**Russian Tanks of World War II** Tim Bean, Will Fowler, 2002 At the start of the campaign on the Eastern Front in the earliest days of Operation Barbarossa it was the German armour that swept all in front of it as the Wehrmacht drove eastwards in an unrelenting advance on Leningrad Moscow and Stalingrad The ill prepared and under resourced Russian forces were forced to retreat Gradually the balance of the war swung in favour of the Russian forces whose strength both in numbers and equipment proved decisive in the ultimate defeat of the German forces in the east Critical in the Soviet victory was its armour tanks such as the T 34 proving the equal if not better than some of the tanks available to the Germans This authoritative history of the Soviet forces before and during World War 2 reveals the development of their tactics in the early post revolutionary era right through to the ultimate victory in Berlin in May 1945 The dramatic struggle of the tank crews against the German advance is told through some 200 contemporary photographs many of which have never been seen before The photographs include images of tank training in the 1920s and 1930s on active service and many compelling pictures from some of the major tank battles of the day Over the past five years aided by the opening up of archives in Russia previously closed to western experts there has been a massive growth in interest in the events that occurred on the Eastern Front Russian Tanks is an important addition to the literature currently available exploring as it does the vitally important Soviet armour of the period

**Stalin's Revenge** Anthony Tucker-Jones, 2009-07-19 In the summer of 1944 the Red Army crushed Army Group Centre in one of the largest offensives in military history Operation Bagration launched almost exactly three years after the Nazi invasion of the Soviet Union was Stalin s retribution for Hitler s Operation Barbarossa Earlier battles at Stalingrad and Kursk paved the way for Soviet victory but as Anthony Tucker Jones demonstrates in this fascinating study Bagration ensured that the Germans would never regain the strategic initiative In one fell swoop the Wehrmacht lost a quarter of its strength on the Eastern Front And in a series of overwhelming assaults the Red Army recaptured practically all the territory the Soviet Union had lost in 1941 advanced into East Prussia and reached the outskirts of Warsaw As he reconstructs this massive and complex battle Anthony Tucker Jones assesses the opposing forces and their commanders and gives a vivid insight into the planning and decision making at the highest level He recreates the experience of the soldiers on the battlefield by using graphic contemporary accounts and he sets the Bagration offensive in the wider context of the Soviet war effort He also asks why Stalin s road to retribution proved to be such a long and bloody one for the Germans despite their crippling losses managed to resist for another ten months

**SOVIET ARMOURED FORCE** , Operation Barbarossa: the Complete Organisational and Statistical Analysis, and Military Simulation Volume IIB Nigel Askey, 2014-08-26 Volume IIB is the second volume relating to and completing the Wehrmacht and the German mobilisation and war economy from June to December 1941 It includes the most detailed Orders of Battle ever published on the German Heer Luftwaffe Waffen SS and Kriegsmarine in all areas of the Reich between 22nd June and 4th July 1941 Even

small and obscure units are included such as flak companies artillery HQs observation battalions bridging columns Landesschützen battalions MP battalions railroad companies and Luftwaffe Kurierstaffeln Verbindungsstaffeln and Sanitätsflugbereitschaften The Luftwaffe OOBs also include details on aircraft types and strengths in each air unit

Kursk 1943 Anthony Tucker-Jones, 2018-05-07 In 1943 as war raged along the Eastern Front the German forces attempted to push further east in the brutal Operation Citadel which saw one of the largest armoured clashes in history the Battle of Prokhorovka Countered by two Soviet attacks this operation saw the tide turn on the Eastern Front For the first time a German offensive was halted in its tracks and the Soviets ended the conflict as the decisive victors With a loss of over 200 000 men on both sides this two month clash was one of the costliest of the war In this dramatic study Anthony Tucker Jones reassesses this decisive tank battle through the eyes of those who fought using translated first person accounts Kursk 1943 is one volume that no military history enthusiast should be without

