Russia Modern Industrial:

The Coming of New Industrial State Sergey Bodrunov, 2024-02-20 The book explores the effect of modern technological shifts on human society showing that technologies are undergoing accelerating qualitative changes that open up new opportunities for personal development and satisfaction of wants and simultaneously engender risks associated with growing opportunities of human interference with nature and technogenic stress on the environment Based on the study of cutting edge technologies and resulting socioeconomic shifts Bodrunov's analysis outlines the shape of the civilizational crisis we face It can only be overcome by founding a new industrial society of the second generation if we consider the new industrial state described by J K Galbraith as the first generation reliant on knowledge intensive material production and the gradual removal of humans from immediate material production

Government, Industry and Rearmament in Russia, 1900-1914 Peter Gatrell, 1994-03-10 This book provides an economic historian's perspective on major questions that confront all students of Russian history how stable were the economic and administrative structures of late imperial Russia and how well prepared was Russia for war in 1914 The decade following the Russo Japanese War witnessed profound changes in the political system and in the industrial economy The regime faced challenges to its authority from industrialists caught in the throes of recession and from parliamentary critics of tsarist administration Peter Gatrell provides a comprehensive account of the attempts made by government and business to confront these challenges examining the organisation and performance of a key industry and showing how decisions were reached about the allocation of resources and the far reaching consequences these decisions entailed

New Rich, New Poor, New Russia Bertram Silverman, Murray Yanowitch, 2016-07-08 Now expanded to cover the consequences of Russia's 1998 financial collapse this book focuses on the social consequences of a modern day great depression The text examines the unequal distribution of the costs and benefits of Russia's leap into capitalism The topics covered include the emergence of the new poor the recruitment of a business elite the changing social and economic status of women and the impact of marketization on employment The study draws on a range of statistics and survey research data to present a portrait of the lives and circumstances of contemporary Russians

Civil Society in Putin's Russia Elena Chebankova, 2013-03-05 Unlike other books on civil society in Russia which argue that Russia's civil society is relatively weak and that democratisation in Russia went into reverse following Vladimir Putin's coming to power this book contends that civil society in Russia is developing in a distinctive way It shows that government and elite led drives to encourage civil society have indeed been limited and that the impact of external promotion of civil society has also not been very successful It demonstrates however that independent domestic grassroots movements are beginning to flourish despite difficulties and adverse circumstances and that this development fits well into the changing nature of contemporary Russian society

The Russian Imperial Army 1796-1917 Roger Reese, 2017-11-30 The majority of the articles assembled in this volume reflect social historical methodology which is used to

show the relationship between the tsarist army and society while focusing on the Russian historical experience In each case whether it be a study of the soldiers as peasants alcoholism the nationalities officers military justice social and legal reform and mutiny or revolution the inescapable conclusion arises that the army was at all times a reflection of the many social problems aspirations or political thought of the broader imperial Russian civil society In short this anthology treats the Russian military as a window on the symbiotic triangular relationship between army state and society **Russia** William A. Dando,Zoran Pavlovic,Charles F. Gritzner,Anna R. Carson,Carol Z. Dando,2007 Russia is the world s largest country it is nearly twice the size of both China and the United States and it stretches over 11 time zones It consists of vast plains and the nation has an abundance of natural resources This work contains information that guides students through the history geography culture and economy of this country **Russia's Politics of Uncertainty** Mary McAuley,1997-08-28 Explores the political reactions of elites and society in the Russian Federation after the collapse of communist party rule and the break up of the USSR *The Mongols in Russia* Jeremiah Curtin,1908 *Industry, State, and Society in Stalin's Russia, 1926-1934* David R. Shearer,2018-09-05 In his reexamination of the origins of the Stalinist state during the formative period of rapid industrialization in the late 1920s and early 1930s David R Shearer argues that a centralized state controlled economic system was the consciously conceived political creation of Stalinist leaders rather than the inevitable by product of socialist industrialization Focusing on the different economic and bureaucratic cultures within the industrial system Shearer reconstructs the debates in 1928 and 1929 over administrative financial and commercial reform He uses information from recently opened archives to show that attempts by the state s trading organizations to create a commercial economy enjoyed wide support offering a model that combined planning and rapid industrialization with social democracy and economic prosperity In an effort to crush the syndicate movement and establish tight political control over the economy Stalinist leaders intervened with a program of radical reforms Shearer demonstrates that professional engineers planners and industrial administrators in many cases actively supported the creation of a powerful industrial state unhampered by domestic social and economic constraints The paradoxical result Shearer shows was a loss of control The overly centralized system that emerged during the first Five Year Plan was rendered incoherent by periodic economic crises and the continuing influence of partially suppressed social and market forces **China's Rise, Russia's Fall** Peter Nolan,1995-10-30 A lively and well written comparison of economic transformation in China and the USSR Russia combining a good knowledge of the Chinese economy with a radical critique of Western transition orthodoxy this very topical and very controversial book will be useful reading for students administrators in many countries and international agencies and business people Michael Ellman University of Amsterdam Peter Nolan makes a pungent challenge to conventional wisdom by arguing that the Chinese approach to system reform has been vastly more successful than the shock therapy applied to Russia His book is based on extensive comparison and deep insight into the political economy of both countries John Toye Institute of Development

