Restructuring The Labor Market The Implications For Youth:

Young People in the Labour Market Andy Furlong, John Goodwin, Henrietta O'Connor, Sarah Hadfield, Stuart Hall, Kevin Lowden, Réka Plugor, 2017-10-12 Levels of suffering among young people have always been much higher than governments suggest. Indeed, policies aimed at young workers have often been framed in ways that help secure conformity to a new employment landscape in which traditional securities have been progressively removed. Increasingly punitive welfare regimes have resulted in new hardships especially among young women and those living in depressed labour markets. Framed by the ideas of Norbert Elias, *Young People in the Labour Market* challenges the idea that changing economic landscapes have given birth to a Precariat and argues that labour insecurity is more deep rooted and complex than others have suggested. Focusing on young people and the ways in which their working lives have changed between the 1980s recession and the Great Recession of 2008-2009 and its immediate aftermath, the book begins by drawing attention to trends already emerging in the preceding two decades. Drawing on data originally collected during the 1980s recession and comparing it to contemporary data drawn from the UK Household Longitudinal Study, the book explores the ways in which young people have adjusted to the changes, arguing that life satisfaction and optimism are linked to labour market conditions. A timely volume, this book will be of interest to undergraduate and postgraduate students as well as postdoctoral researchers who are interested in fields such as Sociology, Social Policy, Management and Youth Studies.

Work-place Jamie Peck, 1996-04-06 Challenging the prevailing idea that labor markets are governed by universal economic processes, this significant work argues instead that labor markets develop in tandem with social and political institutions and thus function in locally specific ways. Focusing on the complex social processes that lie at the heart of the labor market, the author offers a provocative new perspective and proposes new ways of conducting research in the area.

Restructuring the Labour Market D. Ashton, M. Maguire, M. Spilsbury, 2016-07-27 This book represents an advance in our knowledge of the labour market. For the first time it combines the analysis of both quantitative and qualitative data to produce an explanation of the main changes which have transformed the labour market during the recession. For the first time it demonstrates the segmented character of the youth labour market and the significance of the local labour markets. The result is a substantial contribution to labour market segmentation theory and to the analysis of social policy in this field.

The Handbook for the Future of Work Julie MacLeavy, Frederick Harry Pitts, 2024-12-26 The Handbook for the Future of Work offers a timely and critical analysis of the transformative forces shaping work and employment in the twenty-first century. Focusing on the past two decades, the handbook explores how technological advancements, automation, and a shifting capitalist landscape have fundamentally reshaped work practices and labour relations. Beyond simply outlining the challenges and opportunities of automation, the handbook integrates these emerging realities with established discussions of work. Importantly, it moves beyond dominant technology-centric narratives, probing into broader questions about the nature of capitalism in a time of crisis and the

contestation for alternative economic models With contributions from established and emerging authors based in institutions around the world the handbook offers a systematic overview of the developments that have sparked radical shifts in how we live and work and their multifaceted impacts upon social relations and identities practices and sectors politics and environments The handbook is unique in its exploration of the potential for economic transformations to reshape the centrality of work in our social and political imaginaries A useful resource for students and researchers the handbook serves as an essential guide to this new intellectual landscape

Education, Training and the Future of Work I John Ahier, Geoff Esland, 2013-10-18 A central claim of this volume is

that public policy in education and training can only be properly understood if it is seen in relation to prevailing economic and employment conditions. It has become increasingly apparent that the neo liberal economic policies pursued by Western governments during the 1980s and 1990s have led to a growing world wide work crisis. Unemployment levels particularly in Europe remain persistently high and for those in employment job insecurity and long working hours have become the norm. The response of UK governments has been to promote flexibility in employment practices while proclaiming the importance of improving skill levels through education and training. This volume challenges the adequacy of such an approach and asks whether reliance on education and training reforms without additional political intervention in economic processes is capable of reversing current trends. Issues covered in this reader include the impact of globalization on employment trends, neo liberal and neo Keynesian approaches to employment policy, political reforms in education and training institutions, the impact of flexibilization on private life and the family. The two volumes in this series are readers for the Open University course Education Training and the Future of Work E837, a module of the MA in Education. The companion volume is Education Training and the Future of Work II: Developments in Vocational Education and Training. John Ahier is Lecturer in Education at the Open University. Geoff Esland is Director of the Centre for Sociology and Social Research at the Open University and Course team Chair of E837.

Global Youth Unemployment Ross Fergusson, Nicola Yeates, 2021-04-30. This timely book introduces a fresh perspective on youth unemployment by analysing it as a global phenomenon. Ross Fergusson and Nicola Yeates argue that only by incorporating analysis of the dynamics of the global economy and global governance can we make convincing comprehensive sense of these developments. The authors present substantial new evidence spanning a century pointing to the strong relationships between youth unemployment, globalisation, economic crises and consequent harms to young people's social and economic welfare worldwide. The book notably encompasses data and analysis spanning the Global South as well as the Global North.
