Herbs for Disease Prevention and Treatment Velmurugan Devadasan, Atanu Bhattacharjee, Raman Pachaiappan, Gayathri Dasararaju, 2024-11-06 Herbs for Disease Prevention and Treatment offers a comprehensive exploration of the therapeutic potential of herbs and their bioactive compounds in preventing and managing various diseases. This book delves into the use of marine macroalgae in diabetes management, the role of herbal supplements and nutraceuticals in disease prevention, and the application of herbs as dietary medicine. It also covers traditional medicinal plants, the historical and contemporary use of herbal medicine, and innovative techniques like GC-MS and LC-MS/MS for identifying phytochemicals effective against COVID-19. Additionally, it includes a review of the impact of repeated heating on plant edible oils and explores plant-based treatments for kidney diseases. Aimed at healthcare professionals, researchers, and students in the fields of herbal medicine, pharmacology, and nutrition, this book serves as an essential resource for understanding the role of herbs in modern healthcare. *Healing with Herbs: Herbal Therapies for Disease Prevention and Treatment*, 2025-10-05 The wisdom of herbal medicine has been interwoven with human civilization for centuries, offering remedies, prevention, and holistic health support. In recent years, renewed interest in herbal therapeutics has taken the scene out of traditional systems towards evidence-based and integrative healthcare. Integrating both tradition and science, *Healing with Herbs: Ancient Medicinal Wisdom for Modern Times* provides a holistic perspective on the usage of plants to promote health and prevent disease. This volume brings together distinguished scholars, researchers, and practitioners from diverse domains of pharmacognosy, phytochemistry, pharmacology, biotechnology, and clinical sciences. Each chapter highlights the molecular, pharmacological, and therapeutic dimensions of medicinal plants, offering mechanistic insights into how phytoconstituents influence human health. From cancer chemoprevention and hepatoprotection to respiratory care, neuroprotection, gastrointestinal health, and innovative drug delivery systems, the chapters collectively represent the multifaceted applications of herbs in managing chronic diseases. The book emphasizes not only the therapeutic potential but also the translational challenges such as bioavailability, standardization, clinical validation, and safety considerations that accompany the development of herbal formulations. Furthermore, special attention has been given to advanced encapsulation technologies and nanocarrier systems, reflecting the dynamic interface between natural medicine and cutting-edge pharmaceutical sciences. It is our hope that this book serves as a valuable resource for academicians, researchers, healthcare professionals, and students interested in herbal sciences and integrative medicine.
