Sea Around Us:

The Sea Around Us Rachel Carson, 2011-03-29 National Book Award Winner and New York Times Bestseller Explore earth's most precious mysterious resource the ocean with the author of Silent Spring With more than one million copies sold Rachel Carson's *The Sea Around Us* became a cultural phenomenon when first published in 1951 and cemented Carson's status as the preeminent natural history writer of her time Her inspiring intimate writing plumbs the depths of an enigmatic world a place of hidden lands islands newly risen from the earth's crust fish that pour through the water and the unyielding epic battle for survival Firmly based in the scientific discoveries of the time *The Sea Around Us* masterfully presents Carson's commitment to a healthy planet and a fully realized sense of wonder This ebook features an illustrated biography of Rachel Carson including rare photos and never before seen documents from the Beinecke Rare Book and Manuscript Library at Yale University

The Sea Around Us Rachel Carson, 2022-08-16 In *The Sea Around Us* Rachel Carson masterfully weaves a tapestry of scientific exploration and lyrical prose that immerses readers in the wonders of marine life and the complexities of oceanography Set against the backdrop of the mid 20th century environmental discourse Carson employs a narrative style that balances meticulous research with vivid storytelling The book delves into the physical processes of the sea the richness of oceanic ecosystems and the profound influence of the ocean on human existence all while reflecting the growing concerns about ecological preservation during a time of rapid industrialization Rachel Carson a pioneering marine biologist and environmentalist drew inspiration from her own profound connection to nature and her scientific upbringing Her earlier work including the acclaimed *Under the Sea Wind* laid the groundwork for her investigative reporting on the natural world Carlson's activism and keen observations about nature heavily influenced by her experiences as a woman in science shape the poignant urgency with which she addresses the ocean's fragility in this landmark book *The Sea Around Us* is a compelling invitation to explore not only the depths of the ocean but also the interconnectedness of all life forms It is an essential read for those seeking to grasp the intricate balance of marine ecosystems as well as the human impact on our planet Carson's eloquence and rigorous scholarship make this work a timeless classic resonating with today's environmental challenges

the sea around us rachel l. carson, 1951 **The Sea Around Us** James A. Kolb, 1996 [Selected Reprints of the Sea Around Us Project](#) Sea Around Us Project, 2005 **Applying Benford's Law for Assessing the Validity of Social Science Data** Michael A. Long, Paul B. Stretesky, Kenneth J. Berry, Janis E. Johnston, Michael J. Lynch, 2023-11-23 Benford's Law is a probability distribution for the likelihood of the leading digit in a set of numbers This book seeks to improve and systematize the use of Benford's Law in the social sciences to assess the validity of self-reported data The authors first introduce a new measure of conformity to the Benford distribution that is created using permutation statistical methods and employs the concept of statistical agreement In a switch from a typical Benford application this book moves away from using Benford's Law to test whether the data conform to the Benford distribution to using it to draw conclusions about the validity of the data

The concept of Benford validity is developed which indicates whether a dataset is valid based on comparisons with the Benford distribution and in relation to this diagnostic procedure that assesses the impact of not having Benford validity on data analysis is devised

Strata Laura Poppick, 2025-07-15 An extraordinary book Marcia Bjornerud author of *Turning to Stone* A revelatory journey through four moments in Earth's deep past and their lessons for our future The epic stories of our planet's 4.54 billion year history are written in strata ages old remnants of ancient seafloors desert dunes and riverbeds striping landscapes around the world In this brilliantly original debut work science writer Laura Poppick decodes strata to lead us on a journey through four global transformations that made our lives on Earth possible the first accumulations of oxygen in the atmosphere the deep freezes of Snowball Earth the rise of mud on land and accompanying proliferation of plants and the dinosaurs reign on a hothouse planet Poppick introduces us to the researchers who have devoted their careers to understanding the events of deep time including the world's leading stegosaur scientist She travels to sites as various as a Minnesotan iron mine that runs half a mile deep and a corner of the Australian Outback where glacial deposits date from the coldest times on Earth Ultimately she demonstrates that the planet's oceans continents atmosphere life and ice have always conspired to bring stability to Earth even if we are only just beginning to understand how these different facets interact A work in the tradition of John McPhee *Strata* allows us to observe how the planet has responded to past periods of environmental upheaval and shows how Earth's ancient narratives could hold lessons for our present and future

