Seamanship A Voyage Along The Wild Coasts Of The British Isles:

Seamanship Adam Nicolson, 2007-08-14 From Land's End to Cape Clear past Roaringwater Bay and Cod's Head on past Inishvickillane and Inishtooskert up through the Hebrides to Orkney and on to the Faeroes stretches the richest and wildest coastline in Europe Adam Nicolson decided to sail this coast in the Auk a 42 foot wooden ketch embarking on a 1 500 mile voyage through what he hoped would be a sequence of revelatory landscapes He was not disappointed Seamanship is more than a travel journal It describes an inner journey as much as an outer one disasters and discoveries powerful landscapes and modern visionaries and encounters with the animals living on the wild edge of the Atlantic Above all it is about the gaps that open up between those who go and those who stay at home Seamanship in the end is not about the sea It's about being alive

Shakespeare's Ocean Daniel Brayton, 2012 Study of the sea both in terms of human interaction with it and its literary representation has been largely ignored by ecocritics In Shakespeare's Ocean Dan Brayton foregrounds the maritime dimension of a writer whose plays and poems have had an enormous impact on literary notions of nature and in so doing plots a new course for ecocritical scholarship Shakespeare lived during a time of great expansion of geographical knowledge The world in which he imagined his plays was newly understood to be a sphere covered with water In vital readings of works ranging from The Comedy of Errors to the valedictory The Tempest Brayton demonstrates Shakespeare's remarkable conceptual mastery of the early modern maritime world and reveals a powerful benthic imagination at work **God's**

Life Between the Tides Adam Nicolson, 2025-08-22 Adam Nicolson explores the marine life inhabiting seashore rockpools with a scientist's curiosity and a poet's wonder in this beautifully illustrated book The sea is not made of water Creatures are its genes Look down as you crouch over the shallows and you will find a periwinkle or a prawn a claw displaying crab or a cluster of anemones ready to meet you No need for binoculars or special stalking skills go to the rocks and the living will say hello Inside each rock pool tucked into one of the infinite crevices of the tidal coastline lies a rippling silent unknowable universe Below the stillness of the surface course different currents of endless motion the ebb and flow of the tide the steady forward propulsion of the passage of time and the tiny lifetimes of the rock pool's creatures all of which coalesce into the grand narrative of evolution In *Life Between the Tides* Adam Nicolson investigates one of the most revelatory habitats on earth Under his microscope we see a prawn's head become a medieval helmet and a group of winkles transform into a Dickensian social scene with mollusks munching on Stilton and glancing at their pocket watches Or rather is a winkle more like Achilles an ancient hero throwing himself toward death for the sake of glory For Nicolson who writes with scientific rigor and a poet's sense of wonder *The American Scholar* the world of the rock pools is infinite and as intricate as our own As Nicolson journeys between the tides both in the pools he builds along the coast of Scotland and through the timeline of scientific discovery he is accompanied by great thinkers no one can escape the pull of the sea We meet Virginia Woolf and her *Waves* a young T S Eliot peering into his own rock pool in Massachusetts even Nicolson's father in law a classical scholar who would hunt for amethysts along the shoreline his mind on Heraclitus and the other philosophers of ancient Greece And of course scientists populate the pages not only their discoveries but also their doubts and errors their moments of quiet observation and their thrilling realizations Everything is within the rock pools where you can look beyond your own reflection and find the miraculous an inch beneath your nose The soul wants to be wet Heraclitus said in Ephesus twenty five hundred years ago This marvelous book demonstrates why it is so Includes Color and Black and White Photographs

