Sacred Cows and Golden Geese C. Ray Greek, 2000 Presents scientific evidence to support the authors contention that animal experimentation has not led to any significant advances in the treatment of human disease charges that the practice continues because of a faulty system of funding and urges scientists researchers veterinarians and physicians to speak out on the failure of animal experimentation as revealed in their own fields

Sacred Cows and Golden Geese C. Ray Greek, 2002 [The Ethics of Animal Experimentation](#) Donna Yarri, 2005-08-18 Donna Yarri presents an overview of the current discussion on the ethics of animal experimentation from a Christian standpoint

Making A Killing Bob Torres, 2007-11-01 Suggest to the average leftist that animals should be part of broader liberation struggles and once they stop laughing you'll find yourself casually dismissed With a focus on labor property and the life of commodities Making a Killing contains key insights into the broad nature of domination power and hierarchy It explores the intersections between human and animal oppressions in relation to the exploitative dynamics of capitalism Combining nuts and bolts Marxist political economy a pluralistic anarchist critique as well as a searing assessment of the animal rights movement Bob Torres challenges conventional anti capitalist thinking and convincingly advocates for the abolition of animals in industry and on the dinner plate Making A Killing is sure to spark wide debate in the animal rights and anarchist movements for years to come

Making A Killing Bob Torres Making a Killing draws a very straight line between capitalism and the oppressive system of animal agribusiness Drawing from social anarchist theory Torres provides a convincing argument that in order to fight animal exploitation we must also fight capitalism and in doing so animal rights activists will need to reconsider their methods and redirect their focus While his critiques of the animal rights movements large organizations may not earn him friends in high places such considerations are crucial to keeping the movement on track and for preventing stagnation Making a Killing is an important work from a new voice in animal advocacy that will surely spark heated discussions amongst activists from all corners of the movement Ryan MacMichael vegblog org In Making A Killing The Political Economy of Animal Rights Bob Torres takes an important and timely look at the animal rights movement calling for a synthetic approach to all oppression human and animal His analytical framework draws together Marxism social anarchist theory and an abolitionist approach to animal rights to provide a timely social analysis that will no doubt have profound effects on the animal rights movement literature Gary L Francione Distinguished Professor of Law Rutgers University Bob Torres s socioeconomic analysis of nonhuman animal use is a welcome and important addition to the understanding of human nonhuman relations at the beginning of the 21st century In particular Making a Killing makes vital a contribution to understanding the role of the property status of animals and the continuing strength of various welfarist positions on the ethics and indeed the economics of the human utilisation of other animals Making a Killing will become required reading for social scientists and others interested in modern social movements and the socioeconomic forces that shape their activities and their claims making Dr Roger Yates Lecturer in sociology at University College Dublin Republic of Ireland This is the book I ve been waiting for Making A Killing is a rare and powerful example of first rate scholarship a searing critique and lively declaration of the rights of animals and humans You will walk away from this book with a clear understanding as to why social justice movements for people must take animal rights seriously and vice versa Bob Torres has forever deepened my thinking about these relationships David Naguib Pellow vegetarian animal rights and anti racist activist and Professor of Ethnic Studies University of California San Diego and author of Garbage Wars The Struggle for Environmental Justice in Chicago and Resisting Global Toxics Transnational Movements for Environmental Justice Bob Torres is assistant professor of sociology at St Lawrence University received his PhD from Cornell and is co author of Vegan Freak Being Vegan in a Non Vegan World His writings have appeared in Critical Sociology The Journal of Latinos and Education International Journal of Occupational and Environmental Health and Satya magazine