Interrogating Boundaries of the Nonhuman Sune Borkfelt, Matthias Stephan, 2022-05-23 *Interrogating Boundaries of the Nonhuman Literature Climate Change and Environmental Crises* asks whether literary works that interrogate and alter the terms of human nonhuman relations can point to new more sustainable ways forward Bringing insights from the field of literary animal studies a diverse and international group of scholars examine literary contributions to the ecological framing of human nonhuman relationships Collectively the contributors to this edited collection contemplate the role of literature in the setting of environmental agendas and in determining humanity's path forward in the company of nonhuman others

The World in Which We Occur Neil W. Browne, 2007-10-31 Understanding our environment American philosopher John Dewey considered all human endeavors to be continuous with the natural world In his writings particularly *Art as Experience* 1934 Dewey insists on the primacy of the environment in aesthetic experience Dewey's conception of environment includes both the natural and the man made Neil Browne highlights this notion in order to define what he terms pragmatist ecology a practice rooted in the interface of the cultural and the natural which he finds to be a significant feature of some of the most important ecological writing of the last century To fully understand human involvement in the natural world Browne argues disciplinary boundaries must be opened up This is primarily important between the arts and science with profound implications for the practice of democracy The degradation of the physical environment and democratic decay for Browne are rooted in the same problem our persistent belief that humans are somehow separate from their physical environment Browne

probes the work of a number of major American writers through the lens of Dewey's philosophy. Among other texts he examines John Muir's *My First Summer in the Sierra* 1911, *Sea of Cortez* 1941 by John Steinbeck and Edward Ricketts, Rachel Carson's three books about the sea: *Under the Sea Wind* 1941, *The Sea Around Us* 1951, and *The Edge of the Sea* 1955, John Haines's *The Stars, the Snow, the Fire* 1989, Tarry Lopez's *Arctic Dreams* 1986, and Terry Tempest Williams's *Refuge* 1991. Together these texts with their combinations of scientific observation and personal meditation challenge the dichotomies to which we've become accustomed and affirm the values of a pragmatist ecology, one in which ecological and democratic values go hand in hand.

World Seas: An Environmental Evaluation Jean-Francois Hamel, 2018-09-07. *World Seas: An Environmental Evaluation* Second Edition, Volume Three: Ecological Issues and Environmental Impacts, covers global issues relating to our seas, including a biological description of the coast and continental shelf waters, the development and use of the coast, landfills, and their effects; pollutant discharges over time; the effects of overfishing and the management methods and techniques used to ensure continued ecosystem functioning. The relative importance of waterborne and airborne routes differ in different parts of the world; this is explored along with extensive coverage of major habitats and species groups, governmental education and legal issues, fisheries, effects, remote sensing, climate change, and management. This book is an invaluable worldwide reference source for students and researchers concerned with marine environmental science, fisheries, oceanography, and engineering and coastal zone development. Provides scientific reviews of regional issues, empowering managers and policymakers to make progress in under-resourced countries and regions. Covers environmental issues arising from the human use of both the sea and its watershed. Presents informed commentary on major trends, problems, and successes, and recommendations for the future.

100 People Who Changed 20th-Century America Mary Cross, 2013-01-07. To what extent does a person's own success result in social transformation? This book offers 100 answers, providing thought-provoking examples of how American culture was shaped within a crucial time period by individuals whose lives and ideas were major agents of change. *100 People Who Changed 20th Century America* provides a two-volume encyclopedia of the individuals whose contributions to society made the 20th century what it was. Comprising contributions from 20 academics and experts in their field, the thought-provoking essays examine the men and women who have shaped the modern American cultural experience: change agents who defined their time period as a result of their talent, imagination, and enterprise. Organized chronologically by the subjects' birthdates, the essays are written to be accessible to the general reader yet provide in-depth information for scholars, ensuring that the work will appeal to many audiences.