Studies Sussex This book is the first attempt to analyse systematically the dramatic contrast in the results of post Stalinist reform in China and Russia It argues that there emerged a transition orthodoxy about how to reform the communist systems of political economy However it was deeply flawed The advice which flowed from this orthodoxy was the primary cause of the Soviet disaster The decision not to follow it was the main reason for China s enormous success in its reform programme

Reconceptualizing the Industrial Revolution Jeff Horn, Leonard N Rosenband, Merritt Roe Smith, 2010-10-29 Closely linked essays examine distinctive national patterns of industrialization This collection of essays offers new perspectives on the Industrial Revolution as a global phenomenon The fifteen contributors go beyond the longstanding view of industrialization as a linear process marked by discrete stages Instead they examine a lengthy and creative period in the history of industrialization 1750 to 1914 reassessing the nature of and explanations for England s industrial primacy and comparing significant industrial developments in countries ranging from China to Brazil Each chapter explores a distinctive national production ecology a complex blend of natural resources demographic pressures cultural impulses technological assets and commercial practices At the same time the chapters also reveal the portability of skilled workers and the permeability of political borders The Industrial Revolution comes to life in discussions of British eagerness for stylish middle class products the Enlightenment s contribution to European industrial growth early America s incremental rather than revolutionary industrialization the complex connections between Czarist and Stalinist periods of industrial change in Russia Japan s late and rapid turn to mechanized production and Brazil s industrial financial boom By exploring unique national patterns of industrialization as well as reciprocal exchanges and furtive borrowing among these states the book refreshes the discussion of early industrial transformations and raises issues still relevant in today s era of globalization *Autocracy, Capitalism and Revolution in Russia* Tim McDaniel, 2024-03-29 The introduction to *Autocracy Capitalism and Revolution in Russia* explores the unique social economic and political dynamics that shaped the 1917 Russian Revolution Unlike other modern revolutions such as the French or English cases where industrialization played a secondary role the Russian Revolution was heavily influenced by its emerging industrial proletariat Concentrated in urban centers like Petrograd and Moscow this working class became a pivotal revolutionary force despite its relatively small size The revolution itself was multifaceted encompassing a proletarian uprising against capitalism a peasant revolt against landowners soldiers rebellions and even elements of a bourgeois revolution against autocracy The interplay of these forces created a complex revolutionary process with labor militancy at its core Severe repression under tsarist autocracy stifled formal worker organizations but this repression also fueled sporadic bursts of radical action making the Russian labor movement distinctly revolutionary The book argues that the Russian revolution cannot be understood without considering the contradictions of autocratic capitalism which hindered reform and radicalized the labor movement It integrates structural and agency based perspectives showing how social movements both emerged from and shaped these contradictions The inability of the tsarist regime to allow for

moderate worker organizations or adapt to modern industrial capitalism undermined its legitimacy and set the stage for the Bolshevik victory. However, this outcome was not inevitable but one of several possible resolutions to the crises of the old regime. By analyzing the labor movement's development, its interactions with the state, and its role in the revolution, the study highlights the unique characteristics of Russia's revolutionary experience and its broader implications for understanding social and political change. The Industrialisation of Soviet Russia 3: The Soviet Economy in Turmoil 1929-1930 R. W. Davies, 1989-05-05

In 1929-30, the 'spinal year' of the first five-year plan, a vast investment programme began the transformation of the Soviet Union from a peasant country into a great industrial power. This book, the third part of *The Industrialisation of Soviet Russia*, re-examines the breakdown of the mixed economy. In those days of heroism and enthusiasm, hunger, and repression, crucial Soviet economic and political institutions were established and are only now being effectively challenged by Gorbachev's revolution. While complementing the previous two volumes of this author's work, the book is designed to be read independently. It sheds new light on a dramatic moment in Soviet history and in the formation of the Soviet system.