What Will We Do If We Don't Experiment on Animals? Jean Swingle Greek,C. Ray Greek,2004 Drs Greek have written 2 books on why using animals as models for humans is not the best way to conduct medical research and drug testing During their lectures and debates the most commonly asked question was Well What will we use if we don t use animals What Will We Do If We Don t Experiment On Animals Medical Research for the Twenty first Century is the answer to that question Drs Greek explain briefly why one species cannot predict drug response for another

and describe what research and testing methods should be used today instead of animals They also describe where our biomedical research dollars should be spent if we are to have cures for cancer AIDS and Alzheimer s This book will appeal to science trained and general audiences animal lovers and science readers public policy analysts students patients and patient support groups and government watchdog groups What Will We Do If We Don t Experiment On Animals Medical Research for the Twenty first Century takes medical research out of the nineteenth and into the 21st century **Specious Science C.** Ray Greek, Jean Swingle Greek, 2002-01-01 Builds on the message of Sacred Cows and Golden Geese to understand why medical research on animals really harms humans *Theorizing Animals* Nik Taylor, Tania Signal, 2011-04-21 Utilising ideas from post modernism and post humanism this book challenges current ways of thinking about animals and their relationships with humans Including contributions from across the social sciences the book encourages readers to reflect upon taken for granted ways of conceptualising human relationships with animals It will be of interest to those in the broad field of human animal studies as well as those within most social science and humanities disciplines including sociology anthropology philosophy and social theory **Animals are the Issue** Linda S Katz, 2013-10-31 Supply your library with the best collection of resources on animal issues Animals are the Issue Library Resources on Animal Issues is a guide to books journals and Web sites on historic and modern animal treatment Expert librarians and scholars provide helpful resources showing what ideals and practical solutions exist in animal rights and welfare debates With this book students philosophers and politicians can find the best of written and electronic resources about the protection and ethical use of animals by humankind Animals are the Issue stands alone as a source for locating materials on animal protection and welfare This valuable guide will help librarians save time and money in locating diverse areas of information regarding animal consumption and exploitation The authors have noted what they consider to be the most essential resources for library collections This book offers references that discuss the utilization of animals by humans as companions in sports and entertainment in religion in science and education in industry in hunting Animals Are the Issue explores how animals are seen viewed and used by humans With bibliographies annotated lists and short commentaries by the authors on nearly every item you ll be able to supply your patrons with a highly effective animal rights welfare collection **An Odyssey with Animals** Adrian R Morrison, 2009-10-08 An Odyssey with Animals is the culmination of a veterinarian and scientist s years spent negotiating the divide between animal welfare and biomedical research Drawing on the disciplines of philosophy history ethics biology and animal behavior Morrison crafts a multi faceted argument in favor of using animals in research The result is a thought provoking intelligent and fair minded discussion of an incredibly charged subject of the past and present of animals relationships with humans and how and why we should be able to use them as we do **Eastern Orthodox Christianity and Animal Suffering** Christine Nellist, 2018-10-25 This book is the first academic work in Eastern Orthodox theological literature on the subject of animal suffering and human soteriology It represents a natural progression of the

contemporary Eastern Orthodox academic debate on the environment and will be of interest not only to academic scholars in theology religion philosophy and ethics but also to the wider Christian and secular communities Using Biblical and Patristic teachings together with new social science research and contemporary science it presents arguments that animal suffering is against God s Will and that the abuse or misuse of animals or indifference to animal suffering will result in negative consequences for human salvation The book posits a revisionist interpretation of the Noahic narrative when addressing the challenging question of why God allows the dispensation of animals as food and offers compelling arguments on why the contemporary animal food production industries and animal testing model should be rejected *Bioethics* Udo

Haynes, 2008-07-27 Members of the animal welfare science community which includes both scientists and philosophers have illegitimately appropriated the concept of animal welfare by claiming to have given a scientific account of it that is more objectively valid than the more sentimental account given by animal liberationists This strategy has been used to argue for merely limited reform in the use of animals This strategy was initially employed as a way of sympathetically responding to the abolitionist claims of anti vivisectionists who objected to the use of animals in research It was subsequently used by farm animal scientists The primarily reformist as

opposed to abolitionist goals of this community make the false assumption that there are conditions under which animals may be raised and slaughtered for food or used as models in scientific research that are ethically acceptable. The tendency of the animal welfare science community is to accept this assumption as their framework of inquiry and thus to discount certain practices as harmful to the interests of the animals that they affect. For example, animal welfare is conceptualized in such a way that death does not count as harmful to the interests of animals nor prolonged life a benefit.

