Philippine Saga A Pictorial History:

Philippine Saga Henry Otley Beyer, Jaime Carlos Veyra, 1947 Philippine Ethnography Shiro Saito, 2019-09-30 This volume is a comprehensive listing of reference sources for Philippine ethnology excluding physical anthropology and de-emphasizing folklore and linguistics It is published as part of the East West Bibliographic Series This listing includes books journal articles mimeographed papers and official publications selected on the basis of the ratings of sixty two Philippine specialists Several titles were added to fill the need for material in certain areas *A Handbook of Philippine Folklore* Mellie Leandicho Lopez, 2006 The voluminous book provides a range of international theories and methodologies in analytical folklore investigations and a classification scheme based on genre is offered as the system of taxonomy for Philippine traditional materials Lopez counts on the regional folklorists to refine the classification according to the texts of their respective areas The different genres too are explained and examined in another part of Lopez's study The reader will definitely find interesting and useful the illustrative examples for each genre Land and People in the Philippines Joseph Earle Spencer, *Archaeology of Spiritualities* Kathryn Rountree, Christine Morris, Alan A. D. Peatfield, 2012-05-23 Archaeology of Spiritualities provides a fresh exploration of the interface between archaeology and religion spirituality Archaeological approaches to the study of religion have typically and often unconsciously drawn on western paradigms especially Judaeo-Christian monotheistic frameworks and academic rationalisations Archaeologists have rarely reflected on how these approaches have framed and constrained their choices of methodologies research questions hypotheses definitions interpretations and analyses and have neglected an important dimension of religion the human experience of the numinous the power presence or experience of the supernatural Within the religions of many of the world's peoples sacred experiences particularly in relation to sacred landscapes and beings connected with those landscapes are often given greater emphasis while doctrine and beliefs are relatively less important Archaeology of Spiritualities asks how such experiences might be discerned in the archaeological record how do we recognize and investigate other forms of religious or spiritual experience in the remains of the past The volume opens up a space to explore critically and reflexively the encounter between archaeology and diverse cultural expressions of spirituality It showcases experiential and experimental methodologies in this area of the discipline an unconventional approach within the archaeology of religion Thus Archaeology of Spiritualities offers a unique timely and innovative contribution one that is also challenging and stimulating It is a great resource to archaeologists historians religious scholars and others interested in cultural and religious heritage **The Oxford Handbook of Early Southeast Asia** Charles Higham, Nam C. Kim, 2022 This handbook collects expert surveys of the prehistory of Southeast Asia a two-millennial span that began with the arrival of now-extinct humans and ended with the great civilization of Angkor 9th to 15th century Union Catalog of Philippine Materials of Sixty-four Government Agency Libraries of the Philippines University of the Philippines. Feasting Laura L. Junker, 1999-09-01 As early as the first millennium A D the Philippine archipelago formed the easternmost edge of a vast network of Chinese Southeast Asian Indian and Arab traders Items procured through maritime trade became key symbols of social prestige and political power for the Philippine chiefly elite Raiding Trading and Feasting presents the first comprehensive analysis of how participation in this trade related to broader changes in the political economy of these Philippine island societies By combining archaeological evidence with historical sources Laura Junker is able to offer a more nuanced examination of the nature and evolution of Philippine maritime trading chiefdoms Most importantly she demonstrates that it is the dynamic interplay between investment in the maritime luxury goods trade and other evolving aspects of local political economies rather than foreign contacts that led to the cyclical coalescence of larger and more complex chiefdoms at various times in Philippine history A broad spectrum of historical and ethnographic sources ranging from tenth century Chinese tributary trade records to turn of the century accounts of chiefly feasts of merit highlights both the diversity and commonality in evolving chiefly economic strategies within the larger political landscape of the archipelago The political ascendance of individual polities the emergence of more complex forms of social ranking and long term changes in chiefly economies are materially documented through a synthesis of archaeological research at sites dating from the Metal Age late first millennium B C to the colonial period The author draws on her archaeological fieldwork in the Tanjay River

basin to investigate the long term dynamics of chiefly political economy in a single region Reaching beyond the Philippine archipelago this study contributes to the larger anthropological debate concerning ecological and cultural factors that shape political economy in chiefdoms and early states It attempts to address the question of why Philippine polities like early historic kingdoms elsewhere in Southeast Asia have a segmentary political structure in which political leaders are dependent on prestige goods exchanges personal charisma and ritual pageantry to maintain highly personalized power bases *Raiding Trading and Feasting* is a volume of impressive scholarship and substantial scope unmatched in the anthropological and historical literature It will be welcomed by Pacific and Asian historians and anthropologists and those interested in the theoretical issues of chiefdoms

Rice in Malaya R.D. Hill, 2012-03-01 Rice is a staple part of the diet of virtually every Malaysian to the extent that in each of the major languages used in Malaysia rice means food and food means rice Drawing on a wide range of sources *Rice in Malaya* opens with an examination of the often fragmentary evidence of rice growing in prehistoric Southeast Asia the original home of this all important crop and then considers the great changes that followed the rise of commercial agriculture in the region before and during colonial times A pioneering work when it first appeared in 1977 *Rice in Malaya* successfully combined the area by area approach of the geographer with the period by period approach of the historian to give a well balance picture of rice growing The comprehensive use of evidence in several languages made the study the definitive work in the field This re issue of *Rice in Malaya* makes a classic work of scholarship available to a new generation of readers The book remains of great importance not only to geographers historians agriculturalists and economists but also to anyone with an interest in

Southeast Asia for it explains in great measure many of the deeply etched patterns of life found in modern Malaysia
