Generating Prosperity for Working Families in Affluent Countries Brian Nolan, 2018-09-26 The challenge of how to ensure that working families see their living standards improve over time is central in rich countries Many argue that conditions are stagnating for many driving political polarization and threatening social stability Generating Prosperity for Working Families in Affluent Countries investigates how common such a squeeze on middle income earners has actually been and what forces underlie it in terms of globalization technology and government policies Generating Prosperity for Working Families in Affluent Countries presents the findings of a comprehensive analysis of performance in improving living standards across the wealthy nations of the OECD It relates performance to overall economic growth exploring why these often diverge substantially and to the different models of capitalism or economic growth embedded in each country Going beyond income other indicators and aspects of living standards are also incorporated including non monetary indicators of deprivation and financial strain wealth and its distribution and intergenerational mobility Through looking across this broad canvas this book teases out how ordinary households have fared in recent decades in these critically important respects and how that should inform the quest for inclusive growth and prosperity

Making Families Jane Ribbens McCarthy, Rosalind Edwards, Val Gillies, 2017-09-08 This book goes to the heart of academic political and popular debates as well as professional concerns about the nature of contemporary family life and parenting Families are widely discussed in western societies as

breaking down or as radically changing with step families in particular seen as evidence of such trends In one of the first British in depth sociological research studies for over two decades this book provide evidence of parents and step parents own understandings and experiences of their parenting in step families It addresses questions such as What does it mean to be a family Do people in step families see themselves as making a different kind of family Is individual happiness in a couple relationship prioritised at the expense of responsibilities towards children Can a step parent ever be regarded as the same as a biological mother or father What do people in step families do to try to make step family life work The book looks at how people create understand and experience their parenting and family lives It reveals how these understandings are rooted in a strong sense of moral responsibility but that what such responsibility constitutes varies according to gender and social class In particular it draws out key theoretical implications for understanding the nature of morality fairness and justice and questions ideas about individualisation and the democratisation of family life This book will be essential reading for those concerned with the study of contemporary family lives including sociologists social policy analysts family therapists professionals and practitioners It is also relevant to those interested in contemporary morality and everyday experiences

Transracial Adoptees and Their Families Howard Altstein,Rita J. Simon,1987-01-19 Transracial adoption is a controversial area of research and practice in child welfare The authors a sociologist and a social worker have contributed much to its understanding through a series of studies that began in 1972 of white families that have adopted nonwhite mostly black children This book reports on the latest phase of their research which was based on interviews with most of the families and adoptees in the original sample The purpose of the interviews was to explore the adoptees racial identities and self esteem and the long term effects of transracial adoption on the adoptees and their families The authors present their findings in a clear vivid and coherent manner objectively examine the issues raised by the study and thoughtfully formulate implications for policy and practice The study supports their major conclusion that where no appropriate permanent inracial placement can be found for a non white child transracial adoption should be seriously considered A timely unique and sophisticated work that should be read widely by students practitioners and policymakers in child welfare Choice Reporting on the third phase of a 14 year study of transracial adoption this volume

