Petroleum Research And Venezuelas INTEVEP:

Petroleum Research and Venezuela's INTEVEP E. B. Brossard, 1993 This study provides an analytical history of Venezuela's oil industry its pioneering efforts in heavy oils and the production of orimulsion fuel It is also a look into Venezuela's oil history *Outlook on Venezuela's petroleum policy* Erik J. Sivesind, 1980 *History of Technology Volume 34* Ian Inkster, 2019-10-17 Despite having undergone major advances in recent years the history of technology in Latin America is still an understudied topic This is the first English language volume to bring together a variety of critical perspectives on the history of technology in Latin America from the early 19th century through to the present day This special issue assembled by guest editor David Pretel brings together a range of experts to explore a plethora of topics in Latin America's technological history Papers include a study of rural telephony in 20th century Latin America the rise of the Techno class in modern Brazil an analysis of the rise and fall of three Caribbean commodities the history of educational technology in Latin America and science and technology in Cold War Chile Special Issue Technology in Latin American History Edited by David Pretel Colegio de Mexico Mexico and Helge Wendt Max Plank Institute for the History of Science Germany Public-Private Dynamics in Higher Education Jürgen Enders, Ben Jongbloed, 2015-09-15 Worldwide scholarship and policy making develop new ideas and models for the role of higher education and research in society and economy This development points to changing relationships and boundaries between the public and private spheres in higher education including their public and private steering and funding public private partnerships between universities and firms the rise of private higher education and of business models in the management of universities The contributions to this edited volume investigate into the dynamics of blurring boundaries between the public and the private in higher education and their consequences for the university *From Windfall to Curse?* Jonathan Di John, 2015-12-21 Since the discovery of abundant oil resources in the 1920s Venezuela has had an economically privileged position among the nations of Latin America which has led to its being treated by economic and political analysts as an exceptional case In her well known study of Venezuela's political economy *The Paradox of Plenty* 1997 Stanford political scientist Terry Karl argued that this oil wealth induced extraordinary corruption rent seeking and centralized intervention that resulted in restricting productivity and growth What this and other studies of Venezuela's economy fail to explain however is how such conditions have accompanied both growth and stagnation at different periods of Venezuela's history and why countries experiencing similar levels of corruption and rent seeking produce divergent developmental outcomes By investigating the record of economic development in Venezuela from 1920 to the present Jonathan Di John shows that the key to explaining why the economy performed much better between 1920 and 1980 than in the post 1980 period is to understand how political strategies interacted with economic strategies specifically how politics determined state capacity at any given time and how the stage of development and development strategies affected the nature of political conflicts In emphasizing the importance of an approach that looks at the political economy not

just at the economy alone Di John advances the field methodologically while he contributes to a long needed history of Venezuela s economic performance in the twentieth century Why Governments Waste Natural Resources William Ascher,1999 Drawing on 16 case studies from Africa Asia and Latin America reveals the complex political and programmatic reasons why government officials in developing countries often willfully adopt wasteful natural resource policies
