SPECIAL OFFER
30% discount for a complete set order 5 vols The Romanticism series in the Comparative History of Literatures in European Languages is the result of a remarkable international collaboration The editorial team coordinated the efforts of over 100 experts from more than two dozen countries to produce five independently conceived yet interrelated volumes that show not only how Romanticism developed and spread in its principal European homelands and throughout the New World but also the ways in which the affected literatures in reaction to Romanticism have redefined themselves on into Modernism A glance at the index of each volume quickly reveals the extraordinary richness of the series total contents Romantic Irony sets the broader experimental parameters of comparison by concentrating on the myriad expressions of irony as one of the major impulses in the Romantic philosophical and artistic revolution and by combining cross cultural and interdisciplinary studies with special attention also to literatures in less widely diffused language streams Romantic Drama traces creative innovations that deeply altered the understanding of genre at large fed popular imagination through vehicles like the opera and laid the foundations for a modernist theater of the absurd Romantic Poetry demonstrates deep patterns and a sharing of crucial themes of the revolutionary age which underlie the lyrical expression that flourished in so many languages and environments Nonfictional Romantic Prose assists us in coping with the vast array of writings from the personal and intimate sphere to modes of public discourse including Romanticism s own self commentary in theoretical statements on the arts society life the sciences and more Nor are the discursive dimensions of imaginative literature neglected in the closing volume Romantic

The Ontological Roots of Phenomenology Anna Varga-Jani, 2022-02-09 In The Ontological Roots of Phenomenology Rethinking the History of Phenomenology and Its Religious Turn Anna Jani examines the common methodological background of phenomenology Through attention to the phenomenon of being the existential experience of religiosity can be phenomenologically described by the ontological difference between being and beings Jani demonstrates that the methodological inquiries connect closely with the ontological source of phenomenology First she elaborates on the contributions of Hedwig Conrad Martius Roman Ingarden and Edith Stein from the point of view of Heidegger's influence on the early phenomenologists from Husserl's students Second she analyzes Heidegger's reinterpretation of his own earlier thinking after the turn which is formulated in the idea of the new beginning of philosophical thinking in the Contributions to Philosophy In the context of clarifying the difference between being and beings her third hypothesis about Ric ur's critique of Heidegger reveals an ethical level The primordially of the ethical dimension of the action reveals the ontological foundation of the hermeneutical phenomenological situation

The Truth of Realism John Walker, 2017-12-02 In his new book Walker offers a radical reassessment of the German realist novel in the nineteenth century Especially in the English speaking world

German narrative realism has persistently been interpreted as the literary expression of an ideology of the aesthetic. The German realist novel is alleged to reflect philosophical idealism to reject the prose of modern society in favour of the poetry of the inner aesthetic life. This book challenges that received view. Walker argues that German narrative realism should be read not only in relation to but in crucial respects against the dominant philosophical idiom of nineteenth century Germany. German narrative realism often functions as a critique of the idea and ideology of inwardness in nineteenth century German culture. To understand this the author argues we must reread German realist novels above all as narratives not as the supposed reflection of philosophical categories. The core of the book is therefore the close reading of eight of the best known realist novels in German by Keller, Raabe and Fontane. This reading shows how the German realist novel far from transposing the assumptions of aesthetic idealism into narrative form exposes the real consequences of those assumptions in the culture and society of its time. John Walker is Head of the School of Languages, Linguistics and Culture at Birkbeck University of London.

The Oxford Handbook of German Philosophy in the Nineteenth Century Michael N. Forster, Kristin Gjesdal, 2015-02-05

The Oxford Handbook of German Philosophy in the Nineteenth Century is the first collective critical study of this important period in intellectual history. The volume is divided into four parts. The first part explores individual philosophers including Fichte, Hegel, Schopenhauer, Marx and Nietzsche amongst other great thinkers of the period. The second addresses key philosophical movements: Idealism, Romanticism, Neo-Kantianism and Existentialism. The essays in the third part engage with different areas of philosophy that received particular attention at this time including philosophy of nature, philosophy of mind, philosophy of language, philosophy of history and hermeneutics. Finally the contributors turn to discuss central philosophical topics from skepticism to materialism, from dialectics to ideas of historical and cultural Otherness and from the reception of antiquity to atheism. Written by a team of leading experts, this Handbook will be an essential resource for anyone working in the area and will lead the direction of future research.
