Russians In The Pribilof Islands 1786-1867:

The Fur Farms of Alaska Sarah Crawford Isto, 2012-03-15 After its rudimentary beginning in 1749 fur farming in Alaska rose and fell for two centuries It thrived during the 1890s and again in the 1920s when rising fur prices caused a stampede for land and breed stock and led to hundreds of farms being started in Alaska within a few years The Great Depression and later the development of warm durable and lightweight synthetic materials during World War II brought further decline and eventual failure to the industry as the postwar economy of Alaska turned to defense and later to oil The Fur Farms of Alaska brings this history to life by capturing the remarkable stories of the men and women who made fur their livelihood For more than 200 years soft gold brought many people to Alaska Fur farming was Alaska s third largest industry in the 1920s and Sarah Isto writes of the many efforts successes and ultimately of the fur farming industry s failure This well researched history contextualizes current fox elimination projects on Alaska islands and explains the abandoned pens one stumbles across This is a story that has long needed to be written Joan M Antonson Alaska State Historian

Roth, Günter Merz, 2013-06-29 The general interest and attention paid to the use of the renewable natural resources of the world have increased greatly during the last decades This is due to the environmental dilemma into which mankind has got itself by the total disregard of ecological facts and laws the underpricing of natural resources and the overemphasis on economic development coupled with unimpeded rapid population growth and the preponderance of materialistic consumption oriented attitudes The management and use of natural resources such as forests grasslands rivers and lakes were formerly considered purely in a financial context whereas latterly a consciousness of their social function and the indirect economic benefits which can be derived from them has developed Thus as regards these traditional resources multi use concepts comprising economically oriented utilisation as well as recreational educational and social use have become widely accepted Conservation of natural resources for sustainable consumptive as well as non consumptive uses has been recognised as a key element for maintaining economic development all over the world Fortunately the industrialised countries have started to apply this principle themselves and in their technical and financial aid to the developing Third World countries This is manifest from policy documents such as the World Bank Policy on Development of Wild Lands issued in 1987 **Ocean Mammal Protection** United States.
