Sculptural Idea:

The Sculptural Idea James J. Kelly, 1981 This book examines many different aspects of sculpture its history form matter content etc Sculptural Idea James J. Kelly, 1986-10-01 **Materials and Processes of Contemporary Sculpture**

Mahmoud Farag, 2020-01-17 Creating a successful sculpture requires an imaginative concept and a sound design that utilize the potential and avoid the limitations of the material and the process used in making it Prior to a few decades ago most sculptors were restricted to carving stone and wood or casting plaster ceramics and bronze for their creations Contemporary sculptors however are no longer bound by the limitations of these traditional materials and processes and can now create works in sizes forms and textures that could not have been achieved previously Many modern sculptures are now made from materials ranging from steel and aluminum to plastics and composites using processes ranging from welding and adhesive bonding to molding and 3D printing To fully utilize the full potential of such new materials the sculptor needs to understand their points of strength their limitations and the most effective way of shaping them to achieve a given design Although this book is written by a materials engineer the subject matter is presented from the point of view of the sculptor with emphasis on the strengths and weaknesses of different materials their resistance to weather conditions natural color and possible surface textures possible methods of shaping and joining tools and equipment needed and safety measures to take Whenever possible case studies are used to illustrate the sequence of processes and the cost elements involved in shaping a given material to create an actual work of sculpture Theories of Modern Art Herschel Browning Chipp,

Human-Environment Relations Emily Brady, Pauline Phemister, 2012-02-01 This fresh and innovative approach to human environmental relations will revolutionise our understanding of the boundaries between ourselves and the environment we inhabit The anthology is predicated on the notion that values shift back and forth between humans and the world around them in an ethical communicative zone called value space The contributors examine the transformative interplay between external environments and human values and identify concrete ways in which these norms residing in and derived from self and society are projected onto the environment Walter Pater and the Language of Sculpture Lene

?termark-Johansen, 2017-07-05 Walter Pater and the Language of Sculpture is the first monograph to discuss the Victorian critic Walter Pater's attitude to sculpture It brings together Pater's aesthetic theories with his theories on language and writing to demonstrate how his ideas of the visual and written language are closely interlinked Going beyond Pater's views on sculpture as an art form this study traces the notion of relief rilievo and hybrid form in Pater and his view of the writer as sculptor a carver in language Alongside her treatment of rilievo as a pervasive trope Lene termark Johansen also employs the idea of rivalry paragone more broadly examining Pater's concern with positioning himself as an art critic in the late Victorian art world Situating Pater within centuries of European aesthetic theories as never before done Walter Pater and the Language of Sculpture throws new light on the extraordinary complexity and coherence of Pater's writing The critic is

repositioned solidly within Victorian art and literature Modern Sculpture Reader Jon Wood, David Hulks, Alex Potts, 2012-08-21 In many anthologies of art sculpture is given short shrift in relation to other media if it is treated at all Modern Sculpture Reader aims to rectify this situation by presenting a collection of important texts that have defined sculpture's radically changing status and role since the end of the nineteenth century a time marked by a general reappraisal of the forms and functions of art From the rigorously theoretical to the experimental and poetic Modern Sculpture Reader offers a lively discourse on the medium by a range of artists writers critics and poets Marcel Duchamp Louise Bourgeois Claes Oldenberg Andr Breton Ezra Pound and Clement Greenberg in a variety of genres poems lectures transcribed interviews newspaper and magazine articles and artists statements These diverse text selections offer valuable insight into the development of the critical language of sculpture and its connections to other media in an era of increasingly conceptual artistic practice Many of the essays highlight key ongoing concerns such as sculpture's physical properties and conditions of display both of which have important implications for the viewer's tactile and emotional interaction with sculptural works

Concerning Stephen Willats and the Social Function of Art Sharon Irish, 2020-12-10 This book on Stephen Willats pulls together key strands of his practice and threads them through histories of British cybernetics experimental art and urban design For Willats a cluster of concepts about control and feedback within living and machine systems cybernetics offered a new means to make art relevant For decades Willats has built relationships through art with people in tower blocks underground clubs middle class enclaves and warehouses on the Isle of Dogs to investigate their current conditions and future possibilities Sharon Irish's study demonstrates the power of Willats's multi media art to catalyze communication among participants and to upend ideas about audience and art Here Irish argues that it is artists like Willats who are now the instigators of social transformation W. B. Yeats and the Language of Sculpture Jack Quin, 2022-06-30 This book

Fernie, 2016-12-05 Deanna Fernie analyzes the significance of sculpture in Hawthorne s fiction through the recurring motif of the fragment in its double guise as ruin and project Her book casts new light on Hawthorne s memorable ruined and unfinished images from the rough hewn figurehead of Drowne s Wooden Image 1844 to the tattered letter A in the unfinished loft of the Custom House in *The Scarlet Letter* 1850 and the unfinished bust of Donatello in *The Marble Faun* 1860 Fernie shows how the tension between the formed and unformed enabled Hawthorne to interrogate the origins and the distinctive possibilities of art in America in relation to established European models At the same time she suggests that sculpture challenged and provoked Hawthorne s shaping of his own specifically literary art stimulating him to develop its capacities for expressing irresolution and change Fernie establishes the intellectual contexts for her study through a discussion of sculpture and fragmentary form as revealed in American British and Continental thought Her book will be an important text not only for American literature scholars but also for anyone interested in British and Continental Romanticism and the intersections of art and literature An American Sculptor : Seymour Lipton Lori Verderame, Seymour Lipton, Palmer
