**The A to Z of Australia** James C. Docherty,2010-04-01 The last continent to be claimed by Europeans Australia began to be settled by the British in 1788 in the form of a jail for its convicts While British culture has had the largest influence on the country and its presence can be seen everywhere the British were not Australia s original populace The first inhabitants of Australia the Aborigines are believed to have migrated from Southeast Asia into northern Australia as early as 60 000 years ago This distinctive blend of vastly different cultures contributed to the ease with which Australia has become one of the world s most successful immigrant nations The A to Z of Australia relates the history of this unique and beautiful land which is home to an amazing range of flora and fauna a climate that ranges from tropical forests to arid deserts and the largest single collection of coral reefs and islands in the world Through a detailed chronology an introduction appendixes a bibliography and cross referenced dictionary entries on some of the more significant persons places and events institutions and organizations and political economic social cultural and religious facets author James Docherty provides a much needed single volume reference on Australia from its most unpromising of beginnings as a British jail to the liberal tolerant democracy it is today      **The Bone Readers** Claudio Tuniz,Richard Gillespie,Cheryl Jones,2016-06-16 The Bone Readers

are a dedicated group of scholars who study the earliest human remains their chemistry and DNA their extinct floral and faunal contemporaries and the geologic layers in which they were found Their research leads them to theories about modern human origins that continually challenge conventional wisdom and cherished beliefs about Eve Neanderthals hobbits and the Bering Straits among others Two leading Bone Readers and a science writer have penned a literate authoritative summary of the current questions and the minefield of academic politics that surround it Ideal for students in human origins or biological anthropology courses and a delightful read      *Working as Indigenous Archaeologists* George Nicholas,Joe Watkins,2024-09-30 Working as Indigenous Archaeologists explores the often contentious relationship between Indigenous and other formerly colonized peoples and Archaeology through their own voices Over the past 35 plus years the once novel

field of Indigenous Archaeology has become a relatively familiar part of the archaeological landscape. It has been celebrated, criticized and analyzed as to its practical and theoretical applications and its political nature. No less important are the life stories of its Indigenous practitioners. What has brought some of them to become practicing archaeologists or heritage managers? What challenges have they faced from both inside and outside their communities? And why haven't more pursued Archaeology as a vocation or avocation? This volume is a collection of 60 autobiographical chapters by Indigenous archaeologists and heritage specialists from around the world: some community based, some academic, some in other realms who are working to connect past and present in meaningful and especially personal ways. As Archaeology continues to evolve, there remain strong tensions between an objective, science-oriented, evidentiary-based approach to knowing the past and a more subjective, relational, humanistic approach informed by local values, traditional knowledge, and holistic perspective. While there are no maps for these new territories, hearing directly from those Indigenous individuals who have pursued Archaeology reveals the pathways taken. Those stories will provide inspiration and confidence for those curious about what lies ahead. This is an important volume for anyone interested in the present state and future of the archaeological discipline.

*Cultural Heritage Management in China* Hilary Du Cros, Yok-shiu F. Lee, 2007-03-27. This innovative study presents a thematic examination of the development of cultural heritage management (CHM) in an Asian context, offering valuable insights into Asian culture and society.

*The History of Archaeology* Paul Bahn, 2014-01-10. The History of Archaeology: An Introduction provides global coverage with chapters devoted to particular regions of the world. The regional approach allows readers to understand the similarities and differences in the history of and approach to archaeology in various parts of the world. Each chapter is written by a specialist scholar with experience of the region concerned. Thus the book focuses on the earliest beginnings of archaeology in different parts of the world and how it developed from being a pastime for antiquarians and collectors to a serious attempt to obtain information about past societies. Woven into the text are various boxes that explore key archaeologists, sites, and important discoveries in the history of archaeology, enriching the story of the discipline's development. With such far-ranging coverage, including an exploration of the little-covered development of Russian and Chinese archaeology, *The History of Archaeology* is the perfect introduction to the history of archaeology for the interested reader and student alike.

*Bridging the Divide* Caroline Phillips, Harry Allen, 2016-09-16. The collected essays in this volume address contemporary issues regarding the relationship between Indigenous groups and archaeologists, including the challenges of dialogue, colonialism, the difficulties of working within legislative and institutional frameworks, and NAGPRA and similar legislation. The disciplines of archaeology and cultural heritage management are international in scope, and many countries continue to experience the impact of colonialism. In response to these common experiences, both archaeology and Indigenous political movements involve international networks through which information quickly moves around the globe. This volume reflects these dynamic dialectics between the past and the present and between the international and the local.

demonstrating that archaeology is a historical science always linked to contemporary cultural concerns      **Questioning Collapse** Patricia A. McAnany, Norman Yoffee, 2009-09-28 Questioning Collapse challenges those scholars and popular writers who advance the thesis that societies past and present collapse because of behavior that destroyed their environments or because of overpopulation In a series of highly accessible and closely argued essays a team of internationally recognized scholars bring history and context to bear in their radically different analyses of iconic events such as the deforestation of Easter Island the cessation of the Norse colony in Greenland the faltering of nineteenth century China the migration of ancestral peoples away from Chaco Canyon in the American southwest the crisis and resilience of Lowland Maya kingship and other societies that purportedly collapsed Collectively these essays demonstrate that resilience in the face of societal crises rather than collapse is the leitmotif of the human story from the earliest civilizations to the present Scrutinizing the notion that Euro American colonial triumphs were an accident of geography Questioning Collapse also critically examines the complex historical relationship between race and political labels of societal success and failure
