Sacred Game:

Game Day and God Eric Bain-Selbo, 2009 Game Day and God Football Faith and Politics in the American South takes seriously the often stated assertion that college football in the South is a religion To this end Eric Bain Selbo draws upon a wide range of theoretical approaches in religious studies and cultural criticism He also relies upon field research on several campuses in the Southeastern Conference where he interviewed fans and experienced game day Consequently the author is able to make the case that college football does function religiously for many people in the South In addition the author introduces key concepts and theories of religion and culture to a general audience Game Day and God also recounts the role that college football has played in Southern history and culture Going back as far as the Civil War the work explains the cultural meaning of college football in the South delivering a much needed critical perspective to the subject Scholars of religion will find the work a compelling extension of key concepts and theories to an otherwise secular activity Scholars of American culture and sports will find the work to be an interesting case study one that unlike much work in the area focuses our attention on the religious dimension of the phenomenon of sport in American culture And general readers will find that college football or any sport can be much more than they imagined as well as discover important theories with which to make sense of the complexity of our daily lives Book jacket

Spirituality, Sport, and Doping: More than Just a Game Tracy J. Trothen, 2018-10-24 This book explores the deeper meaning of sports Drawing on contemporary research the author makes a strong case for why we should see sport not only in terms of religion but more importantly as a possible location for spiritual meaning Taking this a step farther she considers how gene editing robotics and other biomedical technological enhancements affect not only sports performances but experiences of sport as sacred In addition the author explores what difference it might make to the enhancement debate if sports spirituality is taken seriously The author is not afraid to explore the issue in all its complexity Yet the argument she presents is both meaningful and accessible This investigation applies insights from Christian theology applied ethics psychology and sports studies From lightweight tennis racquets to anabolic steroids athletes have long used technology and science to improve their performances But until now no one has asked how biomedical technological enhancements might affect the undervalued spiritual dimension of sport This book presents rich insights into the connection between sports spirituality and human enhancement technologies It will appeal to researchers athletes and sports followers and undergraduate and graduate students in ethics sport religion or theology

The Love of Nature and the End of the World Shierry Weber NicholSEN,2003-02-28 A psychological exploration of how the love of nature can coexist in our psyches with apathy toward environmental destruction Virtually everyone values some aspect of the natural world Yet many people are surprisingly unconcerned about environmental issues treating them as the province of special interest groups Seeking to understand how our appreciation for the beauty of nature and our indifference to its destruction can coexist in us Shierry Weber NicholSEN explores dimensions of our emotional experience with the natural world that are so deep and painful that they often remain unspoken The Love of Nature and the End of the World is a gathering of meditations and collages Its evocations of our emotional attachment to the natural world and the emotional impact of environmental deterioration are meant to encourage individual and collective reflection on a difficult dilemma NicholSEN draws on work in environmental philosophy and ecopsychology the writings of psychoanalytic thinkers such as Wilfred Bion Donald Meltzer and D W Winnicott and ideas from Buddhist and Sufi traditions She shows how our emotional responses to the vulnerabilities of the natural world range from intense caring and compassion through grief and outrage to diffuse depression Individual chapters focus on silence and the process whereby we move from the unspoken to the spoken the love of nature the perceptual reciprocity with the natural world to which we might mature beauty in the human and natural realms the psychological impact of the destruction of the natural world and reflections on the future

A Reenchanted World James William Gibson,2009-04-14 A surprising and enlightening investigation of how modern society is making nature sacred once again For more than two centuries Western cultures as they became ever more industrialized increasingly regarded the

natural world as little more than a collection of useful raw resources The folklore of powerful forest spirits and mountain demons was displaced by the practicalities of logging and strip mining the traditional rituals of hunting ceremonies gave way to the indiscriminate butchering of animals for meat markets In the famous lament of Max Weber our surroundings became disenchanted with nature s magic swept away by secularization and rationalization But now as acclaimed sociologist James William Gibson reveals in this insightful study the culture of enchantment is making an astonishing comeback From Greenpeace eco warriors to evangelical Christians preaching creation care and geneticists who speak of human animal kinship Gibson finds a remarkably broad yearning for a spiritual reconnection to nature As we grapple with increasingly dire environmental disasters he points to this cultural shift as the last utopian dream the final hope for protecting the world that all of us must live in

Football and Social Sciences in Brazil Sérgio Settani Giglio, Marcelo Weishaupt Proni, 2021-11-02 This book presents a kaleidoscopic view of the multidisciplinary field of research developed within Brazilian social sciences to study football as a major cultural and social phenomenon in the country As a contributed volume it brings together chapters authored by researchers from different disciplines such as sociology anthropology political science history geography economy communication studies and physical education who contributed to make Brazilian football a multifaceted object of study for the human and social sciences The book is divided in four parts The first two parts are dedicated to the classic areas in which the best known research lines are concentrated part one focuses on politics and history while part two is dedicated to sociology and anthropology The third part brings together studies from other four different areas communication studies geography economy and physical education The fourth part is organized not by disciplines but around transversal themes such as gender violence fans and racism The varied approaches and different interpretations brought together in this book seek to provide an overview of the fertile academic debate that has stimulated the renewal of scientific research on football in Brazil which makes *Football and Social Sciences in Brazil* a useful resource for researchers from different disciplines within the human and social sciences interested in the study of football as major cultural and social phenomenon all over the world