Coastal Works Nicholas Allen, Nick Groom, Jos Smith, 2017-07-04 In all the complex cultural history of the islands of Britain and Ireland the idea of the coast as a significant representative space is critical For many important artists coastal space has figured as a site from which to braid ideas of empire nation region and archipelago They have been drawn to the coast as a zone of geographical uncertainty in which the self definitions of the nation founder they have been drawn to it as a peripheral space of vestigial wildness of island retreats and experimental living as a network of diverse localities richly endowed with distinctive forms of cultural heritage and as a dynamically interconnected ecosystem which is at the same time the historic site of significant developments in fieldwork and natural science This collection

situates these cultures of the Atlantic edge in a series of essays that create new contexts for coastal study in literary history and criticism The contributors frame their research in response to emerging conversations in archipelagic criticism the blue humanities and island studies the essays challenging the reader to reconsider ideas of margin periphery and exchange These twelve case studies establish the coast as a crucial location in the imaginative history of Britain Ireland and the north Atlantic edge Coastal Works will appeal to readers of literature and history with an interest in the sea the environment and the archipelago from the 18th century to the present Accessible innovative and provocative Coastal Works establishes the important role that the coast plays in our cultural imaginary and suggests a range of methodologies to represent relationships between land sea and cultural work

Why Homer Matters Adam Nicolson, 2014-11-18 Adam Nicolson writes popular books as popular books used to be a breeze rather than a scholarly sweat but humanely erudite elegantly written passionately felt and his excitement is contagious James Wood The New Yorker Adam Nicolson sees the Iliad and the Odyssey as the foundation myths of Greek and our consciousness collapsing the passage of 4 000 years and making the distant past of the Mediterranean world as immediate to us as the events of our own time Why Homer Matters is a magical journey of discovery across wide stretches of the past sewn together by the poems themselves and their metaphors of life and trouble Homer's poems occupy as Adam Nicolson writes a third space in the way we relate to the past not as memory which lasts no more than three generations nor as the objective accounts of history but as epic invented after memory but before history poetry which aims to bind the wounds that time inflicts The Homeric poems are among the oldest stories we have drawing on deep roots in the Eurasian steppes beyond the Black Sea but emerging at a time around 2000 B C when the people who would become the Greeks came south and both clashed and fused with the more sophisticated inhabitants of the Eastern Mediterranean The poems which ask the eternal questions about the individual and the community honor and service love and war tell us how we became who we are

Environment, labour and capitalism at sea Penny McCall Howard, 2017-04-28 This book explores how fishers make the sea productive through their labour using technologies ranging from wooden boats to digital GPS plotters to create familiar places in a seemingly hostile environment It shows how their lives are affected by capitalist forces in the markets they sell to forces that shape even the relations between fishers on the same boat Fishers frequently have to make impossible choices between safe seamanship and staying afloat economically and the book describes the human impact of the high rate of deaths in the fishing industry The book makes a unique contribution to understanding human environment relations examining the places fishers create and name at sea as well as technologies and navigation practices It combines phenomenology and political economy to offer new approaches for analyses of human environment relations and technologies

How to Be Adam Nicolson, 2023-10-17
Nicolson crafts a geography of the ancient world and a brilliant exploration of our connections to the past What is the nature

of things What is justice How can I be myself How should we treat each other Before the Greeks the idea of the world was dominated by god kings and their priests Twenty five hundred years ago in a succession of small eastern Mediterranean harbor cities a few heroic men and women decided to cast off mental subservience and apply their own thinking minds to the conundrums of life These great innovators shaped the beginnings of western philosophy Through the questioning voyager Odysseus Homer explored how we might navigate our way through the world Heraclitus in Ephesus was the first to consider the interrelatedness of things Xenophanes of Colophon was the first champion of civility On the Aegean island of Lesbos the early lyric poets Sappho and Alcaeus asked themselves How can I be true to myself On Samos Pythagoras imagined an everlasting soul and took his ideas to Italy where they flowered again in surprising and radical forms The award winning writer Adam Nicolson travels with us through this transforming world and asks what light these ancient thinkers can throw on our deepest preconceptions Enhanced with maps photographs and artwork How to Be is an expedition into early ideas Nicolson takes us to the dawn of investigative thought and makes the fundamental questions of the ancient philosophers new again What are the principles of the physical world How can we be good in it And why do we continue to ask these questions It is an enthralling exhilarating journey