focuses on the adoption of non white children by white families It includes personal interviews with 96 mothers and fathers and 218 children which help to answer questions about the long term effects of transracial adoption on the adoptees mental and emotional health and their racial identities These valuable empirical data are combined with discussions of the practices of adoption agencies recent court rulings and alternative forms of adoption The Practitioner's Guide to Working with Families Margaret Bell,Kate Wilson,2017-03-14 This book offers a clear and coherent guide to working with families for practitioners and students in social work health counselling and related professions It brings together recent thinking on the historical and contemporary constructions of the family in such a way as to provide a helpful framework for practitioners working in a variety of settings in the field It offers up to date information on political legislative and theoretical frameworks and it reviews and illustrates a wide range of approaches and practice skills for working with families with different problems in different contexts The Bridge Over the Racial Divide William J. Wilson,1999 Studies the rising inequality in American society and addresses the need for a progressive multiracial political coalition to combat that inequality Divided by Borders Joanna Dreby,2010-02-17 Since 2000 approximately 440 000 Mexicans have migrated to the United States every year Tens of thousands have left children behind in Mexico to do so For these parents migration is a sacrifice What do parents expect to accomplish by dividing their families across borders How do families manage when they are living apart More importantly do parents relocations yield the intended results Probing the experiences of migrant parents children in Mexico and their caregivers Joanna Dreby offers an up close and personal account of the lives of families divided by borders What she finds is that the difficulties endured by transnational families make it nearly impossible for parents sacrifices to result in the benefits they expect Yet paradoxically these hardships reinforce family members commitments to each other A story both of adversity and the intensity of family ties Divided by Borders is an engaging and insightful investigation of the ways Mexican families struggle and ultimately persevere in a global economy **An Invitation to Social Construction** Kenneth J Gergen,2015-04-25 This new edition of Kenneth J Gergen s celebrated text An Invitation to Social Construction is now even more accessible for students offering a clear and thorough introduction to one of the most significant movements in contemporary social science The Third Edition includes updates reflecting the many new developments in theory research and practice a more student friendly personal writing style three new chapters on education and therapy and health care and organizations key insights into how social construction can help support you in your research projects from start to finish An Invitation to Social Construction is the must read text for all social science students academics and practitioners wishing to learn about social constructionism along with the forms of inquiry and practice central to its impact **The Political Economy of Japanese Society: Volume 2: Internationalization and Domestic Issues** Junji Banno,1998-03-12 Until recently many Japanese believed that they lived in the richest country in the world and in the early 1990s they welcomed the end of one party dominance However by the middle of the 1990s many Japanese are no longer confident in their economy nor

optimistic in their politics This authoritative study analyses various aspects of Japanese society and economy in order to provide a balanced view between the optimism of the 1980s and the pessimism characteristic of more recent years The Political Economy of Japanese Society is a revision and translation of a multidisciplinary research project carried out by the Institute of Social Science at the University of Tokyo Beginning with the late nineteenth century it examines the historical developments of Japan s contemporary political economy paying particular attention to the changes that have occurred from below Social actors who have often been given peripheral treatment such as opposition parties the aged female workers and foreign workers are brought to the forefront of the analysis alongside those considered more mainstream such as the governing party large corporations and labour unions The Japanese political economy of the 1980s and 90s has had a strong impact on the global economy and this book also analyses selective influences on the outside world in particular on other Asian nations and the USA Volume 1 analyses the structures of the Japanese political economy which encouraged continuous economic growth in the period from 1955 to 1990 focusing on such phenomena as Japanese political management the Japanese employment system and one party dominance in politics Volume 2 examines some of the problems inherited from this period of dramatic economic growth

Class, Politics, and the Decline of Deference in England, 1968-2000 Florence Sutcliffe-Braithwaite, 2018-02-23 In late twentieth century England inequality was rocketing yet some have suggested that the politics of class was declining in significance while others argue that class identities lost little power Neither interpretation is satisfactory class remained important to ordinary people s narratives about social change and their own identities throughout the period 1968 2000 but in changing ways Using self narratives drawn from a wide range of sources the raw materials of sociological studies transcripts from oral history projects Mass Observation and autobiography the book examines class identities and narratives of social change between 1968 and 2000 showing that by the end of the period class was often seen as an historical identity related to background and heritage and that many felt strict class boundaries had blurred quite profoundly since 1945 Class snobberies went underground as many people from all backgrounds began to assert that what was important was authenticity individuality and ordinariness In fact Sutcliffe Braithwaite argues that it is more useful to understand the cultural changes of these years through the lens of the decline of deference which transformed people s attitudes towards class and towards politics The study also examines the claim that Thatcher and New Labour wrote class out of politics arguing that this simple and highly political narrative misses important points Thatcher was driven by political ideology and necessity to try to dismiss the importance of class while the New Labour project was good at listening to voters particularly swing voters in marginal seats and echoing back what they were increasingly saying about the blurring of class lines and the importance of ordinariness But this did not add up to an abandonment of a majoritarian project as New Labour reoriented their political project to emphasize using the state to empower the individual