Playing Cards and the Game of Living Well Kenneth P. Langer, 2016-02 New ways to look at those old playing cards including symbolic representations insights into tough problems and even a few new games If Life Is a Game, How Come I'm Not Having Fun? Paul Brenner, 2001-04-19 In this lively and enlightening book Paul Brenner suggests that treating life s events and everyday activities as a game would lead to a more socially functional and effective society Through compelling suggestions and dynamic anecdotes he conceptualizes all our economic political social and spiritual pursuits in terms of role play and demonstrates the contribution this perspective can make to the happiness of individuals and to the systemic welfare of an increasingly complex social order

Literature & Pedagogy Anthony Cordingley, 2025-04-01 Building upon the approach to reading literature pioneered by Bruce Gardiner at the University of Sydney for over four decades *Literature and Pedagogy* is devoted to the way that texts literary texts in particular seek to

instruct us Bruce Gardiner has inspired generations of teachers and scholars in the field of literary criticism He stands for a scholarly ethos which is at risk of disappearing His distinctive academic career which was entirely devoted to research led teaching invites us to think about the relationships between literary studies and pedagogy It also invites us to ask what role a unique pedagogical style plays in the evolution of a discipline How does intergenerational transmission between teacher and student play out both within and beyond disciplinary boundaries This collection explores these questions while also documenting Gardiner's methods of scholarly as much as professional resistance to the neo liberalisation and neo conservatism of contemporary academic culture Contributors draw from inspiring encounters with him to reflect upon the rhetoric and motifs of pedagogy within literary works They put Gardiner's mode of reading into practice by offering new interpretations of pedagogical mechanisms employed within important literary works from the seventeenth century to the present and of cultural phenomena like colonial interpretations of the Australian lyrebird's song The volume also offers pieces inspired by Gardiner such as poetry art translation and creative non fiction as well as three unpublished lectures by Gardiner himself Techniques and methodologies of literary education are traditionally believed to offer students the keys with which to unlock the secrets of texts and foster their appreciation Literature and Pedagogy offers a new perspective showing teachers and students of both education and literature how literary works present their own methods for reflecting critically upon how and why we learn read and teach

Relentless Love Edwin Carl Smith, 2004 Ed Smith defines enchantment as that place where our life and our deepest dreams merge and he maintains that it is our true nature In *Relentless Love* he proposes that we can live lives of enchantment through the practice of relentless love He inspires us to create a world based on our intention to love and our faith in life and contends that evolution is propelling us to do so He defines evolution as events you do not like that converge to create a possibility you could not anticipate This is an original lucid voice with something very compelling and vital to say that can change all of our lives

Library of Congress Subject Headings Library of Congress. Cataloging Policy and Support Office, 2004 *Interface* Branden Hookway, 2014-04-04 A cultural theory of the interface as a relation that is both ubiquitous and elusive drawing on disciplines from cultural theory to architecture In this book Branden Hookway considers the interface not as technology but as a form of relationship with technology The interface Hookway proposes is at once ubiquitous and hidden from view It is both the bottleneck through which our relationship to technology must pass and a productive encounter embedded within the use of technology It is a site of contestation between human and machine between the material and the social between the political and the technological that both defines and elides differences A virtuoso in multiple disciplines Hookway offers a theory of the interface that draws on cultural theory political theory philosophy art architecture new media and the history of science and technology He argues that the theoretical mechanism

of the interface offers a powerful approach to questions of the human relationship to technology Hookway finds the origin of the term interface in nineteenth century fluid dynamics and traces its migration to thermodynamics information theory and cybernetics He discusses issues of subject formation agency power and control within contexts that include technology politics and the social role of games He considers the technological augmentation of humans and the human machine system discussing notions of embodied intelligence Hookway views the figure of the subject as both receiver and active producer in processes of subjectification The interface he argues stands in a relation both alien and intimate vertiginous and orienting to those who cross its threshold *The Digital Role-Playing Game and Technical Communication* Daniel Reardon, David

Wright, 2021-04-22 With annual gross sales surpassing 100 billion U S dollars each of the last two years the digital games industry may one day challenge theatrical release movies as the highest grossing entertainment media in the world In their examination of the tremendous cultural influence of digital games Daniel Reardon and David Wright analyze three companies that have shaped the industry Bethesda located in Rockville Maryland USA BioWare in Edmonton Alberta Canada and CD Projekt Red in Warsaw Poland Each company has used social media and technical content in the games to promote players belief that players control the companies game narratives The result has been at times explosive as empowered players often attempted to co op the creative processes of games through discussion board forum demands fund raising campaigns to persuade companies to change or add game content and modifications modding of the games through fan created downloads The result has changed the way we understand the interactive nature of digital games and the power of fan culture to shape those games

The Necessity of Theater Paul Woodruff, 2008-04-30 What is unique and essential about theater What separates it from other arts Do we need theater in some fundamental way The art of theater as Paul Woodruff says in this elegant and unique book is as necessary and as powerful as language itself Defining theater broadly including sporting events and social rituals he treats traditional theater as only one possibility in an art that at its most powerful can change lives and as some peoples believe bring a divine presence to earth *The Necessity of Theater* analyzes the unique power of theater by separating it into the twin arts of watching and being watched practiced together in harmony by watchers and the watched Whereas

performers practice the art of being watched making their actions worth watching and paying attention to action choice plot character mimesis and the sacredness of performance space audiences practice the art of watching paying close attention A good audience is emotionally engaged as spectators their engagement takes a form of empathy that can lead to a special kind of human wisdom As Plato implied theater cannot teach us transcendent truths but it can teach us about ourselves Characteristically thoughtful probing and original Paul Woodruff makes the case for theater as a unique form of expression connected to our most human instincts The Necessity of Theater should appeal to anyone seriously interested or involved in theater or performance more broadly *Indian Religious Freedom Issues* United States.
