Sea Killers In Disguise:

Sea Killers in Disguise Tony Bridgland, 1999 Disguised as harmless merchant ships Q ships could be transformed in moments into powerful warships and the lengths taken to insure their secrecy make an intriguing story Pirate Hunting Benerson Little, 2010-09-30 For thousands of years pirates privateers and seafaring raiders have terrorized the ocean voyager and coastal inhabitant plundering ship and shore with impunity From the victim's point of view these attackers were not the rebellious romantic rulers of Neptune's realm but savage beasts to be eradicated and those who went to sea to stop them were heroes Engaging and meticulously detailed Pirate Hunting chronicles the fight against these plunderers from ancient times to the present and illustrates the array of tactics and strategies that individuals and governments have employed to secure the seas Benerson Little lends further dimension to this unending battle by including the history of piracy and privateering ranging from the Mycenaean rovers to the modern pirates of Somalia He also introduces associated naval warfare maritime commerce and transportation the development of speed under oar sail and steam and the evolution of weaponry More than just a vivid account of the war that seafarers and pirates have waged Pirate Hunting is invaluable reading in a world where acts of piracy are once more a significant threat to maritime commerce and voyagers It will appeal to readers interested in the history of piracy anti piracy operations and maritime naval and military history worldwide

Tunnel-master & Arsonist of the Great War Tony Bridgland, Anne Morgan, 2003-12-19 Sir John Norton Griffiths was one of a breed of adventurer pioneer entrepreneur and soldier whose like is very seldom seen Having learnt his trade and made his fortune mining the rich seams of south Africa he turned his expertise to more deadly use in the Great war He led the gallant miners who burrowed deep under enemy lines with devastating effect He went on to wreak havoc on the Danube Always a controversial figure he died or was he murdered in mysterious circumstances This is the story of a true maverick who was a formidable force and legend wherever he went *How to Win on the Battlefield: The 25 Key Tactics of All Time* Rob Johnson, Mike Whitby, John France, 2020-08-25 The essential military tactics that have enabled commanders from Alexander the Great to General Giap to achieve victory on the battlefield This groundbreaking book examines battle tactics that have achieved victory through the ages Drawing on examples of battles on land at sea and in the air the authors reveal the enduring value of each tactic in clear and compelling descriptions and analysis How can you draw your enemy off balance When is the best moment to deliver a counterattack What is the effect of shock action or defense in depth This book shows how certain tactical concepts have stood the test of time It illustrates how General Robert E Lee although heavily outnumbered achieved a remarkable victory through an audacious flanking maneuver at Chancellorsville in 1863 and how the same bold move had been used effectively in Europe more than 600 years before by the king of France at Bouvines It examines how Allied armies seized and retained the initiative through the airborne landings in Normandy in 1944 and how Soviet General Zhukov pierced enemy lines using Blitzkrieg tactics in Mongolia in 1939 The book features evocative

photographs illustrations and paintings and 28 specially commissioned battle plans **Anti-Submarine Warfare** David Owen, 2007-11-15 A deep dive into the tactics and technology used to defend against submarines from the opening of the First World War through World War II and beyond The submarine was undoubtedly the most potent purely naval weapon of the twentieth century In two world wars enemy underwater campaigns were very nearly successful in thwarting Allied hopes of victory indeed annihilation of Japanese shipping by US Navy submarines is an indicator of what might have been That the submarine was usually defeated is a hugely important story in naval history yet this is the first book to treat the subject as a whole in a readable and accessible manner It concerns individual heroism and devotion to duty but also ingenuity technical advances and originality of tactical thought What developed was an endless battle between forces above and below the surface where a successful innovation by one side eventually produces a countermeasure by the other in a lethal struggle for supremacy Development was not a straight line wrong ideas and assumptions led to defeat and disaster Iconography with dozens of photographs and often large format diagrams a vast bibliography and a complete and documented general approach make this volume a work of great quality and of great interest for all enthusiasts and scholars of this very interesting subject *Storia Militare* The modeller will not only find the text engaging but there is a superb collection of photographs and illustrations which of course include submarines corvettes and destroyers Subjects which the modeller increasingly appreciates Highly recommended *Model Boats* *Weapons and Warfare* Spencer C. Tucker, 2020-03-26 This work covers major weapons throughout human history beginning with clubs and maces through crossbows swords and gunpowder up to the hypersonic railgun lasers and robotic weapons under development today *Weapons and Warfare* is designed to provide students with a comprehensive and highly informative overview of weapons and their impact on the course of human history In addition to providing basic factual information this encyclopedia will delve into the greater historical context and significance of each weapon The chronological organization by time period will enable readers to fully understand the evolution of weapons throughout history The work begins with a foreword by a top scholar and a detailed introductory essay by the editor that provides an illuminating historical overview of weapons It then offers entries on more than 650 individual weapons systems Each entry has sources for further reading The weapons are presented alphabetically within six time periods ranging from the prehistoric and ancient periods to the contemporary period Each period has its own introduction that treats the major trends occurring in that era In addition 50 sidebars offer fascinating facts on various weapons Numerous illustrations throughout the text are also included *The Phantom Army of Alamein* Rick Stroud, 2012-10-11 In 1940 a group of artists sculptors film makers theatre designers and set painters came together to form the Camouflage Unit Led by Major Geoffrey Barkas and including among their number the internationally renowned stage magician Jasper Maskelyne the unit's projects became a crucial battlefield weapon At the siege of Tobruk the unit made a vital desalination plant appear to have been destroyed by enemy bombers from then on they used their storytelling skills to