Rachel Carson Linda Lear, 2009-04-01. The authoritative biography of the marine biologist and nature writer whose book *Silent Spring* inspired the global environmentalist movement. In a career that spanned from civil service to unlikely literary celebrity, Rachel Carson became one of the world's seminal leaders in conservation. The 1962 publication of her book *Silent Spring* was a watershed event that led to the banning of DDT and launched the modern environmental movement. Growing up in poverty on a tiny

Allegheny River farm Carson attended the Pennsylvania College for Women on a scholarship There she studied science and writing before taking a job with the newly emerging Fish and Wildlife Service In this definitive biography Linda Lear traces the evolution of Carson s private professional and public lives from the origins of her dedication to natural science to her invaluable service as a brilliant if reluctant reformer Drawing on unprecedented access to sources and interviews Lear masterfully explores the roots of Carson s powerful connection to the natural world crafting a fine portrait of the environmentalist as a human being Smithsonian Impressively researched and eminently readable Compelling not just for Carson devotees but for anyone concerned about the environment People A combination of meticulous scholarship and thoughtful often poignant writing Science A sweeping analytic first class biography of Rachel Carson Kirkus Reviews

Bridging the gap between ocean acidification impacts and economic valuation International Union for the Conservation of Nature and Natural Resources (IUCN). Global Marine and Polar Programme.,2015-05-01 Following the first international workshop on the economics of ocean acidification organized by the Centre Scientifique de Monaco and the International Atomic Energy Agency in 2010 a second international workshop was held in November 2012 which explored the level of risk and the resilience or vulnerability of defined regions of the world ocean in terms of fishery and aquaculture species and economic impacts and social adaptation This report includes the findings and recommendations of the respective regional working groups and is the result of an interdisciplinary survey of ocean acidification sensitive fisheries and aquaculture *Shapers of the Great Debate on Conservation* Rachel W. White,2004-09-30 Through biographical examinations of some of the key figures in the debate on conservation this book seeks to explore a range of subjects such as the evolution of the conservation movement its implications for policy makers and how it impacts the daily lives of people everywhere The varying approaches taken by these individuals will serve to emphasize that there are many definitions of conservation and that many viewpoints are valid Detailed observations of important figures on both sides of the debate including some of the most famous and familiar and some less so provide readers with the knowledge they need to form their own opinions on this topic Major biographies include individuals such as Rachel Carson Dixy Lee Ray John Muir and James Watt An introductory essay an appendix of shorter entries on additional figures and a bibliography are also included The Fine Art of Literary Fist-Fighting Lee Gutkind,2024-01-23 An account of the emergence of creative nonfiction written by the godfather of the genre When Gutkind stops to look back on his own evolving perspective and reflects upon his writing career the choices he made he puts himself and us right back in the moment and the results are vivid ambiguous emotionally resonant fascinating Lucas Mann Washington Post In the 1970s Lee Gutkind a leather clad hippie motorcyclist and former public relations writer fought his way into the academy Then he took on his colleagues His goal to make creative nonfiction an accepted academic discipline one as vital as poetry drama and fiction In this book Gutkind tells the true story of how creative nonfiction became a leading genre for both readers and writers Creative nonfiction true stories enriched by relevant

ideas insights and intimacies offered liberation to writers allowing them to push their work in freewheeling directions The genre also opened doors to outsiders doctors lawyers construction workers who felt they had stories to tell about their lives and experiences Gutkind documents the evolution of the genre discussing the lives and work of such practitioners as Joan Didion Tom Wolfe Norman Mailer James Baldwin Zora Neale Hurston Rachel Carson Upton Sinclair Janet Malcolm and Vivian Gornick Gutkind also highlights the ethics of writing creative nonfiction including how writers handle the distinctions between fact and fiction Gutkind's book narrates the story not just of a genre but of the person who brought it to the forefront of the literary and journalistic world

