Seal Cull A Penguin Special:

The Devil and the Deep Blue Sea Linda Pannozzo, 2023-01-03T00:00:00Z In the early 1990s the collapse of the Atlantic groundfish stocks signaled the destruction of life in the seas but it also threw 40 000 people out of work unraveling the very fabric of rural life throughout Atlantic Canada Twenty years later even after fishing moratoriums and limited directed fishing the cod have not recovered and some stocks are on the verge of biological extinction The fishing industry politicians and government scientists blame the growing population of grey seals a species that had up until the 1970s been severely depleted and argue that a large scale cull of the population is needed to save the cod In *The Devil and the Deep Blue Sea* Linda Pannozzo finds that the truth is much more complex and that the seals are scapegoats for the federal government's mismanagement of the cod stocks deflecting attention away from the effects of global warming and the continued use of destructive fishing methods The collapse of the cod its failure to recover and the recent recommendations for large scale grey seal culls are stark reminders of how fisheries science and public policy are increasingly estranged from each other

The Seal Hunt Nikolas Sellheim, 2018-08-13 In *The Seal Hunt Cultures Economies and Legal Regimes* Nikolas Sellheim offers a deep analysis of the seal hunt worldwide He engages on a journey from the northern to the southern hemisphere and explores how the seal hunt has shaped cultures all over the world up to this day By analysing the different national and international regimes dealing with the seal hunt Sellheim shows how the perception of the seal and the seal hunt has changed over time and space Focusing on the European Union and the World Trade Organization the volume offers an account on how opposition towards the seal hunt has found its way onto the international spheres of governance and trade

A Year with the Seals Alix

Morris, 2025-07-15 Environmental journalist Alix Morris spends an eye opening year getting to know these elusive intelligent creatures investigating the effects of their extraordinary return from the brink of extinction and how we can try to bring nature back into balance It might be their large strangely human eyes or their dog like playfulness but seals have long captured people's interest and affection making them the perfect candidate for an environmental cause as well as the subject of decades of study Alix Morris spends a year with these magnetic creatures and brings them to life on the page season by season as she learns about their intelligence their relationships with each other their ecosystems and the changing climate Morris also gets to know all of the competing interests in the intense debate about the newly recovered seal populations in our coastal waters from local fishermen whose catch is often diminished by savvy seals to tribes who once relied on seal hunting for food clothing and medicine to seal rescue workers and biologists to surfers and swimmers now encountering seal hunting sharks in coastal waters *A Year with the Seals* is a rare look at what happens when conservation efforts actually work and how human tampering with ecosystems continues to have unexpected consequences But it's also a gripping adventure

story of a journalist determined to understand seals and our relationship with them for herself **Natural Science in Schools** ,1975 **11 Places in the World** Sara J., Discover the world s most extraordinary destinations that will transform your life forever What if travel could change who you are not just where you ve been This isn t another guidebook filled with tourist traps and hotel recommendations This is your invitation to eleven life changing destinations that will reshape how you see our planet and your place on it From Antarctica s pristine wilderness to Bhutan s happiness focused kingdom from Raja Ampat s underwater paradise to Socotra Island s alien landscapes these carefully chosen destinations offer experiences you literally cannot find anywhere else on Earth Inside you ll discover Antarctica s untouched continent where silence has weight Salar de Uyuni s mirror that lets you walk on heaven Machu Picchu s ancient mysteries carved in living stone Iceland s Northern Lights painting the sky with cosmic fire The Serengeti s greatest wildlife theater on Earth Raja Ampat s crown jewel of marine biodiversity Socotra s evolutionary laboratory with species found nowhere else Each destination faces urgent threats from climate change and overdevelopment The window to experience these places in their current pristine state may not remain open forever More than a travel book this is a call to adventure that transforms tourists into conservationists sightseers into advocates and ordinary journeys into life defining experiences These eleven places don t just deserve a spot on your bucket list They demand it Ready to discover what our extraordinary planet has been saving for those brave enough to seek transformation Your journey of a lifetime begins here Perfect for adventurous travelers nature lovers and anyone seeking meaningful experiences that matter *South African Sealskins, Importation Moratorium* ,1976 The International Journal of Marine and Coastal Law ,1995 **Greenpeace** Rex Weyler,2004-10-06 The founder of Greenpeace brings readers the story of the creation adventures clashes objectives and heroics of the world s largest direct action environmental group and describes the influence of such legends as Gandhi Einstein Rachel Carson and Martin Luther King Jr on the organization 25 000 first printing *Animals and the Environment* Lisa Kemmerer,2015-05-01 Contemporary Earth and animal activists rarely collaborate perhaps because environmentalists focus on species and ecosystems while animal advocates look to the individual and neither seems to have much respect for the other This diverse collection of essays highlights common ground between earth and animal advocates most notably the protection of wildlife and personal dietary choice If earth and animal advocates move beyond philosophical differences and resultant divergent priorities turning attention to shared goals both will be more effective and both animals and the environment will benefit Given the undeniable seriousness of the environmental problems that we face including climate change and species extinction it is essential that activists join forces Drawing on a wide range of issues and disciplines ranging from wildlife management hunting and the work of NGOs to ethics ecofeminism religion and animal welfare this volume provides a stimulating collection of ideas and challenges for anyone else who cares about the environment or animals **The Shadows of Consumption** Peter Dauvergne,2010-09-24 An environmentalist maps the hidden costs of overconsumption in a globalized world by tracing the

environmental consequences of five commodities The Shadows of Consumption gives a hard hitting diagnosis many of the earth s ecosystems and billions of its people are at risk from the consequences of rising consumption Products ranging from cars to hamburgers offer conveniences and pleasures but as Peter Dauvergne makes clear global political and economic processes displace the real costs of consumer goods into distant ecosystems communities and timelines tipping into crisis people and places without the power to resist In The Shadows of Consumption Peter Dauvergne maps the costs of consumption that remain hidden in the shadows cast by globalized corporations trade and finance Dauvergne traces the environmental consequences of five commodities automobiles gasoline refrigerators beef and harp seals In these fascinating histories we learn for example that American officials ignored warnings about the dangers of lead in gasoline in the 1920s why China is now a leading producer of CFC free refrigerators and how activists were able to stop Canada s commercial seal hunt in the 1980s but are unable to do so now Dauvergne s innovative analysis allows us to see why so many efforts to manage the global environment are failing even as environmentalism is slowly strengthening He proposes a guiding principle of balanced consumption for both consumers and corporations We know that we can make things better by driving a high mileage car eating locally grown food and buying energy efficient appliances but these improvements are incremental local and insufficient More crucial than our individual efforts to reuse and recycle will be reforms in the global political economy to reduce the inequalities of consumption and correct the imbalance between growing economies and environmental sustainability
