Women and Educational Leadership Margaret Grogan,Charol Shakeshaft,2010-11-11 This groundbreaking book presents a new way of looking at leadership that is anchored in research on women leaders in education The authors examine how successful women in education lead and offer suggestions and ideas for developing and honing these exemplary leadership practices Women and Educational Leadership

shows how the qualities that characterize women's approaches to leadership differ from traditional approaches whether the traditional leader is a woman or a man. The authors reveal that women leaders are more collaborative by nature and demonstrate a commitment to social justice. They tend to bring an instructional focus to leadership, include spiritual dimensions in their work, and strive for balance between the personal and professional. This important book offers a new model of leadership that shifts away from the traditional heroic notion of leadership to the collective account of leadership that focuses on leadership for a specific purpose like social justice. The authors include illustrative examples of leaders who have brought diverse groups to work toward common ground. They also show how leadership is a way to facilitate and support the work of organizational members. The ideas and suggestions presented throughout the book can help the next generation fulfill the promise of a new tradition of leadership.

Women and Educational Leadership is part of the Jossey Bass Leadership Library in Education series. **Leadership Gender And Culture In Education** Collard, John, Reynolds, Cecilia, 2004-10-01. This rich explorative book examines the intricacies of gender, sexuality, ethnicity, and class and how these complex influences weave their patterns in the daily lives of leaders. It achieves the difficult balance between acknowledging differences as well as unifying elements. The book also raises many questions about the context for leadership and examines the central issues of leadership for what? What are leaders there to do and for whom? To ensure that students achieve higher examination scores or to promote equity and social justice? This book offers many fresh insights into these and other important questions. Professor Kathryn Riley, Institute of Education, University of London. This book features chapters by leading international scholars on gender and educational leadership. Drawing on research in schools in the United Kingdom, Australia, New Zealand, Sweden, the United States, and Canada, it introduces new discussions about the impact of gender, race, class, institutional setting, and recent ideologies on leadership discourses. The book shows how early research has overemphasized gender stereotypes and tended to simplify and polarize the ways men and women lead. Looking at differences and similarities in how men and women take on and exercise leadership roles, the authors counter essentialist claims based on biological, psychological, and sociological theories that stress gender difference. The discussions employ sophisticated understandings of gender relations and leadership discourses in today's globalized context. The book is for students and scholars studying leadership and for leaders in different educational contexts around the world.
