Price, 2016-05-26 Arizona is home to some of the region's most stunning national parks and monuments and has had a long tradition of strong federal agencies along with effective local governments developing and managing parklands Before World War II protecting sites from development seemed counterproductive to a state government dominated by extractive industries By the late 1950s this state that prided itself on being a tourist destination found its lack of state parks to be an embarrassment *Gateways to the Southwest* is a history of the creation of state parks in Arizona examining the ways in which different types of parks were created in the face of changing social values Jay Price tells how Arizona's parks emerged from the recreation and tourism

boom of the 1950s and 1960s were shaped by the environmental movement of the 1970s and 1980s and have been affected by the financial challenges that arose in the 1990s He also explains how changing political realities led to different methods of creating parks like Catalina Homol ovi Ruins and Kartchner Caverns In addition places that did not become state parks have as much to tell us as those that did By the time the need for state parks was recognized in Arizona most choice sites had already been developed and Price reveals how acquiring land often proved difficult and expensive State parks were of necessity developed in cooperation with the federal government other state agencies community leaders and private organizations As a result parks born from land exchanges partnerships conservation easements and other cooperative ventures are more complicated entities than the state park designation might suggest Price s study shows that the key issue for parks has not been who owns a place but who manages it and today Arizona s state parks are a network of lake based recreation historic sites and environmental education areas reflecting issues just as complex as those of the region s better known national parks Gateways to the Southwest is a case study of resource stewardship in the Intermountain West that offers new insights into environmental history as it illustrates the challenges and opportunities facing public lands all over America

Desert Cities Michael F. Logan, 2012-01-12 Phoenix is known as the Valley of the Sun while Tucson is referred to as The Old Pueblo These nicknames epitomize the difference in the public s perception of each city Phoenix continues to sprawl as one of America s largest and fastest growing cities Tucson has witnessed a slower rate of growth and has only one quarter of Phoenix s population This was not always the case Prior to 1920 Tucson had a larger population How did two cities with such close physical proximity and similar natural environments develop so differently *Desert Cities* examines the environmental circumstances that led to the starkly divergent growth of these two cities Michael Logan traces this significant imbalance to two main factors water resources and cultural differences Both cities began as agricultural communities Phoenix had the advantage of a larger water supply the Salt River which has four and one half times the volume of Tucson s Santa Cruz River Because Phoenix had a larger river it received federal assistance in the early twentieth century for the Salt River project which provided water storage facilities Tucson received no federal aid Moreover a significant cultural difference existed Tucson though it became a U S possession in 1853 always had a sizable Hispanic population Phoenix was settled in the 1870s by Anglo pioneers who brought their visions of landscape development and commerce with them By examining the factors of watershed culture ethnicity terrain political favoritism economic development and history *Desert Cities* offers a comprehensive evaluation that illuminates the causes of growth disparity in two major southwestern cities and provides a model for the study of bi city resource competition

Sonora Spring Haiku Judith Lauter, 2013-08-08 *Sonora Spring Haiku* by poet and neuroscientist Judith Lauter provides a photographic and poetic account of three spring months in the lush Sonoran desert near Tucson AZ In a radical departure from the natural settings of most classical haiku a world of misty wetness cranes pagodas and perhaps a solitary aged man these poems evoke a stony landscape of space sun and sharp

edges Such an extremely wide range of application for the form shows us that poetry is perhaps the most flexible of the literary arts capable of engaging almost any experience or geography

Fighting Sprawl and City Hall Michael F. Logan, 2016-12-15 The line is drawn in cities of the American West on one side chambers of commerce developers and civic boosters advocating economic growth on the other environmentalists and concerned citizens who want to limit what they see as urban sprawl While this conflict is usually considered to have its origins in the rise of environmental activism during the late 1960s opposition to urban growth in the Southwest began as early as the economic boom that followed World War II Evidence of this resistance abounds but it has been largely ignored by both western and urban historians **Fighting Sprawl and City Hall** now sets the record straight tracing the roots of antigrowth activism in two southwestern cities Tucson and Albuquerque where urbanization proceeded in the face of constant protest Logan tells how each of these cities witnessed multifaceted opposition to post war urbanization and a rise in political activism during the 1950s For each city he describes the efforts by civic boosters and local government to promote development showing how these booster government alliances differed in effectiveness tells how middle class Anglos first voiced opposition to annexations and zoning reforms through standard forms of political protest such as referendums and petitions then documents the shift to ethnic resistance as Hispanics opposed urban renewal plans that targeted barrios Environmentalism he reveals was a relative latecomer to the political arena and became a focal point for otherwise disparate forms of resistance Logan s study enables readers to understand not only these similarities in urban activism but also important differences for example Tucson provides the stronger example of resistance based on valuation of the physical environment while Albuquerque better demonstrates anti annexation politics For each locale it offers a testament to grass roots activism that will be of interest to historians as well as to citizens of its subject cities

Logan, 2006-09-01 Newcomers to Tucson know the Santa Cruz River as a dry bed that can become a rampaging flood after heavy rains Yet until the late nineteenth century the Santa Cruz was an active watercourse that served the region s agricultural needs until a burgeoning industrial society began to tap the river s underground flow The Lessening Stream reviews the changing human use of the Santa Cruz River and its aquifer from the earliest human presence in the valley to today Michael Logan examines the social cultural and political history of the Santa Cruz Valley while interpreting the implications of various cultures impacts on the river and speculating about the future of water in the region Logan traces river history through three eras archaic modern and postmodern to capture the human history of the river from early Native American farmers through Spanish missionaries to Anglo settlers He shows how humans first diverted its surface flow then learned to pump its aquifer and today fail to fully understand the river s place in the urban environment By telling the story of the meandering river from its origin in southern Arizona through Mexico and the Tucson Basin to its terminus in farmland near Phoenix Logan links developments throughout the river valley so that a more complete picture of the river s history emerges He also contemplates the future of the Santa Cruz by confronting the serious problems posed by groundwater pumping in Tucson and addressing the effects of the Central Arizona Project on the river valley Skillfully interweaving history with hydrology geology archaeology and anthropology The Lessening Stream makes an important contribution to the environmental history of southern Arizona It reminds us that because water will always be the focus for human activity in the desert we desperately need a more complete understanding of its place in our lives **Riding Shotgun with Norman Wallace** William Wyckoff, 2020-03-15 In Riding Shotgun with Norman Wallace award winning geographer William Wyckoff celebrates the photographic legacy of Norman Grant Wallace whose work as an Arizona highway engineer during the first half of the twentieth century afforded him the opportunity to survey every corner of the Grand Canyon State Possessing a passion for photography Wallace documented Arizona throughout his travels From 1906 to 1969 Wallace photographed the state s natural and rural landscapes its burgeoning infrastructure including roads bridges and dams and its towns and cities some of which experienced exponential growth following World War II Nearly one hundred years later Wyckoff retraces Wallace s southwestern travels using the engineer s photographs and meticulous notebooks as a guide The author rephotographs many of Wallace s iconic vantage points giving us a historical tour of Arizona a then and now viewpoint that also tells the personal story of Wyckoff s own vicarious travels with Wallace through Arizona s vast countryside and its urban centers and small towns ICASALS Newsletter International Center for Arid and Semi-arid Land Studies, 1992