Predicting Future Oceans William Cheung, Yoshitaka Ota, Andres Cisneros-Montemayor, 2019-08-17 Predicting Future Oceans Sustainability of Ocean and Human Systems Amidst Global Environmental Change provides a synthesis of our knowledge of the future state of the oceans The editors undertake the challenge of integrating diverse perspectives from oceanography to anthropology to exhibit the changes in ecological conditions and their socioeconomic implications Each contributing author provides a novel perspective with the book as a whole collating scholarly understandings of future oceans and coastal communities across the world The diverse perspectives syntheses and state of the art natural and social sciences contributions are led by past and current research fellows and principal investigators of the Nereus Program network This includes members at 17 leading research institutes addressing themes such as oceanography biodiversity fisheries mariculture production economics pollution public health and marine policy This book is a comprehensive resource for senior undergraduate and postgraduate readers studying social and natural science as well as practitioners working in the field of natural resources management and marine conservation Provides a synthesis of our knowledge on the future state of the oceans Includes recommendations on how to move forwards Highlights key social aspects linked to ocean ecosystems including health equity and sovereignty

Rachel Carson Marie-Therese Miller, 2013 Rachel Carson was a nature lover since childhood As an adult she became a marine biologist and wrote award winning books about the ocean capturing the imagination of her readers with her poetic descriptions of the sea and it

On a Farther Shore William Souder, 2013-09-03 A New York Times Notable Book of 2012 Rachel Carson loved the ocean and wrote three books about its mysteries But it was with her fourth book Silent Spring that this unassuming biologist transformed our relationship with the natural world Silent Spring was a chilling indictment of DDT and other pesticides that until then had been hailed as safe and wondrously effective It was Carson who sifted through all the evidence documenting with alarming clarity the collateral damage to fish birds and other wildlife revealing the effects of these new chemicals to be lasting widespread and lethal Silent Spring shocked the public and forced the government to take action despite a withering attack on Carson from the chemicals industry It awakened the world to the heedless contamination of the environment and eventually led to the establishment of the EPA and to the banning of DDT By drawing frightening parallels between dangerous chemicals and the then pervasive fallout from nuclear testing Carson opened a fault line between the gentle ideal

of conservation and the more urgent new concept of environmentalism Elegantly written and meticulously researched *On a Farther Shore* reveals a shy yet passionate woman more at home in the natural world than in the literary one that embraced her William Souder also writes sensitively of Carson's romantic friendship with Dorothy Freeman and of Carson's death from cancer in 1964 This extraordinary new biography captures the essence of one of the great reformers of the twentieth century

Silent Spring at 50 Roger Meiners, Pierre Desrochers, Andrew Morriss, 2012-09-18 Widely credited with launching the modern environmental movement when published 50 years ago Rachel Carson's *Silent Spring* had a profound impact on our society As an iconic work the book has often been shielded from critical inquiry but this landmark anniversary provides an excellent opportunity to reassess its legacy and influence In *Silent Spring at 50: The False Crises of Rachel Carson* a team of national experts explores the book's historical context the science it was built on and the policy consequences of its core ideas Their findings much of what Carson presented as fact was slanted and today we know much of it is simply wrong

Blue Ecocriticism and the Oceanic Imperative Sidney I. Dobrin, 2021-03-28 This book initiates a conversation about blue ecocriticism critical ethical cultural and political positions that emerge from oceanic or aquatic frames of mind rather than traditional land based approaches Ecocriticism has rapidly become not only a disciplinary legitimate critical form but also one of the most dynamic active criticisms to emerge in recent times However even in its institutional success ecocriticism has exemplified an ocean deficit That is ecocriticism has thus far primarily been a land based criticism stranded on a liquid planet *Blue Ecocriticism and the Oceanic Imperative* contributes to efforts to overcome ecocriticism's ocean deficit The chapters explore a vast archive of oceanic literature visual art television and film games theory and criticism By examining the relationships between these representations of ocean and cultural imaginaries *Blue Ecocriticism* works to unmoor ecocriticism from its land based anchors This book aims to simultaneously advance blue ecocriticism as an intellectual pursuit within the environmental humanities and to advocate for ocean conservation as derivative of that pursuit

As recognized, adventure as competently as experience more or less lesson, amusement, as well as contract can be gotten by just checking out a ebook **Sea Around Us** as well as it is not directly done, you could understand even more in the region of this life, approaching the world.

We come up with the money for you this proper as well as easy quirk to get those all. We provide Sea Around Us and numerous book collections from fictions to scientific research in any way. along with them is this Sea Around Us that can be your partner.
