Russian Aviation and Air Power in the Twentieth Century

John Greenwood, Von Hardesty, Robin Higham, 2014-06-11 In the light of new archival material the editors take a fresh look at Russian aviation in the twentieth century Presenting a comprehensive view of Russian aviation from its genesis in the late czarist period to the present era the approach is essentially chronological with a major emphasis on the evolution of military aviation The contributions are diverse with appropriate attention to civilian and institutional themes

Soviet Air Power

Kenneth Whiting, 2020-01-29 This comprehensive examination of Soviet air power analyzes the three branches of the USSR Military Air Forces Frontal Aviation Long Range Aviation and Military Air Transport and Naval Aviation and the National Air Defense emphasizing World War II and postwar developments

Early Jet Bombers, 1944-1954 Leo Marriott, 2020-01-19

The author of Early Jet Fighters 1944-1954 turns his attention to jet bombers in another stunning pictorial history Don't miss out on this one IPMS USA Using over 200 archive photographs Leo Marriott gives us a powerful portrait of the first decade in the development of the jet bomber This was a time of intense technical innovation that transformed the design and capabilities of the bomber and gave birth to a range of classic military aircraft in the USA Great Britain France and the Soviet Union The photographs take the story from the earliest jet bombers constructed in Germany toward the end of the Second World War to the successful designs both sides depended on through the first phase of the Cold War The pace of development was rapid and remarkable from initial prototypes built in Germany the Arado 234 and the Junkers Ju 287 to the fleets of advanced jet bombers like the British Canberra and V bombers the American B 47 and B 52 and the Soviet Il 28 Beagle and Tu 16 Badger The images of the prototypes give a fascinating insight into the extraordinary technical challenges and the ambition and inventiveness of the designers and manufacturers who overcame them Excellent coverage of a lesser known aspect of airpower development the wealth of photos makes it enjoyable and interesting Air Power History

Early Jet Fighters, 1944-1954 Leo Marriott, 2020-03-30 A clearly written profusely illustrated and well organized volume on Soviet and European jet fighter design Air Power History In his previous book on early jet fighters Leo Marriott traced the history of the revolutionary aircraft produced by the British and Americans immediately after the Second World War Now in this companion volume he describes jet fighter development on the continent of Europe and in the Soviet Union during the same remarkable period Using over 200 archive photographs he covers the pioneering German designs then the range of experimental and operational fighters constructed by the Soviets the French and the Swedes The sheer variety of the designs that manufacturers came up with during this short intense period of innovation make for fascinating reading Several of the most famous jet fighters feature prominently in the rare photographs and are analyzed in the expert text including the Messerschmitt Me 262 the Heinkel He 162 the MiGs 15 17 and 19 the Dassault Ouragan and the Saab J29 But perhaps the most rewarding aspect of the book is its record of experimental projects testing new concepts that rapidly became

established elements of jet aircraft design The photographs of these largely forgotten aircraft give us an insight into the extraordinary technical challenges and the ambition and inventiveness of the designers and manufacturers who overcame them *Air Power in the Nuclear Age, 1945-84* M.J. Armitage,R. A. Mason,1985-09-20 **Innovation and the Arms Race** Matthew Evangelista,2023-08-15 Innovation and the Arms Race investigates the causes and mechanisms of the technological arms race between the United States and the Soviet Union Challenging the commonly held notion that Soviet weapons innovation processes simply mirror those of the United States Matthew Evangelista shows that the United States usually leads in introducing new military technology while the Soviets typically react to American initiatives Evangelista bases his study of pivotal nuclear weapons development decisions on a variety of US and USSR primary sources including the memoirs of weapons designers and scientists declassified intelligence analyses Soviet Academy of Science documents and Nikita Khrushchev's taped reminiscences He finds that in the United States impetus for innovation comes from the bottom at the initiative of corporate or government researchers and military officials whereas the centralized Soviet system produces innovations from the top in response to foreign developments A revelatory analysis of US military policy Soviet American relations and weaponry development Innovation and the Arms Race bears lessons for the study of great power competition and military innovation today *Air Power in the Nuclear Age, 1945-82* M.J. Armitage,R. A. Mason,1983-06-18 **NASA Technical Memorandum** ,1981 **The History of Air Intercept Radar & the British Nightfighter 1935-1959** Ian White,2007-05-30 This detailed history of Air Intercept radar traces the development of this vital military technology with the Royal Air Force during WWII In the years after World War I the United Kingdom was desperate to develop some form of protection from an enemy air strike As early as 1923 the British Army had devised sound mirrors that could detect aircraft up to twelve miles away This technical history traces the development of military radar technology from this early experimental phase to the creation of the first air to air radar systems and their uses in battle Historian Ian White sets this fascinating narrative within the larger political military economic and technological context of the era Through World War II Air Intercept radar was a vital asset in protecting RAF bomber forces as well as the country itself But developing the technology required the tireless work of physicists and engineers in the Air Ministry Research Establishment particularly members of the Establishment's Airborne Group working under Dr Edward Bowen Their Airborne Interception radars such as the AI Mk IV were used in Blenheim night fighters during the winter Blitz and by Mosquito during the Baedeker Raids This in depth history covers the introduction of centimetric technology at the Telecommunications Research Establishment the creation of centimetric AI and their installation in the Beaufighter and later marks of the Mosquito It describes the creation of the Radiation Laboratory at MIT and concludes with a section on further developments during the Cold War **Case Studies in the Achievement of Air Superiority** Benjamin Franklin Cooling (III),1994 *Case studies in the achievement of air superiority* , **The Naval Air War in Korea** Richard Hallion,2011-03-25 In The Naval Air War in Korea Dr Hallion has

