Saemtliche Werke Volume 12:

Volume 12, Tome I: Kierkegaard's Influence on Literature, Criticism and Art Jon Stewart, 2016-12-05 While Kierkegaard is primarily known as a philosopher or religious thinker his writings have also been used extensively by literary writers critics and artists worldwide who have been attracted to his creative mixing of genres his complex use of pseudonyms his rhetoric and literary style and his rich images parables and allegories The goal of the present volume is to document this influence in different language groups and traditions Tome I explores Kierkegaard s influence on literature and art in the Germanophone world He was an important source of inspiration for German writers such as Theodor Fontane Thomas Mann Rainer Maria Rilke Alfred Andersch and Martin Walser Kierkegaard s influence was particularly strong in Austria during the generation of modernist authors such as Rudolf Kassner Karl Kraus Robert Musil and Hermann Broch Due presumably in part to the German translations of Kierkegaard in the Austrian cultural journal Der Brenner Kierkegaard continued to be used by later figures such as the novelist and playwright Thomas Bernhard His thought was also appropriated in Switzerland through the works of Max Frisch and Friedrich D rrenmatt The famous Czech author Franz Kafka identified personally with Kierkegaard s love story with Regine Olsen and made use of his reflections on this and other topics The Seasons Luke Fischer, David Macauley, 2021-07-01 Although the seasons have been a perennial theme in literature and art their significance for philosophy and environmental theory has remained largely unexplored This pioneering book demonstrates the ways in which inquiry into the seasons reveals new and illuminating perspectives for philosophy environmental thought anthropology cultural studies aesthetics poetics and literary criticism The Seasons opens up new avenues for research in these fields and provides a valuable resource for teachers and students of the environmental humanities The innovative essays herein address a wide range of seasonal cultures and geographies from the traditional Western model of the four seasons spring summer fall and winter to the Indigenous seasons of Australia and the Arctic Exemplifying the crucial importance of interdisciplinary research The Seasons makes a compelling case for the relevance of the seasons to our daily lives scientific understanding diverse cultural practices and politics **Paracelsus's Theory of Embodiment** Amy Eisen Ciso, 2015-09-30 Paracelsus has been called the father of modern chemistry and is legendary for his treatment of syphilis This work argues that Paracelsus developed an understanding of the body as composed of two distinct sexes revolutionizing early modern conceptions of the female body as an inversion of or flawed approximation of the male body **Tragedies of Spirit** Theodore George, 2012-02-01 In Tragedies of Spirit Theodore D George engages Hegel s Phenomenology of Spirit to explore the philosophical significance of tragedy in post Kantian continental thought George follows lines of inquiry originally developed by Nietzsche Heidegger Gadamer and Derrida and takes as his point of departure the concern that Hegel s speculative philosophy forms a summit of modernity that the present historical time is called to interrogate Yet George argues that Hegel s larger speculative ambitions in the Phenomenology compel him to turn to the resource of tragedy in order to give voice to

issues of incommensurability discontinuity otherness strife and crisis From this standpoint Hegel's interest in the tragic proves to be more pervasive and to run deeper than has previously been recognized The author shows that Hegel's reliance upon the tragic not only stretches and tests assumptions of speculative philosophy but also illuminates original insights into human finitude While situating Hegel's approach to tragedy as part of a broader response to Kant George also contextualizes Hegel's interest in tragedy with reference to figures in German Idealism and Romanticism such as Schelling Hölderlin and Schlegel

A House Built on Sand Noretta Koertge, 1998-08-27 Cultural critics say that science is politics by other means arguing that the results of scientific inquiry are profoundly shaped by the ideological agendas of powerful elites They base their claims on historical

case studies purporting to show the systematic intrusion of sexist racist capitalist colonialist and or professional interests into the very content of science Physicist Alan Sokal recently poked fun at these claims by foisting a sly parody of the genre on the unwitting editors of the cultural studies journal *Social Text* touching off a still unabated torrent of editorials articles and heated classroom and Internet discussion This hard hitting collection picks up where Sokal left off The essayists offer crisp and detailed critiques of case studies offered by the cultural critics as evidence that scientific results tell us more about social context than they do about the natural world Pulling no punches they identify numerous crude factual blunders e g that Newton never performed any experiments and egregious errors of omission such as the attempt to explain the slow development of fluid dynamics solely in terms of gender bias Where there are positive aspects of a flawed account or something to be learned from it they do not hesitate to say so Their target is shoddy scholarship Comprising new essays by distinguished scholars of history philosophy and science including Sokal himself this book raises a lively debate to a new level of seriousness

The Tragic Absolute David Farrell Krell, 2005 Exposes the core of tragic absolutes in German Romantic and Idealist philosophy

Between Transcendence and Historicism Brian K. Etter, 2006-06-01 Between Transcendence and Historicism explores Hegel's aesthetics within the larger context of the tradition of theoretical reflection to emphasize its unique ability to account for traditional artistic practice Arguing that the concept of the ethical is central to Hegel's philosophy of art Brian K Etter examines the poverty of modernist aesthetic theories in contrast to the affirmation by Hegel of the necessity of art He focuses on the individual arts in greater detail than is normally done for Hegel's aesthetics and considers how the dual constitution of the ethical nature of art can be justified both within Hegel's own philosophical system and in terms of its relevance to the dilemmas of modern social life Etter concludes that the arts have a responsibility to represent the goodness of existence the ideal and the ethical life in dignifying the metaxological realm through their beauty