Education in Russia Thomas Darlington, 1909

Strategic Communications in Russia Katerina Tsetsura, Dean Kruckeberg, 2020-09-07

This book serves as a reader exploring the scholarly inquiry, professional education, and practice of Russian public relations and advertising in multiple contexts. It examines significant parts of what can be encompassed under the umbrella of strategic communications, including public relations and advertising, rather than investigating all areas of communication in Russia. Within the context of Russia's history, culture, and ideology, the book begins by tracing the development of communication as a field, as a discipline, and as a social institution in Russia. It then samples current studies in Russian strategic communications, examining this professional specialization's current state and likely

future directions The book's authors are mostly Russians who are experts in their specializations Chapters are predicated upon the premise that this is an exciting time of great opportunity for Russian strategic communications However in Russia exploiting such opportunities for strategic communications scholarship education and professional practice presents challenges within the context of that nation's cultural historical and ideological heritage that presently may be unique The book concludes with a prognosis of the future of Russian strategic communications The book is recommended reading for a worldwide audience of strategic communications scholars educators students and practitioners Such readers will find the book of interest and of unique value as the book will help them to better understand appreciate and respect Russian strategic communications its genesis and present state The Russian Revolution Sheila Fitzpatrick, 2001

The Russian Revolution had a decisive impact on the history of the twentieth century Now following the collapse of the Soviet regime and the opening of its archives it is possible to step back and see the full picture In this classic work the author incorporates data from archives that were previously inaccessible not only to Western but also to Soviet historians as well as drawing on important recent Russian publications such as the memoirs of one of the great survivors of Soviet politics Vyacheslav Molotov Impeccable in its scholarship and objectivity the book tells a gripping story of a Marxist revolution that was intended to transform the world visited enormous suffering on the Russian people and like the French Revolution before it ended up by devouring its own children In a concluding section that will be of great interest to scholars in the field as well as the general reader the author treats the Stalinist Great Purges as the last act of the drama of the Russian Revolution **Voluntary Associations in**

Tsarist Russia Joseph Bradley, 2009-06-30 This text investigates the role of learned mostly scientific societies in building civil society in imperial Russia It challenges the idea that Russia did not have the building blocks of a democratic society

A History of Nationalism in the East Hans Kohn, 2022-11-30 First published in 1929 A History of Nationalism in the East brings together in one truly fascinating volume a mass of information hitherto scattered and partly unavailable Hans Kohn sums up the general situation in his Introduction He tells us that the World War I produced three great communities of interest distinct and to some extent mutually antagonistic The first was that of the continent of Europe barring Russia which was faced with the necessity for the gradual breaking down of national boundaries for political financial and economic reasons The second was that of the Anglo Saxon people the United States Great Britain Canada Australia and South Africa This had to face Soviet Russia on the one hand and the Orient the third community of interests on the other Here he sketches suggestively the development of the nationalist movement in Islam India Egypt Turkey Arabia and Persia The language used is a reflection of its era and no offence is meant by the Publishers to any reader by this republication This book will be of interest to students of history political science international relations and geography The Soviet Colossus Michael G. Kort, 2019-04-17 The Soviet Colossus revisits the turning points in Russia's modern history from the fall of the tsarist regime to the establishment of the Bolshevik dictatorship and Stalinist totalitarianism the reforms and counter

reforms of Khrushchev and Brezhnev to the reform program of Mikhail Gorbachev and the resultant collapse of the Soviet Union and from the effort to build a democratic and free market Russia under Boris Yeltsin to the political authoritarianism and the establishment of a state capitalist economy under Vladimir Putin This eighth edition has been revised and updated to cover the latest developments from the Putin administration These revisions include added emphasis on the increasing authoritarian nature of Russia's political system the serious challenges posed by the country's unsolved economic and social problems and the growing tensions between Russia on the one hand and the United States and the European Union on the other as a result of Moscow's aggression against Ukraine Kort combines this updated account with a broad exploration of Russia's political history examining how the Soviet past has been woven into the fabric of the modern Russian state a state which plays such a major assertive role in global affairs but which simultaneously remains an allusive secretive entity With Russia's increasing influence on the global stage and the controversies that often accompany this *The Soviet Colossus* is an invaluable resource for students of history politics and international relations