Routledge Handbook of Animal Welfare Andrew Knight, Clive Phillips, Paula Sparks, 2022-08-15. This handbook presents a much needed and comprehensive exploration of the rapidly growing fields of animal welfare and law. In recent years there has been increasing attention paid to our complex multifaceted relationships with other animals and in particular the depth and breadth of various societal uses of animals. This has led to a reconsideration of their moral and social status which has sometimes challenged the interests of those who use animals. In such a contested domain sound evidence and reasoning become particularly important. Through firm commitment to such principles this book explores the biological foundations for the moral consideration of animals and for evolving conceptualisations of animal welfare. It reviews in detail the welfare concerns associated with numerous forms of animal use. The inclusion of key recent developments such as climate change, pandemics and antimicrobial resistance ensures this text is among the most current in its field. The ethical implications of the various uses of animals by society are considered and chapters provide important recommendations for reforms of practice, law or policy. The status of animal law internationally and in major world regions is reviewed. Finally, the book considers human behavioural change and strategies for improving stakeholder communication and education. The handbook is essential reading for students and scholars of animal welfare, animal law and animal ethics everywhere and for policy makers and other professionals working in the animal welfare sector.

Animal Rights Kevin Hile, 2009. From questions over whether it is appropriate to eat meat or to wear fur or leather, this title examines all sides of this very controversial issue.

Animal Lives Matter Raymond Wacks, 2024-02-13. *Animal Lives Matter* provides a comprehensive analysis of the legal, philosophical and ethical aspects of animal rights. It argues that the subject extends beyond the matter of our obligations towards animals to include our wider responsibilities for protecting the environment. Drawing on numerous moral, political, legal, religious and philosophical theories including utilitarianism, deontology, rights theory, social contractarianism and the capabilities approach, the author meticulously examines the questions of sentience, speciesism, personhood and human exceptionalism. Lucid, nuanced and academically rigorous, this important book will be an essential resource for scholars of law, politics, philosophy, ethics as well as policy makers and the general reader.

The Rise and Fall of Animal Experimentation Richard J. Miller, 2023. Written by a scientist with over 40 years of laboratory experience, *The Rise and Fall of Animal Experimentation* critically examines the assumption that animal experimentation is necessary to the advancement of biomedical research, whether animal based research achieves its aims and if there are alternatives to performing animal based science.

Perspectives on Human-Animal Communication Emily Plec, 2013-01-04 Despite its inherent interdisciplinarity the Communication discipline has remained an almost entirely anthropocentric enterprise This book represents early and prominent forays into the subject of human animal communication from a Communication Studies perspective an effort that brings a discipline too long defined by that fallacy of division human or nonhuman into conversation with animal studies biosemiotics and environmental communication as well as other recent intellectual and activist movements for reconceptualizing relationships and interactions in the biosphere This book is a much needed point of entry for future scholarship on animal human communication as well as the whole range of communication possibilities among the more than human world It offers a groundbreaking transformation of higher education by charting new directions for communication research policy formation and personal and professional practices involving animals

The Emotional Lives of Animals Marc Bekoff, 2024-04-09 A seminal exploration of animal emotion sentience and cognition revised and expanded to incorporate a surge of new science When award winning scientist Marc Bekoff penned the first edition of this book in 2007 he predicted that over time our understanding of animal cognition and emotion would grow richer more accurate and possibly different Since then not only has the field seen an explosion of new and startling research but the popular interest in the subject has grown as well spawning countless podcasts articles and bestselling books Bekoff skillfully blends extraordinary stories of animal joy empathy grief embarrassment anger and love with the latest scientific research confirming the existence of emotions that common sense and experience have long implied Filled with light humor and compassion The Emotional Lives of Animals is a clarion call for reassessing both how we view and how we treat animals
