Reader's Guide to the History of Science Arne Hessenbruch,2013-12-16 The Reader's Guide to the History of Science looks at the literature of science in some 550 entries on individuals Einstein institutions and disciplines Mathematics general themes Romantic Science and central concepts Paradigm and Fact The history of science is construed widely to include the history of medicine and technology as is reflected in the range of disciplines from which the international team of 200 contributors are drawn James Watt Ben Russell,2014-08-15 Scottish inventor and mechanical engineer James Watt 1736 1819 is best known for his pioneering work on the steam engine that became fundamental to the incredible changes and developments wrought by the Industrial Revolution But in this new biography Ben Russell tells a much bigger richer story peering over Watt's shoulder to more fully explore the processes he used and how his ephemeral ideas were transformed into tangible artifacts Over the course of the book Russell reveals as much about the life of James Watt as he does a history of Britain's early industrial transformation and the birth of professional engineering To record this fascinating narrative Russell draws on a wide range of resources from archival material to three dimensional objects to scholarship in a diversity of fields from ceramics to antique machine making He explores Watt's early years and interest in chemistry and examines Watt's partnership with Matthew Boulton with whom he would become a successful and wealthy man In addition to discussing Watt's work and incredible contributions that

changed societies around the world Russell looks at Britain's early industrial transformation Published in association with the Science Museum London and with seventy illustrations James Watt is not only an intriguing exploration of the engineer's life but also an illuminating journey into the broader practices of invention in the eighteenth and early nineteenth centuries

Published in association with the Science Museum London     *The 17th and 18th Centuries* Frank N. Magill, 2013-09-13 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history This is not a who's who Instead each entry provides an in depth essay on the life and career of the individual concerned Essays commence with a quick reference section that provides basic facts on the individual's life and achievements The extended biography places the life and works of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual's place in history All entries conclude with a fully annotated bibliography     *Wheels, Clocks, and Rockets* Donald Stephen Lowell Cardwell, 2001 A prime example of how to write a history of an immense and technical subject a winner New Scientist     *It's Part of What We Are - Volumes 1 and 2 - Volume 1: Richard Boyle (1566-1643) to John Tyndall (1820-1893); Volume 2: Samuel Haughton (1821-1897) to John Stewart Bell (1928-1990)* Charles Mollan, 2007-11-15 Biographies of more than 100 Irish scientists or those with strong Irish connections in the disciplines of Chemistry and Physics including Astronomy Mathematics etc describing them in their Irish and international scientific social educational and political context Written in an attractive informal style for the hypothetical educated layman who does not need to have studied science Well received in Irish and international reviews     *The New*

*Lunar Society* David A. Mindell, 2025-02-25 How to create our industrial future with inspiration and lessons from the originators of the industrial revolution Climate change global disruption and labor scarcity are forcing us to rethink the underlying principles of industrial society In The New Lunar Society David Mindell envisions this new industrialism from the fundamentals drawing on the eighteenth century when first principles were formed at the founding of the Industrial Revolution While outlining the new industrialism he tells the story of the Lunar Society a group of engineers scientists and industrialists who came together to apply the principles of the Enlightenment to industrial processes Those principles were collaboration the marriage of practical and scientific knowledge and the belief that the world could progress through making things The Lunar Society included pioneers like James Watt Benjamin Franklin and Josiah Wedgwood and their conversations no less than ignited the Industrial Revolution and shaped the founding of the United States Telling the stories of these makers in parallel with those of our current moment of crisis on multiple fronts Mindell argues for a new industrialism He asks What does industry look like when it strives to optimize for the lowest carbon footprint as well as the greatest profit When it values resilience as much as efficiency When it upholds dignified inclusive sustainable work Optimistic but not utopian about our ability to build the world The New Lunar Society shines a light on how a new generation can reanimate the best ideas of our thinking doer forebears and begin to build a future that is both realistic and human centered     *History of*

*Technology Volume 18* Graham Hollister-Short, Frank James, 2016-09-30 The technical problems confronting different societies and periods and the measures taken to solve them form the concern of this annual collection of essays Volumes contain technical articles ranging widely in subject time and region as well as general papers on the history of technology In addition to dealing with the history of technical discovery and change History of Technology also explores the relations of technology to other aspects of life social cultural and economic and shows how technological development has shaped and been shaped by the society in which it occurred

**The Battle Over Patents** Stephen H. Haber, Naomi R. Lamoreaux, 2021

An examination of how the patent system works imperfections and all to incentivize innovation Do patents facilitate or frustrate innovation Lawyers economists and politicians who have staked out strong positions in this debate often attempt to validate their claims by invoking the historical record but they frequently get the history wrong The Battle over Patents gets it right Bringing together thoroughly researched essays from prominent historians and social scientists this volume traces the long and contentious history of patents and examines how they have worked in practice Editors Stephen H Haber and Naomi R Lamoreaux show that patent systems are the result of contending interests at different points in production chains battling over economic surplus The larger the potential surplus the more extreme are the efforts of contending parties now and in the past to search out generate and exploit any and all sources of friction Patent systems as human creations are therefore necessarily ridden with imperfections This volume explores these shortcomings and explains why despite all the debate historically US style patent systems still dominate all other methods of encouraging inventive activity
