take shape, merging technology with the musical energy of punk rock. Thomas plays keyboards in other bands, shows, and with a bit of luck, finds his own style, quickly establishing himself on the scene and recording break-out hits that take radio, MTV, and dance clubs by storm. The world is now his oyster, and sold-out arenas, world tours, even a friendship with Michael Jackson, become the fabric of his life. But as the record industry flounders and disillusionment sets in, Thomas turns his attention to Hollywood. Scoring films and computer games eventually leads him to Silicon Valley and a software startup that turns up the volume on the digital music revolution. His company barely survives the dotcom bubble, but finally, even the mavericks at Apple, Microsoft, Netscape, and Nokia see the light. By 2005, two-thirds of the world's mobile phones embed his Beatnik software. Life at the zenith of a tech empire proves to be just as full of big personalities, battling egos, and roller coaster success as his days spent at the top of the charts. **THE SPEED OF SOUND** is the story of an extraordinary man living an extraordinary life, a single-handed quest to make peace between art and the digital world.