Volume 10, Tome I: Kierkegaard's Influence on Theology Jon Stewart, 2016-12-05 Kierkegaard has always enjoyed a rich reception in the fields of theology and religious studies This reception might seem obvious given that he is one of the most important Christian writers of the nineteenth century but Kierkegaard was by no means a straightforward theologian in any traditional sense He had no enduring interest in some of the main fields of theology such as church history or biblical studies and he was strikingly silent on many key Christian dogmas Moreover he harbored a degree of animosity towards the university theologians and churchmen of his own day Despite this he has been a source of inspiration for numerous religious writers from different denominations and traditions Tome I is dedicated to the reception of Kierkegaard among German Protestant theologians and religious thinkers The writings of some of these figures turned out to be instrumental for Kierkegaard's breakthrough internationally shortly after the turn of the twentieth century Leading figures of the movement of dialectical theology such as Karl Barth Emil Brunner Paul Tillich and Rudolf Bultmann spawned a steadily growing awareness of and interest in Kierkegaard's thought among generations of German theology students Emanuel Hirsch was

greatly influenced by Kierkegaard and proved instrumental in disseminating his thought by producing the first complete German edition of Kierkegaard's published works Both Barth and Hirsch established unique ways of reading and appropriating Kierkegaard which to a certain degree determined the direction and course of Kierkegaard studies right up to our own times

We Have Always Been Transcultural: The Arts as an Example Wolfgang Iversen, 2024-06-17 Wolfgang Iversen demonstrates for the first time that transculturality the mixed constitution of cultures is by no means only a characteristic of the present but has de facto determined the composition of cultures since time immemorial The historical transculturality is demonstrated using examples from the arts While transculturality was often viewed with reservation where political social or psychological levels were at stake it was rather welcomed and appreciated in the field of art The book therefore demonstrates the historical prevalence of transculturality via all areas of art and does so with respect to all cultures and continents of our world

Ideas and Events Leonard Krieger, 1992-11 Leonard Krieger has long been revered as a contemporary master historian With an eye toward placing his critical achievements before an expanded readership he helped compile this core collection of his most important essays Together these essays bring under a single cover the key themes and ideas of his life's work to serve as a handbook for intellectual history and historians of every stripe This book reflects Krieger's conviction that the value of intellectual history is as a source of orientation in a world of information overload In Krieger's hands intellectual history has stressed thinking through the relations between ideas and events rather than the compilation and recapitulation of mere facts and historical categories The essays in this collection cover a range of topics including history of ideas intellectual history early modern political history German political history Hegel Marx and more Many of these essays are already classics of historical scholarship With the demise of the Soviet Union and state sponsored Marxism and with the reunification of Germany Krieger's history takes on new relevance and a renewed importance With a splendid introduction by Michael Perman and an extensive bibliography of Krieger's most important books and essays this is a must read for every serious student of modern history Leonard Krieger was University Professor Emeritus in the Department of History at the University of Chicago until his death in 1990

Putting God on the Map Erin Kidd, Jakob Karl Rinderknecht, 2018-09-15 Since the middle of the last century the emergence and development of fields as diverse as artificial intelligence evolutionary science cognitive linguistics and neuroscience have led to a greater

understanding of the ways in which humans think One of the major discoveries involves what researchers refer to as conceptual mapping According to theories of conceptual mapping human thought is profoundly shaped by the ability to make connections Simply put human thinking is metaphorical all the way down This insight has revolutionized the way in which scientists and philosophers think about the mind body problem the formation and function of language and even the development of scientific progress itself Until recently however this research has gone largely unnoticed within Christian theology But this revolution in understanding human cognition calls for broader and richer engagement with theology and religious studies How does this new insight into human meaning making bear on our understanding of religious meaning making And how might Christian theology interpret and respond to this new understanding of the development of human thought This edited volume offers an introduction to conceptual mapping that is accessible to those with no previous knowledge of the field and demonstrates the substantial resources this interdisciplinary research has for thinking about a variety of theological questions The book begins with a chapter introducing the reader to the basics of conceptual mapping The remaining chapters apply these insights to a variety of theological topics including anthropology sacramental theology biblical studies ecumenical theology and ethics

Augustine, Rahner, and Trinitarian Exegesis Martin E. Robinson, 2024-05-02 Through close and sustained analysis of Augustine's exegesis of Scripture Robinson argues that Augustine's Trinitarian exegesis offers significant though not inexhaustible support for Rahner's Trinitarian project and particularly his Grundaxiom Firstly he posits that Augustine provides weighty biblically rich support for Rahner's Trinitarian agenda at exactly those points where Rahner is explicitly critical of Augustine and the Augustinian Western tradition overcoming various weaknesses detected in the later tradition and pre-empting many of Rahner's later solutions Secondly and consequently Robinson suggests that Augustine offers a scriptural reading strategy that addresses the major exegetical difficulties perceived to emerge from Rahner's Rule Thus in Augustine's exegesis of Scripture the Augustinian Western tradition has always had the resources at its disposal to avoid or address the most poignant criticisms levelled both by and at Rahner