weave intricate webs of deception making things appear that weren't actually there and things that were disappear to deceive the enemy. Their stage was the enormous flat and almost featureless Western Desert. The unit's schemes were so successful that in August 1942 the Unit was ordered by General Montgomery to come up with a way to hide the preparations for the Battle of Alamein, the biggest battle the 8th Army had ever fought. Operation Bertram was born. In six short weeks two divisions with armour, field guns and supporting vehicles were conjured from the sand while real tanks and lethal twenty-five pound field guns vanished from sight. Then on the eve of the battle the unit performed the biggest conjuring trick in military history. Right in front of the German's eyes they made 600 tanks disappear and reappear fifty miles away disguised as lorries. Rommel had been bamboozled by an army made of nothing but string and straw and bits of wood. The Phantom Army of Alamein tells for the first time the full story of how some of Britain's most creative men put down their brushes, pencils and cameras to join the rest of the world in the fight against the Nazis and played a vital role in the winning of the war.

Animal Weapons Douglas J. Emlen, 2014-11-11 WINNER OF THE PHI BETA KAPPA AWARD IN SCIENCE The story behind the stunning extreme weapons we see in the animal world: teeth and horns and claws and what they can tell us about the way humans develop and use arms and other weapons. In *Animal Weapons* Doug Emlen takes us outside the lab and deep into the forests and jungles where he's been studying animal weapons in nature for years to explain the processes behind the most intriguing and curious examples of extreme animal weapons: fish with mouths larger than their bodies and bugs whose heads are so packed with muscle they don't have room for eyes. As singular and strange as some of the weapons we encounter on these pages are, we learn that similar factors set their evolution in motion. Emlen uses these patterns to draw parallels to the way we humans develop and employ our own weapons and have since battle began. He looks at everything from our armor and camouflage to the evolution of the rifle and the structures human populations have built across different regions and eras to protect their homes and communities. With stunning black and white drawings and gorgeous color illustrations of these concepts at work, *Animal Weapons* brings us the complete story of how weapons reach their most outsized dramatic potential and what the results we witness in the animal world can tell us about our own relationship with weapons of all kinds.

Conrad's Secrets R. Hampson, 2012-08-13 *Conrad's Secrets* explores a range of knowledges which would have been familiar to Conrad and his original readers. Drawing on research into trade, policing, sexual and financial scandals, changing theories of trauma and contemporary war crimes, the book provides contexts for Conrad's fictions and produces original readings of his work.