**T-34** Anthony Tucker-Jones, 2015-03-31 The most iconic tank for the Red Army in World War II a pictorial history of the design development and usage of the T 34 and its derivatives Military Archive Research It could be said that the T 34 was the tank that won the Second World War In total 57 000 were produced between 1941 and 1945 Stalin's tank factories outstripped Hitler's by a factor of three to one and production of the T 34 also exceeded that of the famed American M4 Sherman Not only did this output swamp German panzer production the T 34 was a robust no frills war winning design easy to manufacture and reliable Its sloping armor was innovative at the time and its wide tracks suited it to off road warfare Crucially it required little maintenance in comparison to German tanks and its chassis was used as the basis for a range of assault guns the SU 85 SU 100 and SU 122 Anthony Tucker Jones's photographic history of this exceptional armored vehicle follows its story through the course of the war from its combat debut against the Wehrmacht during Operation Barbarossa through the Red Army's defeats and retreats of 1941 and 1942 to the tide turning victories at Stalingrad and Kursk and on through the long rapid Soviet advance across Ukraine and Byelorussia to Berlin As well as a

range of rare archive photographs and those of a surviving example of the T 34 the book features specially commissioned color illustrations There is a plethora of information for the modeler and armor enthusiasts I really don't think you would go wrong with this book Recommended inSCALE King Tiger vs IS-2 David R. Higgins,2011-09-20 This book examines the technology and strategy that defined the outcome of the battles between the King Tiger and the IS 2 The Soviets had been quick to develop tanks that could fight the Tiger on an equal footing but these were developed as part of a completely different strategy than that employed by the Germans The King Tiger was a modern marvel and remained unmatched in one on one combat Technologically superior with greater firepower and better armour than the Soviet IS 2 the King Tiger was a formidable opponent However the IS 2 was lighter more manoeuvrable and most importantly far more numerous As well as analysing how different designs and technology helped and hindered each tank this book also discusses how these weapons affected and shaped the overall strategy of the German and Soviet forces Ultimately with overwhelming numerical superiority the Soviets were able to simply overwhelm their opponents negating the technical superiority of the King Tiger

*Stalin's Armour, 1941-1945* Anthony Tucker-Jones,2021-03-15 With over 60 photos this look at the role of Red Army tanks in Hitler's defeat will be of interest to modelers and military historians alike AMPS Indianapolis Stalin's purge of army officers in the late 1930s and disputes about tank tactics meant that Soviet armored forces were in disarray when Hitler invaded in 1941 As a result during Operation Barbarossa the Wehrmacht's 3 200 panzers ran circles round the Red Army's tank force of almost 20 000 and thousands of Soviet tanks were disabled or destroyed Yet within two years of this disaster the Red Army's tank arm had regained its confidence and numbers and was in a position to help turn the tide and liberate the Soviet Union This is the remarkable story Anthony Tucker Jones relates in this concise highly illustrated history of the part played by Soviet armor in the war on the Eastern Front Chapters cover each phase of the conflict from Barbarossa through the battles at Moscow Stalingrad and Kursk to the massive tank led offensives that drove the Wehrmacht back to Berlin Technical and design developments are covered but so are changes in tactics and the role of the tanks in the integrated all arms force that crushed German opposition **Tanks** Spencer C. Tucker,2004-10-25 This expert study discusses the development and evolution of the tank and the tactics behind its employment covering both its capabilities as a weapons system and its strategic use on the battlefield Tanks An Illustrated History of the Their Impact follows the development of tracked and armored fighting vehicles across the 20th century from the world wars to the Cold War battlefields of Korea and Vietnam and from Arab Israeli conflicts to the Persian Gulf The book describes the distinctive characteristics and capabilities of each new generation of tank as well as the formulation of armored doctrines and deployment strategies in France Britain Germany the Soviet Union the United States Japan Israel and the Arab nations It is an expert introduction to how the role of the tank has changed over time a story of technological innovation strategic daring desperate battles Stalingrad Kursk and charismatic commanders like Erwin Rommel and George S Patton who defeated Rommel's division by following a plan from

the Desert Fox's own book *Building Guderian's Duck: Germany's Response To The Eastern Front Antitank Crisis, 1941 To 1945* L-Commander Scott M. Chafian, 2014-08-15 The appearance of the T 34 in 1941 caused a crisis for German antitank forces. Existing antitank guns were nearly impotent against the new Russian tank while anti-aircraft and artillery pieces though successful when pressed into action were insufficiently mobile to accompany mechanized forces. The German Army Ordnance Office the Heereswaffenamt was responsible for development of new weapons and would be responsible for countering the threat of Russian armor. The Heereswaffenamt would need to not only counter the T 34 but also do so in an environment of shifting political relationships and with an increasingly stressed industrial system. Utilizing lessons from the bitterly contested battlefields of western Russia the Heereswaffenamt developed a tank destroyer the Jagdpanzer IV using the existing chassis of the Panzer IV tank and the guns of both the Panzer IV and Panther tanks. The Jagdpanzer IV known by its crews as Guderian's Duck proved to be a capable tank killer against both the T 34 threat of 1941 and 1942 as well as the improved versions of 1943 and 1944.
