National Identity and Foreign Policy Ilya Prizel, 1998-08-13 This book is based on the premise that the foreign policy of any country is heavily influenced by a society's evolving notions of itself Applying his analysis to Russia Poland and Ukraine the author argues that national identity is an ever changing concept influenced by internal and external events and by the manipulation of a polity's collective memory The interaction of the narrative of a society and its foreign policy is therefore paramount This is especially the case in East Central Europe where political institutions are weak and social coherence remains subject to the vagaries of the concept of nationhood Ilya Prizel's study will be of interest to students of nationalism as well as of foreign policy and politics in East Central Europe Air University Library Index to Military Periodicals, 1995 *The Siberian Curse* Fiona Hill, Clifford G. Gaddy, 2003 Hill and Gaddy frame the problems of Siberia more clearly and offer policy recommendations which are more concrete and coherent than any previous analyses of Siberia from Russian or foreign sources of which I am aware Robert Cottrell New York Review of Books Avoiding Nuclear Anarchy Graham T. Allison, 1996 Nuclear materials have never been more plentiful or more accessible to rogue states and terrorists In this study the authors analyze the consequences of such nuclear leakage for United States national security and argue that it is possibly the nation's **Shaping Europe's Military Order** Richard A. Falkenrath, 1995 The legal foundation of the contemporary European security order is the Treaty on Conventional Armed Forces in Europe CFE Negotiated by NATO and the Warsaw Pact states as the Cold War was ending and implemented as the new Europe took shape the CFE Treaty imposes strict limits on the armed forces of all the major European states This book takes a detailed look at the origins and evolution of the CFE negotiations and the impact of the CFE Treaty on European Security It draws extensively on interviews with participants in the CFE negotiations and offers a careful reconstruction of a process that contributed to the transformation of Cold War Europe a critical assessment of the treaty's contribution to security in post Cold War Europe and an evaluation of the lessons of CFE for future conventional arms control initiatives CSIA Studies in International Security No 6 **The Arms Production Dilemma** Randall Forsberg, 1994 The studies show how military strategy planned forces and the age of systems in the current inventory affect the domestic demand for new production how the recent drop in domestic demand affects arms industries and the extent to which governments and firms in the arms producing nations are turning to exports to sustain the industries In the shrinking arms market of the post Cold War era countries with advanced arms industries face difficult choices concerning force size arms production arms export and defense industrial capacity This book explores the links among these issues through a detailed study of the combat aircraft industries in the United States Russia Britain France Germany Italy and Sweden the seven countries that develop produce and export all of the world's technologically advanced weapon systems The studies show how military strategy planned

forces and the age of systems in the current inventory affect the domestic demand for new production how the recent drop in domestic demand affects arms industries and the extent to which governments and firms in the arms producing nations are turning to exports to sustain the industries Stunning changes in Russia's combat aircraft forces industry and strategy are detailed here for the first time as are expected future Russian combat aircraft exports to China Newly compiled data also show that in the United States and Russia and globally arms production for export will exceed production for domestic use for the first time in history starting in 1995 Arms production is thus increasingly dominated by commercial rather than security interests Ultimately at issue is whether governments will exploit the opportunity offered by the dramatic post Cold War contraction of the world arms market to reduce their armed forces and constrain international arms trade while shrinking the arms industry or keep pushing arms exports that generate new threats and justify larger armed forces more arms production and bigger arms industries

The Sanctions Paradox Daniel W. Drezner, 1999-08-26 Despite their increasing importance there is little theoretical understanding of why nation states initiate economic sanctions or what determines their success This book argues that both imposers and targets of economic coercion incorporate expectations of future conflict as well as the short run opportunity costs of coercion into their behaviour Drezner argues that conflict expectations have a paradoxical effect Adversaries will impose sanctions frequently but rarely secure concessions Allies will be reluctant to use coercion but once sanctions are used they can result in significant concessions Ironically the most favourable distribution of payoffs is likely to result when the imposer cares the least about its reputation or the distribution of gains The book's argument is pursued using game theory and statistical analysis and detailed case studies of Russia's relations with newly independent states and US efforts to halt nuclear proliferation on the Korean peninsula Publisher description

The Greek Paradox Graham Allison, Kalypso Nicolaidis, 1997-01-07 As a bridge between the East and West a pole of stability in the Balkans and a Mediterranean crossroads Greece could play a significant role in the post Cold War world But Greece's performance in domestic and international policy falls short of this promise The essays in The Greek Paradox look at some of the reasons for this gap and suggest possible political and economic reforms The contributors both scholars and policymakers examine a range of contemporary issues in the Balkans and on NATO's southern flank The essays shed light on nation building political and economic development modernization and post Cold War international relations Contributors Graham T Allison Gianna Angelopoulos Daskalaki P Nikiforos Diamandouros Michael S Dukakis Misha Glenny Dimitris Keridis F Stephen Larrabee Kalypso Nicola Dis Joseph S Nye Jr Alexis Papahelas Elizabeth Prodromou Monteagle Stearns Constantine Stephanopoulos Stavros B Thomadakis Basilios E Tsingos Loukas Tsoukalis Susan Woodward CSIA Studies in International Security

policy *Russian civil-military relations and the origins of the second Chechen war* Sz&ászdi, Lajos F., 2008-08-29 This book has relevance for those interested in understanding Russia's course in international relations under the leadership of Vladimir Putin. This book will inform the reader and is especially relevant in light of the events of 2008 in the Caucasus and the war in Georgia in particular. The author explains the ideology of Neo Eurasianism which in turn inspires the policy thinking of the Kremlin. Also studied is Putin's origins in the KGB from the previous posts of Secretary of the Security Council and Director of the FSB and his rise to power in the crucial year of 1999 when he became Russian Prime Minister. The author highlights the continuing trend of appointing high ranking officers of the Russian intelligence community to senior positions in the government studying this in the context of Russian civil military intelligence relations. The author reached the conclusion back in 2003 that the members of Russian intelligence hold the reins of power above the civilian and military elements of the Russian government. The author returns to the Kosovo Crisis of 1999 discussing also the motives that led the Kremlin and Putin to invade Chechnya for a second time in a decade. Parallels can be drawn to the 2008 Russian invasion of Georgia and the roots of the Neo Eurasianist ideology that is behind the two invasions are examined. This book will help the reader understand Russia's current and future distribution of power in the Caucasus, the Balkans and the world at large. Moscow's search for a multipolar world and its opposition to U.S. hegemony **Soviet Strategic Thought, 1917-91** Andrei A. Kokoshin, 1998-01-15 During the Cold War Westerners were obsessed with the military policies of the Soviet Union. Until the demise of the Soviet Union however few details of Moscow's thinking on military matters were available. In this book Andrei Kokoshin reveals how Soviet military theorists developed and debated the concepts that provided the basis for the Kremlin's defense policies. Drawing on Soviet era archives and unpublished materials he sheds light on this important chapter in the history of Russia and the world. The book covers three main themes: the relationship between politics and military strategy in the Soviet Union; how the Soviet political and military leadership assessed threats to Soviet security; the nature of future wars and methods of warfare; and the relationship between offense and defense in Soviet military strategy. Kokoshin places the strategic concepts behind Moscow's military policies in the context of internal and international struggles for power and assesses the future role of military power in Russia's national security strategy.
