**Illustrated Longitude** Dava Sobel, William J. H. Andrewes, 2003 A fully illustrated edition of the international best seller *Longitude* *The Illustrated Longitude* recounts in words and images the epic quest to solve the greatest scientific problem of the eighteenth and three prior centuries determining how a captain could pinpoint his ship's location at sea All too often throughout the ages of exploration voyages ended in disaster when crew and

cargo were either lost at sea or destroyed upon the rocks of an unexpected landfall. Thousands of lives and the fortunes of nations hung on a resolution to the longitude problem. To encourage a solution, governments established prizes for anyone whose method or device proved successful. The largest reward of 20,000 truly a king's ransom was offered by Britain's Parliament in 1714. The scientific establishment from Galileo to Sir Isaac Newton had been certain that a celestial answer would be found and invested untold effort in this pursuit. By contrast, John Harrison imagined and built the unimaginable: a clock that told perfect time at sea, known today as the chronometer. Harrison's trials and tribulations during his forty-year quest to win the prize are the culmination of this remarkable story. *The Illustrated Longitude* brings a new and important dimension to Dava Sobel's celebrated story. It contains the entire original narrative of *Longitude*, redesigned to accompany 183 images chosen by William Andrewes from portraits of every important figure in the story to maps and diagrams, scientific instruments, and John Harrison's remarkable sea clocks themselves. Andrewes's elegant captions and sidebars on scientific and historical events tell their own story of longitude, paralleling and illuminating Sobel's memorable tale.

*Practical Fluency* Max Brand, Gayle Brand, 2006 All teachers know helping students become fluent in reading and writing involves more than measuring reading rates. Max and Gayle Brand have worked together with students and colleagues over many years to discover the most effective whole class, small group, and individual strategies and activities for building both reading and writing fluency. They link all this work to the most current research on fluency, taking readers into the daily routines of their classrooms. Readers will be reassured by the many suggestions for integrating fluency into existing reading and writing workshop routines. *Longitude* Dava Sobel, 2007 Sobel presents the dramatic human story of an epic scientific quest and of John Harrison's 40-year obsession with building the perfect timekeeper, known today as the chronometer.

**The Secret of the Key: A Sixty-Eight Rooms Adventure** Marianne Malone, 2015-07-14 Filled with magic, mystery, miniatures, and adventure, the Sixty Eight Rooms is the perfect series for fans of *Chasing Vermeer*, *The Mixed Up Files of Mrs. Basil E. Frankweiler*, and *The Dollpeople*. Chicago sixth graders Ruthie and Jack think they've learned everything about the magic of the Art Institute's Thorne Rooms. But the magic starts to act strangely when Ruthie and Jack discover two rings that are out of place and out of time and a portal that shouldn't be open but somehow is. Ruthie and Jack follow the clues to seventeenth-century England and the Brownlow house where they meet the Brownlow's governess Rebecca. But Rebecca has a few secrets of her own, and she might even be in the wrong century. Can Ruthie and Jack discover the truth about Rebecca's mysterious past, or will they end up stuck in the wrong century themselves? Their quest for answers takes them from 1930s New York City and San Francisco to turn-of-the-century China. The only one who can truly answer their questions may be the woman who started it all, the room's creator, Narcissa Thorne. But to talk to Mrs. Thorne, they'll have to go back in time and find her. Unlock the magic in the exciting conclusion to the Sixty Eight Rooms Adventures. **The Secret of the Key** Marianne Malone, 2014 In the Art Institute of Chicago's miniature Thorne Rooms, the Thorne Rooms key, and a mysterious set