Smoke and Mirrors Deborah Lake, 2016-07-11 The Q ship, an ordinary merchant vessel with concealed guns, came into its own during the First World War when the Royal Navy used it to trap and destroy German U-boats. Deborah Lake uses a wide range of primary and secondary source material drawn from archives in the UK, Germany and the USA to tell the compelling story of the Q ships and their U-boat adversaries. The Q ship operations themselves will be covered by following the careers of the eight men who won the Victoria Cross on Special Service Operations and by accounts

of German U boat crews being on the receiving end No book on Q ships can avoid the Baralong incident in which a Q ship s crew allegedly executed the survivors of the German submarine U 27 on 19 August 1915 In a subsequent encounter with U 41 more British atrocities were alleged by the only two German survivors Revealing extracts from the diary of a Royal Marine who served on board the Baralong are reproduced in the book together with other first hand accounts With charge and counter charge this incident provides a fascinating story **Atrocity, Deviance, and Submarine Warfare** Nachman Ben-Yehuda,2013-07-15 In an era of changing ethics the submarine has inaugurated a new type of unrestricted naval warfare

VCs of the First World War: The Naval VCs Stephen Snelling,2013-11-04 The Naval VCs is a complete record of almost fifty men who won the Victoria Cross while serving in the Royal Navy during the First World War They include the conflict s youngest and oldest winners in operations ranging from the Atlantic to the coast of Africa and from the Straits of Otranto to the rivers of Mesopotamia These awards were won aboard all manner of fighting ships from disguised schooner to light cruiser from motor launch to submarine and from river steamer to battle cruiser This book charts the lives and careers of the VC recipients and presents graphic accounts of their award winning actions based on original material much of it from eyewitness sources [A History of the Laws of War: Volume 1](#) Alexander Gillespie,2011-09-06 This unique new work of reference traces the origins of the modern laws of warfare from the earliest times to the present day Relying on written records from as far back as 2400 BCE and using sources ranging from the Bible to Security Council Resolutions the author pieces together the history of a subject which is almost as old as civilisation itself The author shows that as long as humanity has been waging wars it has also been trying to find ways of legitimising different forms of combatants and regulating the treatment of captives This first book on warfare deals with the broad question of whether the patterns of dealing with combatants and captives have changed over the last 5 000 years and if so how In terms of context the first part of the book is about combatants and those who can lawfully take part in combat In many regards this part of the first volume is a series of less than ideal pathways This is because in an ideal world there would be no combatants because there would be no fighting Yet as a species we do not live in such a place or even anywhere near it either historically or in contemporary times This being so a second best alternative has been to attempt to control the size of military forces and therefore the bloodshed This is also not the case by which humanity has worked over the previous centuries Rather the clear assumption for thousands of years has been that authorities are allowed to build the size of their armed forces as large as they wish The restraints that have been applied are in terms of the quality and methods by which combatants are taken The considerations pertain to questions of biology such as age and sex geographical considerations such as nationality and the multiple nuances of informal or formal combatants These questions have also overlapped with ones of compulsion and whether citizens within a country can be compelled to fight without their consent Accordingly for the previous 3 000 years the question has not been whether there should be a limit on the number of soldiers but rather who is or is not a lawful combatant It has rarely been a

question of numbers It has been and remains one of type The second part of this book is about people typically combatants captured in battle It is about what happens to their status as prisoners about the possibilities of torture assistance if they are wounded and what happens to their remains should they be killed and their bodies fall into enemy hands The theme that ties all of these considerations together is that all of the acts befall those who are to one degree or another captives of their enemies As such they are no longer masters of their own fate As a work of reference this first volume as part of a set of three is unrivalled and will be of immense benefit to scholars and practitioners researching and advising on the laws of warfare It also tells a story which throws fascinating new light on the history of international law and on the history of warfare itself