captured the fact feeling and fancy of a very important conflict in aviation history including the highly significant facets of the transition from piston to jet propelled combat aircraft Norman Polmar author of Naval Institute Guide to the Ships and Aircraft of the U S Fleet 18th Edition Stalin and the Bomb David Holloway,2008-10-01 The classic and utterly engrossing study of Stalin s pursuit of a nuclear bomb during the Cold War by the renowned political scientist and historian Foreign Affairs For forty years the U S Russian nuclear arms race dominated world politics yet the Soviet nuclear establishment was shrouded in secrecy Then shortly after the collapse of the Soviet Union David Holloway pulled back the Iron Curtain with his marvelous groundbreaking study Stalin and the Bomb The New Yorker How did the Soviet Union build its atomic and hydrogen bombs What role did espionage play How did the American atomic monopoly affect Stalin s foreign policy What was the relationship between Soviet nuclear scientists and the country s political leaders David Holloway answers these questions by tracing the dramatic story of Soviet nuclear policy from developments in physics in the 1920s to the testing of the hydrogen bomb and the emergence of nuclear deterrence in the mid 1950s This magisterial history throws light on Soviet policy at the height of the Cold War illuminates a central element of the Stalinist system and puts into perspective the tragic legacy of this program environmental damage a vast network of institutes and factories and a huge stockpile of unwanted weapons **The Road To Berlin** John Erickson,2019-07-11 This book traces Russian campaigns from the counterattack at Stalingrad to the fall of Berlin and the capture of Prague It explores in detail Stalin s wartime relations with Roosevelt and Churchill and examines the evolution of his policies toward Poland and the Balkans Stalin's War with Germany: The road to Berlin John Erickson,1999-01-01 Completing the most comprehensive and authoritative study ever written of the Soviet German war Erickson presents the vivid and compelling story of the Red Army s epic struggle to drive the Germans from Russian soil Soviet Air Power Kenneth R. Whiting,1985 Secret Weapons and World War II Walter E. Grunden,2005 Grunden s analysis of this fundamental flaw in the Japanese war effort seamlessly weaves together science technology and military history to provide an entirely unique look at a crucial but understudied aspect of World War II Comparing the science and weapons programs of all the major combatants he demonstrates that Japan s failure was nearly inevitable given its paucity of strategic resources an inadequate industrial base the absence of effective centralized management to coordinate research military hostility toward civilian scientists and bitter interservice rivalries In the end Japan could not overcome these obstacles and thus failed to make the transition to the kind of Big Science it needed to ward off its enemies and dominate the Far East BOOK JACKET **International Warbirds** John C. Fredriksen,2001-08-01 In depth descriptions and photographs of the aircraft of 21 nations presented with a unique human dimension that goes behind the machines to the people involved Invaluable for specialists accessible to enthusiasts International Warbirds An Illustrated Guide to World Military Aircraft 1914 2000 puts the most legendary fighter aircraft of the 20th century developed outside the United States on vivid display It offers 336 illustrated biographies of the most significant warplanes used in squadron service from World

War I to the Balkan conflict including numerous models from Great Britain France Russia and Japan as well as notable machines from Israel Canada China India Brazil and other nations Entries span the history and scope of military aircraft from bombers and fighters to transports trainers reconnaissance craft sea planes and helicopters with each capsule history combining nuts and bolts technical data with the story of that model s evolution and use Together these portraits offer an exciting well researched tribute to visionary designers and builders as well as courageous pilots and crews across the globe and tell a vivid tale of how air power became such a decisive factor in modern warfare

Reader's Guide to Military History Charles Messenger, 2013-10-31 This book contains some 600 entries on a range of topics from ancient Chinese warfare to late 20th century intervention operations Designed for a wide variety of users it encompasses general reviews of aspects of military organization and science as well as specific wars and conflicts The book examines naval and air warfare as well as significant individuals including commanders theorists and war leaders Each entry includes a listing of additional publications on the topic accompanied by an article discussing these publications with reference to their particular emphases strengths and limitations
