Consent and Control in the Authoritarian Workplace Martin Krzywdzinski, 2018-02-13 Today a large proportion of the world's states are under authoritarian governments These countries limit participation rights both in the political sphere and in the workplace At the same time they have to generate consent in the workplace in order to ensure social stability and prevent the escalation of conflicts But how do companies generate consent given that employee voice and interest representation may be limited or entirely absent Based on a review of research literature from sociology organizational psychology and behavioural economics this book develops a theory of consent generation and distinguishes three groups of consent producing mechanisms socialization incentive mechanisms and participation and interest representation It presents an empirical analysis of how these mechanisms work in Russian and Chinese automotive factories and shows how socio cultural factors and labour regulation explain the differences between both countries regarding consent and control in the workplace The book contributes to two research debates First it examines the generation of consent in the workplace a core topic of the sociology of work and organization Its particular focus is on consent generation in authoritarian societies Secondly the book contributes to the debate about the reasons for the completely different trajectories of post communist Russia and China The book provides an empirical analysis that explains the different work behaviours of employees in both countries and links the micro level of the workplace and the macro level of institutions and organizational cultures

Mary McAuley provides a clear and comprehensive analysis of the progress made by human rights organisations in Russia and the challenges which will confront them in the future

Authoritarian Modernization in Russia Vladimir Gel'man, 2016-08-12 Post Communist Russia is an instance of the phenomenon of authoritarian modernization project which is perceived as a set of policies intended to achieve a high level of economic development while political freedoms remain beyond the current modernization agenda or are postponed to a distant future Why did Russia unlike many countries of post Communist Europe pursue authoritarian modernization after the Soviet collapse What is the ideational agenda behind this project and why does it dominate Russia's post Communist political landscape What are the mechanisms of political governance which maintain this project and how have they adopted and absorbed various democratic institutions and practices Why has this project brought such diverse results in various policy arenas and why have the consequences of certain policies become so controversial Why despite so many controversies shortcomings and flaws has this project remained attractive in the eyes of a large proportion of the Russian elite and ordinary citizens This volume intended to place some of these questions on the research agenda and propose several answers encouraging further discussions about the logic and mechanisms of the authoritarian modernization project in post Communist Russia and its effects on Russia's politics economy and society

Parties, Trade Unions and Society in East-Central Europe Michael Waller, Martin Myant, 2022-12-30 Originally published in 1994 this volume analyses the relationship between political parties and trade unions in Poland the Czech Republic Slovakia Hungary and Bulgaria Political parties had high visibility in the changes that took place in Eastern Europe during the 1980s and early 1990s Far less visible were the developments in the trade union sphere where the old mass organizations of the communist period now independent were joined by newly formed organizations and both played a central role in politics

Workers and revolution in Serbia Martin Upchurch, Darko Marinkovic, 2016-05-16 This book offers a refreshing new analysis of the role of workers both in Tito's Yugoslavia and in the subsequent Serbian revolution against Milošević in October 2000 The authors argue that Tito and the Communist leadership of Yugoslavia saw self management as a modernising project to compete with the West and as a disciplining tool for workers in the enterprise The socialist ideals of self management were subsequently corrupted by Yugoslavia's turn to the market The authors then move on to examining the central role of ordinary workers in overthrowing the nationalist regime of Milošević and present an account which runs contrary to many descriptions of labour weakness in post Communist states Organised labour should be studied as a movement in and of itself rather than as a passive object of external forces Two labour movement waves have emerged under post Communism the first an expression of desire for democracy the second as a collaboration and clientelism A third wave against the ravages of neoliberalism is only just emerging

Russia and Its Constitution Gordon B. Smith, Robert Stewart Sharlet, 2008 How is the Russian Constitution ratified in 1993 being implemented today A team of distinguished scholars assesses the promise and the realities of Russian constitutionalism in a number of critical areas