Q Ship vs U-Boat David Greentree, 2014-02-20 A fully illustrated account of the British Q ship a heavily armed small craft disguised as a merchant vessel and its tactics against the Kaiser's formidable U boat fleet during World War I Q ships came in all shapes and sizes coastal steamer trawler barque yacht or schooner but all had to look harmless in order to lure their opponents to the surface and encourage them to attack Armaments differed according to ship size steamers commonly had 4 in guns mounted amidships and in the bow trawlers 3 pdrs and sailing ships 12 pdrs David Greentree covers how the Q ship used a panic crew trained to act out an elaborate evacuation to convince the U boat commander that the ship was being abandoned by its crew The Q ship captain would remain behind with a handful of other crewmen manning the guns which remained hidden until the most opportune time to unmask and engage the U boat Packed with illustrations this book explores the Q ship concept in detail from its emergence early in the war when no other method seemed likely to counter the U boat threat and as it flourished until new technologies and tactics were developed tested and implemented **Atlantic Convoys and Nazi Raiders** Bruce A. Watson, 2005-12-30 In November of 1940 the German pocket battleship Admiral Scheer attacked British Convoy HX 84 The merchant cruiser HMS Jervis Bay a converted passenger liner that was the convoy's only escort armed only with antique 6 inch guns charged the Nazi raider While the Jervis Bay did not stand a chance of surviving the battle her crew's fatalistic bravery inspired awe in all who witnessed the fight Watson recounts how the Scheer's 11 inch guns turned the ship into a burning hulk in twenty two minutes but most of the convoy escaped In November of 1940 the German pocket battleship Admiral Scheer attacked British Convoy HX 84 The Armed Merchant Cruiser HMS Jervis Bay the only escort and mounting antique 6 inch guns charged the Nazi raider While the Jervis Bay did not stand a chance of surviving the battle her crew's fatalistic bravery inspired awe in all who witnessed the fight Watson describes how the Scheer's 11 inch guns turned the converted passenger liner into a burning hulk in twenty two minutes but most of the convoy escaped How did this confrontation come to pass Both the necessity of arming a passenger liner and pretending it was a warship and the building of the Admiral Scheer and her sister ships for the express purpose of commerce raiding find their roots in the events political decisions re armament policies war plans naval traditions and blunders that arose in pre war Britain and Germany But this event holds a significance beyond the battle itself The sinking of the Jervis Bay symbolizes the

end of an era in naval warfare The Armed Merchant Cruisers of the Second World War inherited a long sometimes noble and sometimes ignoble history Long employed in blockade or patrol duty armed merchant cruisers ventured out for the first time to escort convoys a defensive duty for which they were eminently unsuited and for which the Jervis Bay paid a fearful price

Doughboys on the Great War Edward A. Gutiérrez, 2017-01-20 It is impossible to reproduce the state of mind of the men who waged war in 1917 and 1918 Edward Coffman wrote in *The War to End All Wars* In Doughboys on the Great War the voices of thousands of servicemen say otherwise The majority of soldiers from the American Expeditionary Forces returned from Europe in 1919 Where many were simply asked for basic data veterans from four states Utah Minnesota Connecticut and Virginia were given questionnaires soliciting additional information and remarks Drawing on these questionnaires completed while memories were still fresh this book presents a chorus of soldiers voices speaking directly of the expectations motivations and experiences as infantrymen on the Western Front in World War I What was it like to kill or maim German soldiers To see friends killed or maimed by the enemy To return home after experiencing such violence Again and again soldiers wrestle with questions like these putting into words what only they can tell They also reflect on why they volunteered why they fought what their training was and how ill prepared they were for what they found overseas They describe how they interacted with the civilian populations in England and France how they saw the rewards and frustrations of occupation duty when they desperately wanted to go home and perhaps most significantly what it all added up to in the end Together their responses create a vivid and nuanced group portrait of the soldiers who fought with the American Expeditionary Forces on the battlefields of Aisne Marne Argonne Forest Belleau Wood Chateau Thierry the Marne Metz Meuse Argonne St Mihiel Sedan and Verdun during the First World War The picture that emerges is often at odds with the popular notion of the disillusioned doughboy Though hardened and harrowed by combat the veteran heard here is for the most part proud of his service service undertaken for duty honor and country In short a hundred years later the doughboy once more speaks in his own true voice *Naval Constabulary Operations and Fisheries Governance* Sean A. G.

Andrews, 2024-05-07 This book offers an analysis of naval constabulary operations in particular Australian fisheries patrols and challenges the widely accepted Anglo American school of maritime thought In the Indo Pacific fisheries and the activities of fishing boats are of increasing strategic importance in Australia s region Australia s Four Oceans Issues of overfishing population growth and climate change are placing growing pressure on fish as a resource and in doing so are making fisheries more significant and significant on a strategic as opposed to simply an economic or environmental level When combined with the growing use of fishing vessels as para naval forces it is clear that the activities of fishing vessels whether fishing or not fishing are matters of considerable strategic relevance This book illuminates contemporary seapower challenges explains and defines maritime security and examines and refines existing theory to advance a set of new or refined concepts to help frame the on water activities of constabulary operations reducing the possibility of on water
